Keith Norman

Attention: House of Representatives
Standing Committee of the
Proposed Murry-Darling
Basin Plan.

I am a 63 year old 3rd generation farmer on the Liverpool Plains.

- ① Stop buying water licences.
Stop the trading of water licences.
They were given out in the first place and belong to that property.
- ② All pumps to be no further than half-way down river and creek banks.
- ③ Take control back of all irrigation water from cotton growers.
- ④ Stop pumping from bores into on farm water storages.

What percentage of water pumped from the Mooki, Peel, Namoi, Gwydir, MacIntyre, Condamine, Balonne valleys is used for food production?

Yours faithfully,
