- 688 **MR FITZGIBBON:** To ask the Minister representing the Minister for Regional Communications—Is it a fact that (a) NBN services provided through the NBN Sky Muster Satellite Service (SMSS) guarantee a maximum connection speed in the same way as metropolitan residential ADSL services, and (b) the maximum connection speed provided through the SMSS is the maximum combined speed for all services connecting to the spot beam from the satellite; if so, do NBN rural and remote customers using the SMSS only receive a fraction of the theoretical maximum—that is, $1/n$ where n = the number of active connections in the spot beam.
- 689 **MR FITZGIBBON:** To ask the Minister representing the Minister for Regional Communications—
- (1) Are spot beams from the NBN Sky Muster Satellite Service (SMSS) across northern Australia classed as ‘wide spot beams’, and do they cover an area of approximately 330,000 square kilometres.
 - (2) Are users of NBN services provided through the SMSS unable to predict the level of congestion on wide spot beams and therefore, unable to reasonably predict the expected speed of a connection; if so, does this mean that users cannot deploy services that depend on minimum connection speeds such as VoIP or ‘fat client’ type ERP applications, because they do not have access to a predictable connection speed.
- 692 **MR FITZGIBBON:** To ask the Minister representing the Minister for Regional Communications—Is it a fact that the NBN data caps are small, and the NBN has a ‘fair usage’ policy that enforces a restrictive data cap over a rolling four-week period, effectively reducing caps to a weekly allowance; if so, as a result of the small NBN data caps, are some businesses operating in remote areas forced to install multiple connections to ensure staff ‘personal’ use does not consume the bandwidth required for ‘business’ use.

- 699 **MS MCGOWAN:** To ask the Minister representing the Minister for Regional Communications—In respect of the Government announcing, as part of its commitment to Round 3 of the Mobile Black Spots Program, that a number of priority locations would receive funding (a) how many base stations were on the list compiled at the time of the announcement, and will the Minister present this list, (b) what proportion of the \$60 million will be committed if all of the base stations on the list are funded, (c) how was this list compiled, (d) was there a consultation process for compiling this list, (e) did the Minister’s department have a say in compiling this list or was it provided by the Minister’s office, (f) what was the process for seeking nominations for this list from Members of Parliament, (g) will the Minister publish the current list of priority locations to be funded, (h) if communities are not on the list for Round 3, what is the process for them to apply for having mobile black spots addressed, and (i) how many mobile phone towers will be funded under Round 3.

- 709 **MR HART:** To ask the Minister for Infrastructure and Transport—In respect of Infrastructure Australia’s January 2017 Infrastructure Priority List which identified ‘Tasmanian sewerage infrastructure upgrades’ as a proposed initiative and ‘Tasmanian waste water treatment environmental compliance’ as a problem (page 9), (a) has any material been supplied to the Australian Government on the likely cost of separation of sewerage and stormwater within the city of Launceston given it has a combined sewerage and stormwater system, without separation of sewerage and stormwater outflows, and (b) is there any material to suggest that the separation of sewerage and stormwater within the city of Launceston will have any effect on the incidence of discharge of raw sewerage in breach of environmental obligations.
- 710 **MR HART:** To ask the Minister for Infrastructure and Transport—In respect of Infrastructure Australia’s January 2017 Infrastructure Priority List which identified ‘Tasmanian sewerage infrastructure upgrades’ as a proposed initiative and ‘Tasmanian waste water treatment environmental compliance’ as a problem (page 9), (a) in light of the Australian Government either funding or facilitating a number of projects within the Tamar basin at Launceston, in particular flood protection, remediation and tourism developments, are the present sewerage treatment plants within the greater Launceston area (ie, Legana, Newnham, Riverside, Ti-Tree Bend, Hoblers Bridge, Norwood and Prospect Vale), constraining growth in economic activity in Northern Tasmania, and (b) has the Australian Government received any submissions on the likely increase in sewerage volume to the system, and the capacity for the Launceston sewerage system to cope with these anticipated volume increases.
