To all personnel that this email may concern,

Firstly I would like to thank you Mr Mark Fitt the committee secretariat for sending me this particular email for correcting anything that might not have been said or to agree with what had been said from my behalf to the NDIS hearing that was established at the town hall in Newcastle CBD, and I am terribly sorry for having to run off as I was running extremely late for my youngest sons P&C meeting at my sons school, as I do play a certain role within the school, as I would have loved too have stayed to converse further with all of the senators that was all there for the NDIS, and if I ever have another opportunity like this again, I will converge into a private meeting with all of the senators or the politicians concerned, but when you have only limited amount of time to converge with the senators of parliament with only one day to have your peace of mind said it just made things a bit of a task for me to attend two meetings on the same day that are and were very close to my heart and soul for all Australians, as I do not believe that us as Australians should not target just disability Australians alone and this is why that I have conveyed my concerns during the hearing on the 5th of May 2014, as I would have loved to have a private session with the body or group concerned amongst our ministers wether on a federal or state or territory issues concerning the NDIS and other appropriate means to address my concerns for the system on a whole and for all of our families wether disability or not as we need to bring this great nation of ours well into the 21st century and get rid of all of these boys homes, girls homes, foster care agency groups, adoption agency groups, boarding schools, family courts, children's courts or anything that takes down other peoples families as this is just not on all for the sake of **MONEY**, as money is only a resource to be placed with infrastructure, as people heal people, as for money it will never ever save your life nor for that of your loved ones, and in place of all of the welfare body groups and things that have been up since the days of Adam and Eve, now the welfare system has had a learning curve for around 200 years since that Australia was first discovered through white settlement, now it is not no learning curve for the past 100 years or what ever that what these welfare agencies and bodies are doing and this is inclusive of all of our church groups within Australia as well as everything that is out there needs to be squashed and a brand new system thought of to help all of our Australian Families and not just aimed at disabilities as this is nothing new because disability people have been around since the days of Adam and Eve, now what I would like to see **FOR ALL AUSTRALIANS AND THERE FAMILIES**, because I see that 23,000,000 million Australian families and there children as my very own and Multi Functional Family Centres should have been deployed way back from the Adam and Eve era, to accommodate wether a person or child has a disability or wether that you have a runaway child, or even a child that has been severly abused or even some other family member that would like a home away from home, as even the aged care would be happy as well to see such wonderful young families coming and going from out of these Multi Functional Family Centres, as these centres would be like skies the limit for what that we could do with them and they should be built like first class hotel/motel accommodation

standards and designed on an international class to be able to accommodate for all Australian Families and the reason why that I had picked private and public hospital grounds for so that all essential services would be implemented within on the same grounds as these Multi Functional Family Centres as within them there would be full blown commercial chef kitchens, games rooms, conference rooms, accommodation upon where that a either an immediate family member or an extended or distant family member can acquire accommodation like a home away from home, as there would not be no need for any kind of respite services as these centres would be there and built to accommodate for all families of needs, and Metaphysicians would be born into them as well as child care staff and family orientated people to help run these centres as they would provide full time employment and create jobs across the board as these centres would be an infinity establishment, as there would be no limit on what could be done with them, as security would be at hand and they would run 24/7, because our private and public hospitals run 24/7 so these centres can stay open as well, because you never know when someone's family member might be in need of assistance and to help run them as well we could have fast food chains as well running out of these family centres as well like Macdonald's express outlets or KFC outlets as these multi national business's could contribute to help aid running of these family centres as well and of course they will have to be means tested so that every Australian Family contributes something towards the running costs of these wonderful family centres, and as I had stated before put all of the funding from all of these welfare agency groups and bodies and inclusive of all of these church groups throughout Australia and inclusive of the NDIS and send planning people around as well as top architects to get these wonderful family centres established and get rid of these family courts and children's courts because Metaphysicians of which are not born yet into today's society, like they are out there but not yet employed in any given capacity and if they are well then they are not recognised on a national level as these people understand the true needs of Australia's most vulnerable as well as different peoples personality traits, as four jobs will fall in place of them and they are Psychiatrists, Psychologists, councillors and social workers, as a Metaphysician will take over these four rolls into one and would be a very great asset by running these family centres for families, and I mean this the whole system on how we know it of today has to go by the way side and open up for progress and to train people appropriately, so that the correct services are out there to keep families together without ripping families apart because a piece of paper with ink, letters, words and apostrophes says so, we must move forward and not backwards, and these Multi Functional Family Centres will give families a much better ray of hope as these family centres will also wipe out DOCS or FACS as they will no longer be required for the future as these agencies belong to welfare groups and they must go before more families are taken apart through these kind of organisations, as there is no such thing in my eyes as an abusive parent just lack of extended and distant family support for these mothers or fathers of those immediate families and also a lack of knowledge and understanding from people of the public in general for the reasons why that this particular parent was abusive and not because of drugs as use must understand why that certain parents do fall by the sword, like a women for instance might have three children and her husband just walks out on her or her partner might have passed away

and she is finding it difficult to cope as she might not have any descent family support behind her for instance as there could be a very number of reasons why, as use must look hard and deep enough even why that some parents might turn to drugs for what ever reason as Metaphysicians can fix these issues with the right appropriate backing behind them, so please think about why that these situations do occur, not because a parent is weak or just can't handle the given situation, either he or she just needs a bit of support or assistance as this is all and nothing more because parents just can not go anywhere near DOCS or FACS, without the fear of losing there children to thee States or territory governments only assistance is required and these Multi Functional Family Centres would provide such assistance and without the fear of a parent by having to relinquish care of there beloved ones as the whole idea is by keeping families together and not separating them and dragging families through family courts and children's courts for god sake wake up Australia, and last but not least I thankyou Carol Stewart by being part of this NDIS social group as well, but as Australians we must look at things in much more greater depths than what has to be succumbed to Australians over the last 200 years or since the very first settlement had beckoned Australians. And by placing funding in the hands of all of these welfare organisations just gives DOCS or FACS a lot more powers and money to take families down and this is not and should be not the Australian way as a democracy, bye for now and take care. and please add this to my other comments that I have made at the hearing, because I can not proof read of what that I had stated because your website that use had sent to me in the email on that was highlighted it would not allow me to access this information, well bye for now and take care and god bless to ALL.

yours Truly,
Mr Maxwell Roy Brazel
