Subject: Sub 024: plain packaging

Submission No. 24
(Plain Packaging Bill)
A.O.C. Date: 25/07/2011

To whom it may concern,

This is one of the most ridiculous idea's I have heard.

I believe that this will add more confusion to the packer, sender, checker, displayer, seller etc.

How on earth will this make people who smoke stop smoking?

It's a waste of time and money.

There are so many other REAL problems in Australia. Why not focus on them? such as power increases (our electricity prices will double in price as S.A Gov are pulling our remote subsidy not fair) infrastructure, water shortage, jobs, the list goes on.

Wake up Australia and do something PROductive.

It seems as though we are turning into a "you are free to do as we tell you country" to many rules and regulations are driving people mad, especially business owners.

We just want to run a profitable business and get on with life with the least hassle as possible. This is not jail why should we suffer? so come on who comes up with these ideas?

To be honest bureaucracy has lost the plot. Where will this nonsense end?

Yours Truthfully

Peter Pantelis
