6 MAR 2006

BY: ATSLA

Ms Cheryl Scarlett  
Inquiry Secretary  
House of Representatives Standing Committee on  
Aboriginal and Torres Strait Islander Affairs  
Parliament House  
CANBERRA ACT 2600

Dear Ms Scarlett

I thank the House of Representatives Standing Committee on Aboriginal and Torres Strait Islander Affairs (the Committee) for the opportunity to contribute to its inquiry into Indigenous employment. As requested, here are the responses from the Department of Agriculture, Fisheries and Forestry (the Department) to the questions on notice that arose during the 6 February Public Hearing of the Committee.

Question 1 – Report on Indigenous Employment in Rural Industries

The initial question on notice asked by the Committee was regarding a report by the Australian Bureau of Agricultural and Resource Economics (ABARE) on Indigenous employment in rural industries. I am now in a position to confirm that ABARE is expecting to publish this report by 31 March 2006 on its website ([www.abare.gov.au](http://www.abare.gov.au)).

Question 2 – FarmBis Statistics

The second piece of information requested by the Committee was a State and Territory breakdown of Indigenous people's participation in FarmBis programs. This information has been collated and is included at Enclosure 1.

Question 3 – Tiwi Islands Forestry

The Committee requested more specific information relating to the involvement of the Tiwi Island Community in Department's National Indigenous Forestry Strategy. The Tiwi Forestry Project is a partnership between Great Southern Plantations Limited and the Tiwi Land Council. The Tiwi Land Council was established in 1978, under the *Aboriginal Land Rights (Northern Territory) Act 1976* (Cth), and represents the Tiwi people who hold inalienable freehold title to their land under the Act. The overall objective of the Tiwi Forestry Project is the continual development of an integrated forest products industry on the Tiwi Islands.

As a result of the forestry operations, Tiwi Islanders are guaranteed an income flow in the future, as well as in the short-term, as they receive returns from the sale of timber. Furthermore, at the completion of the project, the established plantations along with any development (including the port) and an experienced and well trained local workforce revert to the Tiwi people. Currently the forest operations on the islands provide for 14 Tiwi forest apprentices and another ten positions in the area of natural resource management. These positions are full time and do not rely on Community Development Employment Project funding.

The Tiwi Islands project is included as a case study in the Department's National Indigenous Forestry Strategy (NIFS). Further information in relation to the implementation of the NIFS has been compiled and is included for the Committee's information at Enclosure 2 and is also available on the DAFF website ([www.daff.gov.au/nifs](http://www.daff.gov.au/nifs)).

Question 4 – Bawinganga Aboriginal Corporation Marine Rangers

The Committee also queried the Department about the progress of a letter written to Senator Ian Macdonald, the former Minister for Fisheries, Forestry and Conservation, by Mr Ian Munro, the Chief Executive Officer of the Bawinanga Aboriginal Corporation proposing joint funding of Marine Rangers for the waters adjoining the Northern Territory. Before receiving the letter from Mr Munro, Senator Macdonald had already discussed the contribution of Marine Rangers with the Northern Territory Minister for Primary Industry and Fisheries, the Hon. Kon Vatskalis MLA. During this conversation, Senator Macdonald and Minister Vatskalis had also discussed the potential to further develop the role of Marine Rangers in fisheries surveillance and enforcement.

As a result of this discussion, the Northern Territory Department of Primary Industry, Fisheries and Mines began drafting a detailed submission outlining the way in which the Marine Rangers could make a formal contribution to combating illegal incursions. This submission was still in development at the time that Mr Munro sent his proposal to Senator Macdonald. Senator Macdonald responded to Mr Munro recommending that he contact Mr Vatskalis, or the Northern Territory Department of Primary Industry, Fisheries and Mines, and offer to play an active role in the development of their submission.

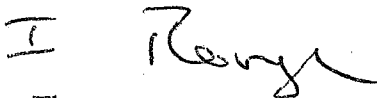

The new Minister for Fisheries, Forestry and Conservation, Senator the Hon Eric Abetz, subsequently received a submission from the Northern Territory which included a request for funds on behalf of all 14 Marine Ranger groups, including those represented by the Bawinanga Aboriginal Corporation. This proposal is currently being considered in conjunction with a number of others in relation to illegal foreign fishing.

Question 5 – Resources to Indigenous Protected Areas

The final request from the Committee was that the Department supply it with a list of instances where Indigenous people have accessed resources from the Landcare and National Heritage Trust programs. This information has been collated and is included at Enclosure 3.

I thank the Committee, once again, for the opportunity to contribute to its inquiry into Indigenous employment and would be pleased to provide any further information that the Committee might require.

Yours sincerely

Ian Thompson  
Executive Manager  
Rural Policy and Innovation  
3 March 2006

Enc

\* Source: FarmBis database

- The FarmBis database provides a profile of training activities and participation as only full records with all required fields, including course review details, are transferred to the Australian Government from the States. The database is also not linked to the acquittal or payment process.
- These figures are for the second FarmBis programme which ran from 1 July 2001 until 31 December 2004.

To date the Department of Agriculture Fisheries and Forestry (DAFF) has concentrated its initial work on implementing the National Indigenous Forestry Strategy (NIFS) in Tasmania, Western Victoria, South-West Western Australia, Queensland and ACT. The Department is continuing to work with Commonwealth and State agencies and the forest industry on a complementary approach and has been working with primarily Indigenous groups to develop business opportunities generally in plantation and harvesting projects. The following list represents a sample of projects that have begun under the NIFS since its launch in July 2005.

1. Engagement of an Indigenous Employment Office under a negotiated agreement between the Australian Government and the National Association of Forest Industries (NAFI) to increase Indigenous employment within the member companies of NAFI and thereby, the forestry industry.
2. A joint National Memorandum of Understanding is currently being drafted between the Australian Government and peak forest industry bodies such as NAFI, Australian Forest Growers and the Australian Plantation Products and Paper Industry Council. The purpose of the Memorandum of Understanding is to provide a mechanism to develop a sustained commitment to Indigenous employment and economic development by the agencies involved, as well as providing a clear framework to engage relevant sectors of the forest industry and community more generally.
3. The Department has partnered with other Commonwealth and Tasmanian State agencies, local government and the Circular Head Aboriginal Corporation under a Shared Responsibility Agreement to fund a joint project in Smithton. The project involves Community Development Employment Project participants and schoolchildren from the local school and, in part, is aimed at local environmental revegetation to ensure survival of the natural habitat of the Tasmanian giant freshwater crayfish (*Astacopsis gouldi*).
4. The Department is now involved in a joint working group with the Woorabinda Aboriginal Community Council in Central Queensland that includes amongst its members Office of Indigenous Policy Coordination (OIPC), Anglo Coal and Department of Employment and Workplace Relations. The focus of the working group is to develop employment and business opportunities at Woorabinda in forest plantation, nursery, sawmilling and furniture making. The work of the group is underpinned by a Shared Responsibility Agreement between the Woorabinda Council, Anglo Coal and the Australian Government represented by the OIPC and the Rockhampton Indigenous Coordinating Centre.
5. OIPC and the Department are jointly funding a consultancy to examine the feasibility of establishing an Indigenous Forestry Training Centre at Palm Creek near Miriam Vale in Central Queensland. The Training Centre is part of a proposal from Gidarjil Land Development Corporation which has the potential to provide training for Indigenous people in the forest industry in plantation services to meet the needs of the industry in south east and central Queensland.

Indulkana TAFE will also assist with supervision and training as this TAFE offers a 'Land Management' subject. Children from Indulkana school will also participate in the planting of trees and possibly with other aspects such as seed collection. Seed will be collected locally (by AP Land Management staff, Indulkana TAFE students and community CDEP workers) and propagated in the AP Land Management Nursery (except for direct seeding species).   |           |           |           | 10,100    |           |           | 10,100  |

The area covers one tenth of South Australia and includes the Central Ranges and Great Victoria Desert Biogeographic regions. There is currently no seedbank that the AP Lands can use to access local seed for revegetation purposes. The seedbank will work in conjunction with an existing nursery at Umuwa and will be run by the nursery manager. Seed will be collected by the AP Land Management team and by AP Community Development Employment Program (CDEP) workers. Traditional Owners will be used to locate rare plants across the AP Lands.   |           |           |           | 9,500     |           |           | 9,500   |

| 38614   | Anangu Pitjantjatjara Land Management | SA    | EBC        | Envirofund - Bushcare  | Project Management Skills Training in Anangu Pitjantjatjara Land Management  | This project will facilitate training of Anangu in the area of project management, including budget management, developing funding applications and reporting. This will be achieved by training in the office with the support staff and the Anangu trained given sole responsibility (under supervision) for an entire biodiversity/conservation/sustainable resource management project from start to finish over the duration of this project. The training will be undertaken by Land Management staff working on various projects, such as Indigenous Protected Areas, Continuation of Traditional Land Management practices, mostly funded by NHT. Trainees will be employed part time on the Indigenous Protected Areas Program, and this will make it a full time position. This is NHT funded and thus will not be used as in kind contribution. | 12,727    |           |           |           |           | 12,727 |
| 38620   | Anangu Pitjantjatjara Land Management | SA    | EBC        | Envirofund - Bushcare  | Installation and Support of the Protected Area Management System on the Anangu Pitjantjatjara Lands                  | The project will adapt the Protected Area Management System developed by National Parks and Wildlife South Australia to meet the specific needs of Anangu Pitjantjatjara Land Management (including Pitjantjatjara translations). It will set up a Protected Area Management System work station in the regional office, and train 2 to 6 staff in the use of the system and provide ongoing help desk support.  | 27,682    |           |           |           |           | 27,682 |
| 38628   | Anangu Pitjantjatjara Land Management | SA    | EBC        | Envirofund - Bushcare  | AP Lands Fire Management Strategy  | This project has been conceived as a key element in the long term strategic management of the Anangu Pitjantjatjara Lands. The project will utilise traditional ecological knowledge, current 'scientific' knowledge, anthropological expertise and land systems data to develop a coherent and strategic plan for fire management. The Plan will take into account the needs and aspirations of indigenous land owners, protect key ecological resources, identify the types of burning required for habitat promotion, the legal requirements of the bushfire council, and the need to define a 'best practice' approach which can form the basis of current actions and future training in fire management.   | 27,682    |           |           |           |           | 27,682 |
| 38631   | Anangu Pitjantjatjara Land Management | SA    | EBC        | Envirofund - Bushcare  | Anangu Pitjantjatjara Fire Management Plan Field Consultation: Kalka, Pipalyatjara, Murputja, Amata, Nyapari, Tjurma | This project will bring senior traditional owners together with younger people and ecologists and Anangu Pitjantjatjara Land Management support officers to facilitate the intergenerational transfer of knowledge concerning patch burning and to develop an appropriate fire management strategy for the Anangu Pitjantjatjara Lands.  | 27,670    |           |           |           |           | 27,670 |
| 45747   | Yalata Community Inc.                 | SA    | EBC        | Envirofund - Bushcare  | Greenhouse and Nursery Development   | This project will provide infrastructure and irrigation for a greenhouse and hardening off areas totalling 400m2. The nursery will produce an initial 6000 seedlings for dust control, effluent woodlot, revegetation and beautification.  |           | 23,918    |           |           |           | 23918  |
| 51397   | Nepabunna Community Incorporated      | SA    | EBC        | Envirofund - Bushcare  | Habitat Enhancement of Nantawarrina IPA Water Points   | This project will provide the basis for the expansion of the revegetation of Nantawarrina by developing three revegetated sites. Once established seeds from these areas can be harvested for further plantings and will aid in the restoration of the Nantawarrina ecosystem.   |           |           | 45,455    |           |           | 45455  |

Collectively these projects are the AP Lands Community Ranger Program. Senior men or women are employed on a contract basis to plan, organise and effect various traditional and contemporary land management works in consultation with traditional owners, and to supervise on the job training for land management trainees.   |                | 204,900        | 165,250        | 120,600       |           | 490,750        |
| 28695                                     | Yalata Community Inc.      | SA    | NLP        | National Landcare Program | Managing Biodiversity Conservation of Yalata Indigenous Protected Area | The primary purpose of this project is to manage threats posed to conservation values of the Yalata Indigenous Protected Area. For the purposes of this project, the Yalata IPA has been divided into 2 sections (separated by the Eyre Highway). It is envisaged that the project will occur over two phases, the southern section to be completed in 00/01 and the northern component in the following year. Management actions will include; public access controls; remedial works on dune vegetation; closure, ripping and revegetation of tracks; protection of natural / cultural sites of significance; protection of remnant vegetation; interpretive signage and information dissemination for the public and Yalata Community; ranger patrols and training for Yalata Community.   |                |                |                | 50,000        |           | 50,000         |
| 24251                                     | Ngaanyatjarra Land Council | WA    | NLP        | National Landcare Program | Ngaanyatjarra Regional Groundwater Resource Management Database        | The Ngaanyatjarra lands comprise some 250 000km2 (3% of mainland Australia), country far from and free of many modern developments and disturbance. The 1,600 Traditional Owners enjoy a continuous association with their country, but sustainable development of their 11 communities is dependant on continued access to an adequate, safe water supply. Through a commissioned study, Ngaanyatjarra Council has identified the urgent need for an assessment of the areas water resources, and a staged model has been developed to achieve this. This project will collate all existing bore and monitoring data into a specialised regional water database to enable hydrogeological analysis: the required starting point for a full assessment of the Ngaanyatjarra Lands water resource. This will be progressed subsequent to this project through a partnership agreement with state and federal agencies. |                |                |                | 44,600        |           | 44,600         |

**This query response has the following conditions:**

- Only projects which are from the NLP program are included.
- Commercial in Confidence projects are NOT shown.
- Unless otherwise stated, only approved projects and funds are shown.
- Projects which have been Terminated, Withdrawn or Denied after being approved are NOT included.
- Only projects approved from 1996/1997 onwards are included.
- Projects with one of the listed Organisations in the "Org IDs" sheet.

**This data has been edited to remove projects which do not fit the search criteria.**

- \* Projects not related to IPAs - this includes projects that relate only to IPA development projects (as opposed to the declared IPAs).
- \* Projects that started before the Ida was declared.
- \* These results do not include any IPA project funding (as this was not what was sought).
- \* No data from regional NORM processes.

For the purposes of this project, the Yalata IPA has been divided into 2 sections (separated by the Eyre Highway). It is envisaged that the project will occur over two phases, the southern section to be completed in 2000/01 and the northern component in the following year. Management actions will include: public access controls; remedial works on dune vegetation; closure, ripping and revegetation of tracks; protection of natural / cultural sites of significance; protection of remnant vegetation; interpretive signage and information dissemination for the public and Yalata Community; ranger patrols and training for the Yalata Community. |           |           |           |           | 80,000    |           | 80,000  |

Envirofund in 2002 allowed for initial stabilisation works to be completed, however the scope of the original project was underestimated, and to avoid causing more harm than good, the project was sectioned into 4 stages.  |           |           | 26,818    |           |           | 26818   |
| 46220   | Dhimurru Land Management Aboriginal Corporation | NT    | RBC        | NHT Extension Regional - Bushcare | Crazy Ant management and eradication in north north eastern Arnhem Land                                | The Northeast Arnhem Land Crazy Ant Management Group (NEALCAMP) will implement a crazy ant eradication program across north eastern Arnhem Land, before this pest spreads across northern Australia. The project acts upon recommendations of a scoping study completed in 2002, which concluded that eradication of this ant was feasible. The NEALCAMP comprises of local Yolngu and scientific personnel with academic and practical skills in extensive ant control programs. Within the first year, a survey will be completed that detects remaining incursions of crazy ants, and all infestations will be treated with a highly specific poison under a Permit all ready approved by the Australian Pesticides & Veterinary Medicines Authority (APVMA). It is anticipated that eradication levels of up to 90% can be achieved in the initial treatment. Concurrent with the monitoring of eradication success, non-target impacts will be quantified in accordance with regulations of the APVMA. In the subsequent year, the monitoring of eradication success will continue, and re-treatment of satellite infestations will be conducted where required until all incursions are eradicated. |           | 200,000   |           |           |           | 200000  |
| 49580   | Dhimurru Land Management Aboriginal Corporation | NT    | RBC        | NHT Extension Regional - Bushcare | Crazy Ant Management & Eradication   | Implement a Crazy Ant eradication program across north-eastern Arnhem Land.   |           |           | 171,100   | 464,750   | 401,650   | 1037500 |
