Migration Committee
FEDERAL PARLIAMENT

SUBMISSION ON MULTI-CULTURALISM

Dear Committee,

I wish to make a brief submission.

Unless one has their eyes closed, it is clear that there is a world-wide problem. Islam is rapidly growing and it is spreading. Islam is not designed to assimilate in those countries where it finds itself; it is designed to take over.

That is its nature, and its plan. Those who are in key government positions must open their eyes and educate themselves. Many live in a shielded, idealistic bubble that insists everything will go to plan, but the proof that this is wrong is in every country where Muslim immigration has been encouraged.

Look to all the scenarios in Europe. Look at growing problems in the U.S.A. This is not racism, because Islam contains people of all races. It is the very doctrine of Islam that is the problem.

To not face this problem in Australia, while we still have the opportunity to address it, is a dreadful travesty.

To blindly promote Multiculturalism, in the name of inclusion, or whatever else, is doing future generations of Australians a major disservice.

No other group of immigrants have presented this problem. As I have mentioned, this is not race based, this is not country based, this is simply about discouraging an ideology that, in its pure form, will not accept our Democratic system, nor our leadership.

I urge you to consider this in the light of the experiences of other countries who now realize they have made a mistake and are not sure how to proceed.

Thank you,
