- (1) the Government’s economic mismanagement and high inflation has resulted in escalating student debt for some three million Australians with a HELP (Higher Education Loan Program) loan;
- (2) the proposal to change HELP indexation to the lower of the wage price index or the consumer price index would still result in student debts increasing by 11.1 per cent since June 2022, with no date by which student debt credits will be applied or refunds paid;
- (3) whether it is student debt, housing or paying bills, Australians continue to suffer acute cost of living pain under this Government;

- (4) the Government has failed to detail eligibility criteria for the Commonwealth Prac Payments or how students will receive those payments, noting that students studying in other areas of workforce shortage such as occupational therapy, psychology and veterinary studies have been excluded from the scheme;
- (5) the Government's decision to mandate 40 per cent of the Student Services and Amenities Fee revenue be directed to student-led organisations, including student unions, associations and guilds, lacks any transparency measures to ensure money is spent on services which support student welfare; and
- (6) the bill has been referred to the Senate Education and Employment Legislation Committee for inquiry to report by 3 October 2024".

 - (b) the Government's Future Made in Australia policy has been criticised by many eminent economists including the Productivity Commission's Danielle Wood, former Productivity Commissioner Gary Banks, Australian National University visiting fellow Steven Hamilton, and University of New South Wales' Professor Richard Holden; and
 - (c) this policy does not make up for the Government's failures on economic management that are driving up the costs of manufacturing and have caused a tripling of manufacturing insolvencies since June 2022; and
- (2) calls on the Government to get Australia's economy back on track and back to basics by fighting inflation and reducing wasteful spending, reducing complexity and red tape for business, supporting affordable, reliable energy, and delivering lower, simpler, fairer taxes"—

And on the amendment moved thereto by Dr Haines, viz.—That all words after "House" be omitted with a view to substituting the following words:

"whilst not declining to give the bill a second reading:

 - (a) the 2024-25 Budget allocated \$22.7 billion in taxpayer funds to the Future Made in Australia program;
 - (b) this is the second largest Budget measure announced in this term of Parliament; and
 - (c) concerns have been raised by the Productivity Commission, the Grattan Institute, the Climate Council of Australia, BP Australia, and the Australian Chamber of Commerce and Industry that the bill contains inadequate transparency measures to ensure Australians know how their money is being spent on Future Made in Australia supports;

19 MATTER OF PRIVILEGE RAISED BY THE MANAGER OF OPPOSITION BUSINESS—STATEMENT BY SPEAKER

The Speaker made the following statement:

On Monday, the Manager of Opposition Business raised as a matter of privilege whether the Prime Minister had deliberately misled the House such as would constitute a contempt of the House.

The claim arises from the Prime Minister's response to a question from the Leader of the Opposition during question time last Thursday, 15 August, in which the Prime Minister referred to statements of the ASIO Director-General.

Deliberately misleading the House is one of the matters that can be found to be a contempt. A claim of deliberately misleading is a very serious one, and rightly there should be prima facie evidence that the House has been misled and that the misleading has been deliberate. In addition, to amount to a contempt, the action would need to amount to, or be intended or likely to amount to, an improper interference with the free exercise by the House of its functions.

Although different in its particulars, this complaint has elements in common with other claims that have been made that a Member has deliberately misled the House.

I have examined the Hansard of the relevant period of last Thursday's question time. The essence of the relevant exchanges at that time, was that the Leader of the Opposition said the Prime Minister had misquoted the ASIO Director-General, and the Prime Minister said he read out three different quotes of the Director-General.

The Speaker's role in this matter is to determine whether priority over other business should be given to a motion for referral of a matter to the Committee of Privileges and Members' Interests. In order to grant precedence in such a matter, the Speaker would need to see evidence that a Member misled the House, and that they did so intentionally.

On the evidence available to me, it is not clear that a prima facie case has been made out such as would cause me to give precedence to a motion to refer the matter to the committee.

20 SUSPENSION OF STANDING AND SESSIONAL ORDERS MOVED

Mr Fletcher moved—That so much of the standing and sessional orders be suspended as would prevent the Manager of Opposition Business from moving the following motion forthwith—That the following matter be referred to the Committee of Privileges and Members' Interests:

Whether in misquoting the Director-General of ASIO while answering a question without notice from the Leader of the Opposition on 15 August 2024, the Prime Minister had deliberately misled the House, such as would constitute a contempt of the House.

Debate ensued.

“the House declines to give the bill a second reading, and:

- (1) notes:
 - (a) the failure of billions of dollars of the Government’s Future Made in Australia spending to meet the standards and processes laid out in this bill and the significant integrity concerns around these investments;
 - (b) the Government’s Future Made in Australia policy has been criticised by many eminent economists including the Productivity Commission’s Danielle Wood, former Productivity Commissioner Gary Banks, Australian National University visiting fellow Steven Hamilton, and University of New South Wales’ Professor Richard Holden; and
 - (c) this policy does not make up for the Government’s failures on economic management that are driving up the costs of manufacturing and have caused a tripling of manufacturing insolvencies since June 2022; and
- (2) calls on the Government to get Australia’s economy back on track and back to basics by fighting inflation and reducing wasteful spending, reducing complexity and red tape for business, supporting affordable, reliable energy, and delivering lower, simpler, fairer taxes”—

 - (b) this is the second largest Budget measure announced in this term of Parliament; and
 - (c) concerns have been raised by the Productivity Commission, the Grattan Institute, the Climate Council of Australia, BP Australia, and the Australian Chamber of Commerce and Industry that the bill contains inadequate transparency measures to ensure Australians know how their money is being spent on Future Made in Australia supports;
- (2) recognises that the Member for Indi’s Accountability of Grants, Investment Mandates and Use of Public Resources Amendment (End Pork Barrelling) Bill 2024 provides the necessary framework to help ensure the Government’s spending of taxpayer money to deliver the Future Made in Australia plan is transparent and fair; and
- (3) calls on the Government to support the Accountability of Grants, Investment Mandates and Use of Public Resources Amendment (End Pork Barrelling) Bill 2024”—

And on the amendment moved thereto by Dr M Ryan, viz.—That all words after “reading” be omitted with a view to substituting the following words:

- (1) the Future Made in Australia national interest framework should be configured as the foundational reference for Australia’s industry policy;
- (2) a robust governance structure for the framework must be ensured;
- (3) clear criteria for national funding in the national interest should be established; and
- (4) there should be periodic, independent reviews to ensure that industry policy remains effective and relevant”—

16 UNIVERSITIES ACCORD (STUDENT SUPPORT AND OTHER MEASURES) BILL 2024

The order of the day having been read for the resumption of the debate on the question—That the bill be now read a second time—*And on the amendment moved thereto by Mr Fletcher, viz.*—That all words after “That” be omitted with a view to substituting the following words:

“whilst not declining to give the bill a second reading, the House notes that:

- (1) the Government’s economic mismanagement and high inflation has resulted in escalating student debt for some three million Australians with a HELP (Higher Education Loan Program) loan;

- (2) the proposal to change HELP indexation to the lower of the wage price index or the consumer price index would still result in student debts increasing by 11.1 per cent since June 2022, with no date by which student debt credits will be applied or refunds paid;
- (3) whether it is student debt, housing or paying bills, Australians continue to suffer acute cost of living pain under this Government;
- (4) the Government has failed to detail eligibility criteria for the Commonwealth Prac Payments or how students will receive those payments, noting that students studying in other areas of workforce shortage such as occupational therapy, psychology and veterinary studies have been excluded from the scheme;
- (5) the Government's decision to mandate 40 per cent of the Student Services and Amenities Fee revenue be directed to student-led organisations, including student unions, associations and guilds, lacks any transparency measures to ensure money is spent on services which support student welfare; and
- (6) the bill has been referred to the Senate Education and Employment Legislation Committee for inquiry to report by 3 October 2024"—

Debate resumed.

Mr Bates moved, as an amendment to the amendment proposed by Mr Fletcher—That all words after “reading” be omitted with a view to substituting the following words:

“the House:

- (1) notes that:
 - (a) students are being shackled by a lifetime of debt which is making the cost of living crisis worse, locking people out of the housing market, causing people to delay having families and crushing dreams of going to university;
 - (b) the Government's plan to provide student debt relief will still see student debts rise by 11.5 per cent in their first term and arts degrees costing over \$50,000;
 - (c) the student debt system cannot be fixed because student debt should not exist and higher education, like education at every level, is an essential public good that should be free, universal and provided by the government;
 - (d) mandatory unpaid placements are causing students to forego paid work, choose between groceries, rent and medicine, drop out of universities and are taking an immense toll on students' health; and
 - (e) students experiencing placement poverty need urgent relief and should be paid for every hour of work they are required to do as part of their degree, at least at minimum wage, not a lesser supplementary amount; and
- (2) calls on the Government to wipe all student debt, make university and TAFE free, and pay all students doing mandatory placements at no less than minimum wage rates”.

Debate ensued.

19 MESSAGE FROM THE SENATE

Message No. 351, 9 September 2024, from the Senate was reported returning the Illegal Logging Prohibition Amendment (Strengthening Measures to Prevent Illegal Timber Trade) Bill 2024 without amendment.

20 UNIVERSITIES ACCORD (STUDENT SUPPORT AND OTHER MEASURES) BILL 2024

The order of the day having been read for the resumption of the debate on the question—That the bill be now read a second time—*And on the amendment moved thereto by Mr Fletcher, viz.*—That all words after “That” be omitted with a view to substituting the following words:

“whilst not declining to give the bill a second reading, the House notes that:

- (1) the Government’s economic mismanagement and high inflation has resulted in escalating student debt for some three million Australians with a HELP (Higher Education Loan Program) loan;
- (2) the proposal to change HELP indexation to the lower of the wage price index or the consumer price index would still result in student debts increasing by 11.1 per cent since June 2022, with no date by which student debt credits will be applied or refunds paid;
- (3) whether it is student debt, housing or paying bills, Australians continue to suffer acute cost of living pain under this Government;
- (4) the Government has failed to detail eligibility criteria for the Commonwealth Prac Payments or how students will receive those payments, noting that students studying in other areas of workforce shortage such as occupational therapy, psychology and veterinary studies have been excluded from the scheme;
- (5) the Government’s decision to mandate 40 per cent of the Student Services and Amenities Fee revenue be directed to student-led organisations, including student unions, associations and guilds, lacks any transparency measures to ensure money is spent on services which support student welfare; and
- (6) the bill has been referred to the Senate Education and Employment Legislation Committee for inquiry to report by 3 October 2024”—

And on the amendment moved thereto by Mr Bates, viz.—That all words after “reading” be omitted with a view to substituting the following words:

“the House:

- (1) notes that:
 - (a) students are being shackled by a lifetime of debt which is making the cost of living crisis worse, locking people out of the housing market, causing people to delay having families and crushing dreams of going to university;
 - (b) the Government’s plan to provide student debt relief will still see student debts rise by 11.5 per cent in their first term and arts degrees costing over \$50,000;
 - (c) the student debt system cannot be fixed because student debt should not exist and higher education, like education at every level, is an essential public good that should be free, universal and provided by the government;
 - (d) mandatory unpaid placements are causing students to forego paid work, choose between groceries, rent and medicine, drop out of universities and are taking an immense toll on students’ health; and
 - (e) students experiencing placement poverty need urgent relief and should be paid for every hour of work they are required to do as part of their degree, at least at minimum wage, not a lesser supplementary amount; and
- (2) calls on the Government to wipe all student debt, make university and TAFE free, and pay all students doing mandatory placements at no less than minimum wage rates”—

Debate resumed.

Ms Daniel moved, as an amendment to the amendment proposed by Mr Bates—That all words after “House” be omitted with a view to substituting the following words:

“(1) notes that:

- (a) many degrees have increased in cost well above CPI, resulting in punitive HELP debts placing additional financial burden on Australians in the midst of a cost of living crisis;
- (b) in 2023, soaring inflation resulted in a HELP indexation rate of 7.1 per cent;
- (c) the indexation of HELP debt prior to repayment each financial year unnecessarily increases the cost of debt repayments for graduates and young Australians; and

- (d) HELP debt is considered by banks in assessing eligibility for mortgages and loans, creating additional barriers for graduates and young families as they try to buy a home; and
- (2) calls on the Government to calculate HELP debt indexation after the due date for individual tax returns each year”.

Debate ensued.

Mr Chandler-Mather addressing the House—

21 ADJOURNMENT

It being 7.30 pm—The question was proposed—That the House do now adjourn.

Debate ensued.

The House continuing to sit until 8 pm—The Speaker adjourned the House until 12 noon tomorrow.

3 MINING PROFITS

Mr Bates, pursuant to notice, moved—That this House:

(1) notes that:

- (a) for decades, mining companies have been making excessive profits that should have been taxed in order to put dental and mental health into Medicare, build affordable homes and fund the rapid transition away from coal and gas; and
- (b) in Queensland, big mining companies have exported \$634 billion of our resources but only paid nine per cent of that in royalties over the past 10 years; and

(2) calls on the Government to rein in the excessive profits of mining corporations.

Debate ensued.

Debate adjourned and the resumption of the debate made an order of the day for the next sitting.

5 ROAD SAFETY

Mr L O'Brien, pursuant to notice, moved—That this House:

(1) notes that:

- (a) analysis of Australian Road Assessment Program data by the Royal Automobile Club of Queensland (RACQ) has found that motorists travelling on the national highway between Gympie and Cairns are five times more likely to be injured or killed in a crash than people driving on the national highway between Sydney and Melbourne;
- (b) the RACQ has found that 1,398 kilometres of the national highway between Gympie and Cairns is undivided and much of this section is rated just two stars out of five for safety; and
- (c) the Government's funding cut to upgrades of the national highway from 80 per cent to 50 per cent of project costs will:
 - (i) delay or cease future upgrades to the national highway;
 - (ii) put motorists' lives at risk;
 - (iii) leave communities disconnected when the national highway floods; and

- (iv) constrain economic growth and regional development by failing to properly fund upgrades to increase the capacity of the national highway and make it more efficient; and
- (2) calls on the Government to:
 - (a) restore the former Government's 80 per cent funding share of projects to upgrade the national highway to expedite projects that will make it safer, increase capacity, and make it less prone to flooding; and
 - (b) work with the Queensland Government to prioritise and fast track projects to make the national highway from Gympie to Cairns as safe as it is between Sydney and Melbourne.

 - (a) advocating for the wages of Australia's low paid in three consecutive submissions to the Annual Wage Review that the real wages of low paid workers not go backwards;
 - (b) supporting pay rises for aged care workers of up to 28 per cent through submissions to the Fair Work Commission's Aged Care Work Value Case;

The order of the day having been read for the resumption of the debate on the question—That the bill be now read a second time—*And on the amendment moved thereto by Mr Fletcher, viz.—That all words after "That" be omitted with a view to substituting the following words:*

"whilst not declining to give the bill a second reading, the House notes that:

- (1) the Government's economic mismanagement and high inflation has resulted in escalating student debt for some three million Australians with a HELP (Higher Education Loan Program) loan;
- (2) the proposal to change HELP indexation to the lower of the wage price index or the consumer price index would still result in student debts increasing by 11.1 per cent since June 2022, with no date by which student debt credits will be applied or refunds paid;
- (3) whether it is student debt, housing or paying bills, Australians continue to suffer acute cost of living pain under this Government;
- (4) the Government has failed to detail eligibility criteria for the Commonwealth Prac Payments or how students will receive those payments, noting that students studying in other areas of workforce shortage such as occupational therapy, psychology and veterinary studies have been excluded from the scheme;

- (5) the Government’s decision to mandate 40 per cent of the Student Services and Amenities Fee revenue be directed to student-led organisations, including student unions, associations and guilds, lacks any transparency measures to ensure money is spent on services which support student welfare; and
- (6) the bill has been referred to the Senate Education and Employment Legislation Committee for inquiry to report by 3 October 2024”—

And on the amendment moved thereto by Mr Bates, viz.—That all words after “reading” be omitted with a view to substituting the following words:

“the House:

- (1) notes that:
 - (a) students are being shackled by a lifetime of debt which is making the cost of living crisis worse, locking people out of the housing market, causing people to delay having families and crushing dreams of going to university;
 - (b) the Government’s plan to provide student debt relief will still see student debts rise by 11.5 per cent in their first term and arts degrees costing over \$50,000;
 - (c) the student debt system cannot be fixed because student debt should not exist and higher education, like education at every level, is an essential public good that should be free, universal and provided by the government;
 - (d) mandatory unpaid placements are causing students to forego paid work, choose between groceries, rent and medicine, drop out of universities and are taking an immense toll on students’ health; and
 - (e) students experiencing placement poverty need urgent relief and should be paid for every hour of work they are required to do as part of their degree, at least at minimum wage, not a lesser supplementary amount; and
- (2) calls on the Government to wipe all student debt, make university and TAFE free, and pay all students doing mandatory placements at no less than minimum wage rates”—

And on the amendment moved thereto by Ms Daniel, viz.—That all words after “House” be omitted with a view to substituting the following words:

- “(1) notes that:
 - (a) many degrees have increased in cost well above CPI, resulting in punitive HELP debts placing additional financial burden on Australians in the midst of a cost of living crisis;
 - (b) in 2023, soaring inflation resulted in a HELP indexation rate of 7.1 per cent;
 - (c) the indexation of HELP debt prior to repayment each financial year unnecessarily increases the cost of debt repayments for graduates and young Australians; and
 - (d) HELP debt is considered by banks in assessing eligibility for mortgages and loans, creating additional barriers for graduates and young families as they try to buy a home; and
- (2) calls on the Government to calculate HELP debt indexation after the due date for individual tax returns each year”—

Debate resumed.

20 UNIVERSITIES ACCORD (STUDENT SUPPORT AND OTHER MEASURES) BILL 2024

The order of the day having been read for the resumption of the debate on the question—That the bill be now read a second time—*And on the amendment moved thereto by Mr Fletcher, viz.—That all words after “That” be omitted with a view to substituting the following words:*

“whilst not declining to give the bill a second reading, the House notes that:

- (1) the Government’s economic mismanagement and high inflation has resulted in escalating student debt for some three million Australians with a HELP (Higher Education Loan Program) loan;
- (2) the proposal to change HELP indexation to the lower of the wage price index or the consumer price index would still result in student debts increasing by 11.1 per cent since June 2022, with no date by which student debt credits will be applied or refunds paid;
- (3) whether it is student debt, housing or paying bills, Australians continue to suffer acute cost of living pain under this Government;
- (4) the Government has failed to detail eligibility criteria for the Commonwealth Prac Payments or how students will receive those payments, noting that students studying in other areas of workforce shortage such as occupational therapy, psychology and veterinary studies have been excluded from the scheme;
- (5) the Government’s decision to mandate 40 per cent of the Student Services and Amenities Fee revenue be directed to student-led organisations, including student unions, associations and guilds, lacks any transparency measures to ensure money is spent on services which support student welfare; and
- (6) the bill has been referred to the Senate Education and Employment Legislation Committee for inquiry to report by 3 October 2024”—

And on the amendment moved thereto by Mr Bates, viz.—That all words after “reading” be omitted with a view to substituting the following words:

“the House:

- (1) notes that:
 - (a) students are being shackled by a lifetime of debt which is making the cost of living crisis worse, locking people out of the housing market, causing people to delay having families and crushing dreams of going to university;
 - (b) the Government’s plan to provide student debt relief will still see student debts rise by 11.5 per cent in their first term and arts degrees costing over \$50,000;
 - (c) the student debt system cannot be fixed because student debt should not exist and higher education, like education at every level, is an essential public good that should be free, universal and provided by the government;

- (d) mandatory unpaid placements are causing students to forego paid work, choose between groceries, rent and medicine, drop out of universities and are taking an immense toll on students' health; and
 - (e) students experiencing placement poverty need urgent relief and should be paid for every hour of work they are required to do as part of their degree, at least at minimum wage, not a lesser supplementary amount; and
- (2) calls on the Government to wipe all student debt, make university and TAFE free, and pay all students doing mandatory placements at no less than minimum wage rates”—

And on the amendment moved thereto by Ms Daniel, viz.—That all words after “House” be omitted with a view to substituting the following words:

“(1) notes that:

- (a) many degrees have increased in cost well above CPI, resulting in punitive HELP debts placing additional financial burden on Australians in the midst of a cost of living crisis;
 - (b) in 2023, soaring inflation resulted in a HELP indexation rate of 7.1 per cent;
 - (c) the indexation of HELP debt prior to repayment each financial year unnecessarily increases the cost of debt repayments for graduates and young Australians; and
 - (d) HELP debt is considered by banks in assessing eligibility for mortgages and loans, creating additional barriers for graduates and young families as they try to buy a home; and
- (2) calls on the Government to calculate HELP debt indexation after the due date for individual tax returns each year”—

Debate resumed.

12 SUSPENSION OF STANDING AND SESSIONAL ORDERS MOVED

Mr Dutton (Leader of the Opposition) moved—That so much of the standing and sessional orders be suspended as would prevent the Leader of the Opposition from moving the following motion—That the House:

- (1) unequivocally condemns the attacks on Israel by Hamas and other terrorist organisations that took place one year ago and the vow made by the perpetrators to repeat these attacks indefinitely;
- (2) recognises that these heinous acts of terrorism took place after a long period of quiet at the Israel-Gaza borders and involved the deliberate targeting, murder, rape and mutilation of civilians including women, children and the elderly, Jewish and Arab, as well as the taking of hostages and indiscriminate rocket fire by the terrorists at civilian population centres in Israel to inflict maximum damage;
- (3) calls for the immediate and unconditional release of all remaining hostages;
- (4) condemns the murder of hostages and the inhumane conditions and violence, including sexual violence, that hostages have experienced;
- (5) stands with Israel and affirms its inherent right to defend itself and protect its citizens;
- (6) recognises that Israel shares the same liberal democratic values as Australia and other western nations and affirms that Israel’s battle is a battle fought against the enemies of civilised people everywhere;
- (7) recognises that this entire conflict is between Israel and the Islamic Republic of Iran, and that the Islamic Republic of Iran acts through its proxies, all of whom are committed to the destruction of the State of Israel;
- (8) acknowledges the devastating loss of life and mass displacement of Israelis and Palestinians as a result of the war sparked by Hamas on 7 October 2023;

- (9) condemns antisemitism in all its forms and the jealousies and falsehoods that lie at the foundations of this hateful prejudice;
- (10) pledges to redouble efforts to work with Australia's Jewish community to ensure that the rise in antisemitism in Australian society is properly repudiated and addressed;
- (11) emphasises the importance of mutual respect as individuals go about expressing their diverse views on the conflict in Australia;
- (12) condemns all acts of hatred, division or violence, affirming that they have no place in Australia;
- (13) reiterates the responsibility of each Australian to safeguard the harmony and unity that define our diverse society, especially in times of adversity;
- (14) condemns the actions of those seeking to celebrate and promote the barbarous actions of terrorist organisations;
- (15) reaffirms that symbols of terror and discord are unwelcome in Australia and undermine our nation's peace and security;
- (16) condemns all forms of hate speech and violent extremism, including antisemitism, as repugnant to our shared national values which uphold the freedom and dignity of every Australian; and
- (17) notes that fostering fear and division undermines social cohesion and risks Australia's domestic security.

Mr Clare (Minister for Education) moved—That the debate be adjourned.

29 UNIVERSITIES ACCORD (STUDENT SUPPORT AND OTHER MEASURES) BILL 2024

The order of the day having been read for the resumption of the debate on the question—That the bill be now read a second time—*And on the amendment moved thereto by Mr Fletcher, viz.*—That all words after “That” be omitted with a view to substituting the following words:

“whilst not declining to give the bill a second reading, the House notes that:

- (1) the Government’s economic mismanagement and high inflation has resulted in escalating student debt for some three million Australians with a HELP (Higher Education Loan Program) loan;
- (2) the proposal to change HELP indexation to the lower of the wage price index or the consumer price index would still result in student debts increasing by 11.1 per cent since June 2022, with no date by which student debt credits will be applied or refunds paid;
- (3) whether it is student debt, housing or paying bills, Australians continue to suffer acute cost of living pain under this Government;
- (4) the Government has failed to detail eligibility criteria for the Commonwealth Prac Payments or how students will receive those payments, noting that students studying in other areas of workforce shortage such as occupational therapy, psychology and veterinary studies have been excluded from the scheme;
- (5) the Government’s decision to mandate 40 per cent of the Student Services and Amenities Fee revenue be directed to student-led organisations, including student unions, associations and guilds, lacks any transparency measures to ensure money is spent on services which support student welfare; and
- (6) the bill has been referred to the Senate Education and Employment Legislation Committee for inquiry to report by 3 October 2024”—

And on the amendment moved thereto by Mr Bates, viz.—That all words after “reading” be omitted with a view to substituting the following words:

“the House:

- (1) notes that:
 - (a) students are being shackled by a lifetime of debt which is making the cost of living crisis worse, locking people out of the housing market, causing people to delay having families and crushing dreams of going to university;
 - (b) the Government’s plan to provide student debt relief will still see student debts rise by 11.5 per cent in their first term and arts degrees costing over \$50,000;
 - (c) the student debt system cannot be fixed because student debt should not exist and higher education, like education at every level, is an essential public good that should be free, universal and provided by the government;
 - (d) mandatory unpaid placements are causing students to forego paid work, choose between groceries, rent and medicine, drop out of universities and are taking an immense toll on students’ health; and
 - (e) students experiencing placement poverty need urgent relief and should be paid for every hour of work they are required to do as part of their degree, at least at minimum wage, not a lesser supplementary amount; and
- (2) calls on the Government to wipe all student debt, make university and TAFE free, and pay all students doing mandatory placements at no less than minimum wage rates”—

And on the amendment moved thereto by Ms Daniel, viz.—That all words after “House” be omitted with a view to substituting the following words:

- “(1) notes that:
- (a) many degrees have increased in cost well above CPI, resulting in punitive HELP debts placing additional financial burden on Australians in the midst of a cost of living crisis;
 - (b) in 2023, soaring inflation resulted in a HELP indexation rate of 7.1 per cent;
 - (c) the indexation of HELP debt prior to repayment each financial year unnecessarily increases the cost of debt repayments for graduates and young Australians; and
 - (d) HELP debt is considered by banks in assessing eligibility for mortgages and loans, creating additional barriers for graduates and young families as they try to buy a home; and

- (2) calls on the Government to calculate HELP debt indexation after the due date for individual tax returns each year”—

Debate resumed.

- (2) the bill will place further administrative burden on providers, particularly small and medium providers;

- (3) the bill will put further financial pressure on providers who will have to cover the majority of the on costs, cannot increase their fees and have to pay the wages upfront, whilst receiving reimbursement in arrears;
- (4) the Government has done nothing to address child care deserts and thin markets around the country, and this bill will not increase access for parents who currently have none; and

The order of the day having been read for the resumption of the debate on the question—That the bill be now read a second time—*And on the amendment moved thereto by Ms Bell, viz.—That all words after “That” be omitted with a view to substituting the following words:*

“whilst not declining to give the bill a second reading, the House notes:

- (1) the Government’s economic mismanagement and cost of living crisis has led to higher wage bills, and higher utility, rent and grocery bills for providers;
- (2) the bill will place further administrative burden on providers, particularly small and medium providers;
- (3) the bill will put further financial pressure on providers who will have to cover the majority of the on costs, cannot increase their fees and have to pay the wages upfront, whilst receiving reimbursement in arrears;
- (4) the Government has done nothing to address child care deserts and thin markets around the country, and this bill will not increase access for parents who currently have none; and

11 INFRASTRUCTURE INVESTMENT

Ms Spender, pursuant to notice, moved—That this House:

(1) notes that:

- (a) Australia is currently committed to a 10-year, \$120 billion infrastructure investment pipeline;
- (b) infrastructure investment is important but does compete directly with housing for materials and skills within the construction sector;
- (c) two independent inquiries, namely the Independent Review of the National Partnership Agreement on Land Transport Infrastructure Projects and the Independent Strategic Review of the Infrastructure Investment Program, have been critical of the processes for determining Commonwealth Government infrastructure allocations; and
- (d) Infrastructure Australia noted that in 2019 the construction sector was at capacity and since then infrastructure spending as a share of gross domestic product has increased 50 per cent while construction costs have increased by more than 30 per cent; and

- (2) calls on the Government to:
 - (a) publish a response to the independent reviews;
 - (b) commit to implementing long-term investment strategies and publishing business cases for large-scale infrastructure projects; and
 - (c) identify and pause non-essential infrastructure projects until capacity has returned to the construction sector.

Debate ensued.

The time allotted for the debate having expired, the debate was interrupted, and the resumption of the debate made an order of the day for a later hour this day.

12 SUPERMARKET SECTOR

Mr Rae, pursuant to notice, moved—That this House:

- (1) acknowledges the Government is taking decisive action to help consumers get fairer prices at supermarkets, in stores and online, including:
 - (a) the release of an interim report from the Australian Competition and Consumer Commission (ACCC), which looks at a wide range of concerns, from land banking to shrinkflation;
 - (b) making suppliers follow the Food and Grocery Code of Conduct, a mandatory code, following the recommendations of former competition minister Craig Emerson; and
 - (c) revitalising the National Competition Policy to boost productivity and living standards;
- (2) notes the Government believes that alleged misconduct in the supermarket sector is unfair, unacceptable, and it makes cost of living pressures worse for Australians, so it is:
 - (a) providing a \$30 million package of additional funding for the ACCC to crack down on misleading pricing practices and poor conduct; and
 - (b) funding CHOICE, the consumer organisation, over three years to report on supermarket prices across Australia; and
- (3) recognises the Government's number one priority is tackling the cost of living pressures facing hard working Australians and making sure they are paying a fair price at the checkout, and Australian farmers are getting a fair price for their goods.

Debate ensued.

The time allotted for the debate having expired, the debate was interrupted, and the resumption of the debate made an order of the day for the next sitting.

13 BANKING SECTOR

Mr Hamilton, pursuant to notice, moved—That this House:

- (1) notes that:
 - (a) on 15 November 2023, the Australian Prudential Regulation Authority (APRA) announced it was investigating tighter liquidity and capital requirements for smaller Authorised Deposit-Taking Institutions (ADIs);
 - (b) in making this announcement, APRA did not provide any evidence to justify this change, had failed to consult with industry, provided no evidence to support the change in policy, and did not consider the impacts on competition in the Australian banking sector;
 - (c) the Australian banking sector is subject to considerable prudential regulation and is intelligent in its approach to ensuring the banking sector's resilience to financial market stress;
 - (d) the changes would have required smaller ADIs on the Minimum Liquid Holding (MLH) regime to change their liquidity and capital composition, and revalue liquidity risk over both short and longer periods;
 - (e) on 24 July 2024, APRA announced it would implement two of the three proposed changes;
 - (f) APRA will not proceed with changes to a phase-out of the bank debt securities, pending a holistic review of the MLH regime in 2025, ensuring smaller ADIs can continue to compete;
 - (g) these changes presented a real risk to the smaller banking sector, particularly those ADIs on the MLH regime which would have been subject to tighter liquidity requirements and reduced capital;

- (h) the changes would have resulted in less competition, less access to capital and higher costs for consumers; and
- (i) mutual banks and credit unions play an important role in our economy and communities; and
- (2) acknowledges that:
 - (a) APRA’s proposed requirements will have a significant negative impact on smaller banks;
 - (b) competition in the banking sector is important for the economy, consumers and for strong markets; and
 - (c) unnecessary Government regulation will further erode competition in the banking sector and hinder efforts to bolster Australia’s economic dynamism, particularly at a time when banks are managing 130 new regulatory changes.

The time allotted for private Members’ business having expired, the debate was interrupted, and the resumption of the debate made an order of the day for a later hour this day.

SUPPLEMENT TO VOTES AND PROCEEDINGS

No. 150

FEDERATION CHAMBER

MINUTES OF PROCEEDINGS

MONDAY, 4 NOVEMBER 2024

1 The Federation Chamber met at 10.30 am.

2 MEMBERS' CONSTITUENCY STATEMENTS

Members' constituency statements were made.

3 ANIMAL WELFARE

Mr Wilkie, pursuant to notice, moved—That this House:

(1) notes:

- (a) that Australia has an animal welfare crisis, and that cruelty is commonplace in greyhound and horse racing, live exports, the industrial production of food and fibre, rodeos, and puppy and kitten farms;
- (b) this cruelty has been on full display recently in:
 - (i) intensive commercial dog breeding facilities in Tasmania which operated under grossly inhumane and inadequate conditions, where female dogs were forced to breed at appalling rates;
 - (ii) the treatment of dogs in the greyhound racing industry, which results in unbearable cruelty, injury and even death, for example, in 2024 alone there have been almost 100 on-track deaths and 8,449 injuries Australia-wide; and
 - (iii) overbreeding of retired racehorses, where the aim is to produce as many foals as possible that might one day generate a return on investment and sadly, as in the case of Black Caviar, this is poorly regulated and often involves almost constant pregnancy and birthing for so-called 'retired' horses, dramatically increasing the risks of injury, infection and death; and
- (c) that state and territory governments have not done enough to address this crisis; and

(2) therefore calls on the Government to:

- (a) establish a statutory Independent Office of Animal Welfare which will take a leadership role on animal welfare matters at a federal level, including developing a national animal welfare strategy, conducting inquiries and reviews into the effectiveness and implementation of our animal welfare laws, and providing independent, science-based advice to governments on animal welfare issues; and
- (b) work with states and territories to improve, harmonise and implement strict animal welfare standards, guidelines and laws.

Debate ensued.

The time allotted for the debate having expired, the debate was interrupted, and the resumption of the debate made an order of the day for the next sitting.

4 EDUCATION SYSTEM

Ms Coker, pursuant to notice, moved—That this House acknowledges the Government’s commitment and actions to build a better and fairer school education system, by:

- (1) putting an additional \$16 billion of Commonwealth investment in public schools on the table as part of the Better and Fairer Schools Agreement, to deliver reforms focused on:
 - (a) lifting student outcomes;
 - (b) wellbeing for learning and engagement; and
 - (c) a strong and sustainable workforce;
- (2) working to address the teacher shortage through the National Teacher Workforce Action Plan;
- (3) delivering \$284.3 million to schools to improve school infrastructure through the Schools Upgrade Fund; and
- (4) providing \$203.7 million in funding to support student wellbeing across every school in the country through the Student Wellbeing Boost.

Debate ensued.

Debate adjourned and the resumption of the debate made an order of the day for the next sitting.

5 PARAQUAT AND DIQUAT USAGE

Dr Webster, pursuant to notice, moved—That this House:

- (1) notes that:
 - (a) the Australian Pesticides and Veterinary Medicines Authority (APVMA) is reviewing the approved usage levels of paraquat and diquat in Australia;
 - (b) the Australian Broadcasting Corporation ran a story titled ‘After the Harvest’ on 31 August 2024 and 1 September 2024 seeking to link paraquat use to the incidence of Parkinson’s Disease, claiming that children were being ‘coated head to toe in chemicals’ and spraying was occurring without gloves or a mask;
 - (c) the APVMA responded saying such practices were ‘historical’ and ‘do not meet current requirements for the use of agvet chemical products’; and
 - (d) three OECD-nation regulators in the past four years have found no causal link between paraquat and Parkinson’s Disease; and
- (2) calls upon the Minister for Agriculture, Fisheries and Forestry to:
 - (a) listen to the voices of farmers who responsibly rely upon paraquat and diquat to control weeds, avoid heavy-tillage farming and retain soil and moisture in their cropping lands;
 - (b) listen to the science; and
 - (c) refrain from rewarding sensationalist journalism from the national broadcaster.

Debate ensued.

The time allotted for the debate having expired, the debate was interrupted, and the resumption of the debate made an order of the day for the next sitting.

6 WORKPLACE RELATIONS

The order of the day having been read for the resumption of the debate on the motion of Ms Stanley—That this House:

- (1) notes that:
 - (a) the Government’s workplace relations policies are getting wages moving again, with annual real wages growing for the past three consecutive quarters;
 - (b) nominal real wages grew 4.1 per cent in the year to the June quarter 2024;
 - (c) annual real wages grew 0.3 per cent through the year to the June quarter 2024; and
 - (d) this result comes off the back of inheriting a real wage decline of 3.4 per cent at the time of the election; and

- (2) recognises the Government is laying strong foundations for a better future for Australian workers, their families and communities, by:
- (a) advocating for the wages of Australia's low paid in three consecutive submissions to the Annual Wage Review that the real wages of low paid workers not go backwards;
 - (b) supporting pay rises for aged care workers of up to 28 per cent through submissions to the Fair Work Commission's Aged Care Work Value Case;
 - (c) having a 15 per cent pay rise for early childhood education and care workers;
 - (d) getting almost half a million more workers covered by current enterprise agreements, boosting wages and conditions; and
 - (e) making gender equality an object of the Fair Work Act and narrowing the gender pay gap to 12 per cent, the lowest level on record—

Debate resumed.

Debate adjourned and the resumption of the debate made an order of the day for the next sitting.

7 AGRICULTURE SECTOR

Ms Landry, pursuant to notice, moved—That this House:

- (1) acknowledges that:
- (a) agriculture is a cornerstone of Australia's social, economic and environmental sustainability, and plays an essential role in our nation's prosperity;
 - (b) in the 2023-24 financial year, the agriculture sector generated over \$82 billion, driving Australia's economy forward;
 - (c) the agriculture sector employs 257,000 Australians; and
 - (d) over 90 per cent of the fresh fruit, vegetables, meat, milk, and eggs available in Australia are produced locally, safeguarding our nation's food security; and
- (2) notes that:
- (a) the Australian agriculture sector is facing increased pressure due to this Government's destructive actions;
 - (b) this Government's decision to scrap the dedicated agriculture visa has left the industry with severe and widespread workforce shortages;
 - (c) Australia's water security is being jeopardised by this Government's reckless slashing of over \$7 billion from critical water infrastructure projects; and
 - (d) this Government's misguided agriculture policies have driven food prices up by 12 per cent, piling even more financial strain on everyday Australians.

Debate ensued.

Debate adjourned and the resumption of the debate made an order of the day for the next sitting.

Suspension of meeting

At 1.20 pm, the Deputy Speaker left the Chair.

Resumption of meeting

10 EARLY CHILDHOOD EDUCATION AND CARE EDUCATORS

The order of the day having been read for the resumption of the debate on the motion of Mrs Phillips—
That this House:

- (1) recognises:
 - (a) the vital role early childhood education and care (ECEC) educators and teachers play in supporting young children's early learning and development;
 - (b) properly valuing and recognising the ECEC profession, including through fair wages, is critical to reversing attrition and growing the workforce;
 - (c) paying ECEC workers fairly is a crucial step in charting the course to a truly universal ECEC system; and
 - (d) the Government's historic announcement for a two-year, 15 per cent ECEC worker retention payment for ECEC workers, phased in from December 2024;
- (2) notes that:
 - (a) one year on, the Government's cheaper child care reforms are delivering real cost of living relief to household budgets;
 - (b) the Australian Competition and Consumer Commission's child care inquiry found that out-of-pocket costs dropped 11 per cent following the introduction of the Government's cheaper child care measures; and
 - (c) the Government's ECEC worker retention payment will be tied to a commitment from early learning services to limit fee increases to 4.4 per cent, an important condition that will keep downward pressure on fees for Australian families; and
- (3) acknowledges that:
 - (a) since the election, there are 860 more ECEC services, around 68,000 more children in ECEC, and around 30,000 more ECEC workers; and
 - (b) between 2018 and 2022, fees under the previous Government increased by 22.8 per cent compared to the OECD adjusted average of 6.2 per cent—

Debate resumed.

Debate adjourned and the resumption of the debate made an order of the day for the next sitting.

11 GENETIC SCREENING

Mr Pearce, pursuant to notice, moved—That this House:

- (1) notes that:
 - (a) investment in equitable access to disease prevention is critical to tackle the major diseases of our time such as cancer and heart disease;
 - (b) genetic screening provides a novel opportunity for disease prevention, especially screening for genetic risk factors for certain types of hereditary cancer and heart disease that manifest in early adulthood;
 - (c) identifying people with medically actionable genetic risk for certain diseases can allow at-risk individuals to take steps to reduce risk or in some cases, avoid developing disease altogether;
 - (d) in Australia, funded testing for these genetic risk factors is only available to individuals who meet narrow criteria, usually only after a person develops symptoms of disease, and this criteria-based testing fails to identify most high-risk individuals in the population, who remain unaware of their risk and are unable to access preventive measures until it is too late;

- (e) investment in prevention will save significant downstream healthcare costs, as well as saving lives and improving the health of at-risk Australians; and
 - (f) the costs of genetic testing have decreased considerably, and health economic modelling now suggests it would be cost-effective in the Australian health system to offer DNA screening to all adults for such genetic risk factors, as part of a population screening program;
- (2) acknowledges that:
- (a) in August 2022, Monash University launched DNA Screen, a study funded by the Medical Research Future Fund and led by Professor Paul Lacaze and Dr Jane Tiller, which aimed to test 10,000 young adults (18 to 40 years of age) for genetic high risk of developing certain types of cancer (breast, ovarian, colorectal and others) and heart disease, that can be prevented or identified and treated early;
 - (b) the study was extremely popular, with almost 10,000 people registering their interest in the first 24 hours of the study launch, and over 30,000 people registering interest to date;
 - (c) the study has now completed testing of 10,263 young adults, finding 202 individuals at high, medically actionable risk of developing cancer or heart disease, and three in four of those high-risk people would not have qualified for reimbursed genetic testing; and
 - (d) in May 2024, the Senate Standing Committee on Community Affairs' inquiry into equitable access to diagnosis and treatment for individuals with rare and less common cancers specifically noted the potential of genetic testing for prevention and the high level of public interest and engagement in the DNA Screen study, and recommended that 'the outcomes of the study should be monitored closely, and that further investment to gauge the effectiveness and appropriateness of such screening programs should be explored further';
- (3) recognises the:
- (a) strain that population DNA screening could place on the current downstream risk management pathways; and
 - (b) need for genetics services and the health system to be prepared for population-scale DNA screening; and
- (4) calls on the Government to:
- (a) consider the urgent need to leverage the preventive potential of genomic testing for adults at high, medically actionable risk of developing conditions such as cancer and heart disease; and
 - (b) fund the next stage of DNA Screen to scale up testing for these medically actionable conditions, test the feasibility of a population-wide screening program, and develop and test methods for the delivery of downstream care and risk management at scale.

Debate ensued.

Debate adjourned and the resumption of the debate made an order of the day for the next sitting.

12 WESTERN AUSTRALIA

- (1) recognises the commitment of the Government to Western Australia and its understanding of the specific needs of the Western Australian community;

 - (a) the future of the critical minerals industry in Western Australia, noting its support for projects such as Pilbara Minerals' Pilgangoora lithium project and International Graphite's graphite battery anode material project, as well as the announcement of the \$17 billion production tax incentive for critical minerals processing; and
 - (b) critical infrastructure, noting the support for the following major projects:
 - (i) Causeway Cyclist and Pedestrian Bridges;
 - (ii) Westport Project Development;
 - (iii) Metronet;
 - (iv) Tonkin Highway Corridor; and
 - (v) Outback Way;

- (3) acknowledges the ongoing commitment of the Government to the goods and services tax deal for Western Australia;
- (4) supports the Government as it continues to pay attention to the needs of Western Australia and respond to those needs strategically and responsibly; and

 - (a) that 3 August 2024 marked 10 years since Islamic State (ISIS) militants attacked the Ezidi people of Sinjar;
 - (b) that the Ezidi people are one of the most ancient nations in the world, and their cultural identity, memories and practices are central to their ancient culture, yet many Ezidis have lived through unimaginable trauma and persecution;
 - (c) the important role played by former Prime Minister, the Hon Tony Abbott, in enabling the resettlement in Australia of 12,000 refugees escaping the Ezidi genocide in the northern parts of Syria and Iraq;
 - (d) that the electoral division of Groom is home to one of the largest groups of Ezidi people in Australia, and that their traditional language, the Ezidi language, is the second most spoken language in Groom, behind English;
 - (e) that by properly managing the immigration system, Australia was able to offer this important humanitarian assistance; and
 - (f) that by ensuring proper process, vetting and verification, the Government was able to reassure people on national security concerns and maintain social cohesion; and
- (2) calls on the Government to:
 - (a) recognise the Ezidis as a significant minority religious group in Australia;
 - (b) denounce the continuing persecution of Ezidis by ISIS militants;
 - (c) continue to provide funding for programs such as the Toowoomba Refugee and Migrant Service program that provide support to refugees and migrants; and
 - (d) apologise to the Ezidis and other refugees and migrants for changing the rules to fast-track one group of people over another.

Ms Stanley, pursuant to notice, moved—That this House:

- (1) notes that:
 - (a) October was Pregnancy and Infant Loss Awareness Month, and that Sunday 15 October 2024 marks Pregnancy and Infant Loss Remembrance Day; and
 - (b) this day acknowledges the shared loss experienced by parents, friends, and healthcare workers of those little ones lost too soon whether through miscarriage, stillbirth, neonatal death or any other loss;
- (2) acknowledges:
 - (a) that there is a significant impact on families who have lost a baby;
 - (b) that every year 110,000 Australians experience a miscarriage, more than 2,000 experience stillbirth, and almost 700 lose a baby within the first 28 days;
 - (c) that stillbirth occurrence is higher in Aboriginal and culturally diverse communities; and
 - (d) all the families who have experienced loss, either recently or over time; and

“, the House notes that:

- (1) the bill enables the Commonwealth to provide a pathway to full and fair funding for Australian schools, as an investment in a better and fairer education system;
- (2) that investment is provided by way of funding under the Better and Fairer Schools Agreement (BFS Agreement), to which the bill gives effect;
- (3) a fair system is one which strives for equity;
- (4) the definition of equity in the BFS Agreement is inadequate, stating only that an equitable outcome is one where ‘all students are provided access to high-quality, evidence-based teaching that is inclusive, where young Australians of all backgrounds and levels of need are supported to achieve their full educational potential’;
- (5) the concept of a ‘dual equity target’ proposed in the 2011 Gonski Review of Funding for Schooling is more robust than the BFS Agreement definition of equity, and requires that:
 - (a) all students should complete a level of education that enables them to participate in the workforce and lead successful lives, which means completing high school; and
 - (b) differences in student outcomes should not be the result of differences in wealth, income, power or possessions, and low-income, Indigenous, regional, remote area and other disadvantaged student groups should achieve similar outcomes to more advantaged students; and
- (6) the BFS Agreement should be amended to adopt the Gonski definition of ‘equity’, to ensure maximum improvement in quality and fairness in Australian education”.

Debate ensued.

Ms Chaney moved, as an amendment to the amendment proposed by Dr Scamps—That all words after “House” be omitted with a view to substituting the following words:

“:

- (1) notes previous recommendations of the National School Resourcing Board regarding improving transparency of Schooling Resource Standard loadings; and
- (2) urges the Government to strengthen transparency and accountability measures regarding Schooling Resource Standard loadings, so that the implementation and effectiveness of allocations and expenditure can be assessed at a sector and school level”.

Debate ensued.

Question—That the amendment moved by Dr Scamps to the amendment proposed by Ms Watson-Brown be agreed to—put and negatived.

 - (a) should not proceed further until referred to the Joint Standing Committee on Electoral Matters, to inquire into the intended and unintended consequences, with a report due to the House by the first sitting day of 2025;
 - (b) creates an unfair playing field, giving advantage to incumbents over new candidates by failing to give all candidates the same public funding for administrative support and failing to account for incumbent resources such as an office, staff, a vehicle and marketing budget whilst imposing a spending cap on candidates;
 - (c) provides disproportionate yearly administrative assistance funding to major political parties, and fails to account for any economies of scale; and
 - (d) entrenches political party advantage over independent candidates by imposing a spending cap on individual seats while still permitting additional party advertising under a party's \$90 million national cap;
- (2) requests that:
 - (a) an assessment of realistic administrative compliance costs under the bill be undertaken; and
 - (b) a cap be placed on administrative assistance funding to political parties to accurately reflect administrative compliance costs; and
- (3) notes that in the midst of cost of living pressures, the Government is giving itself and other parties substantial increases of public funding instead of prioritising increased support to Australians who are doing it tough”.

 - (c) one in three Australian women have experienced physical and/or sexual violence perpetrated by a man since the age of 15;

 - (e) there is no excuse for violence against women and girls;

7 MANUFACTURING

Ms Le, pursuant to notice, moved—That this House:

- (1) acknowledges that:
 - (a) small and medium-sized enterprises (SMEs) are fundamental to the Australian economy, contributing significantly to job creation and economic resilience, particularly in the manufacturing sector where their role is vital to the national interest;
 - (b) manufacturing is a leading employer in the electoral division of Fowler, employing approximately 12 per cent of the local workforce, significantly higher than the national average of 5.9 per cent;
 - (c) hundreds of manufacturing businesses in the electoral division of Fowler produce essential goods across a variety of sectors, from food production and building materials, to medical supplies and recycling initiatives;
 - (d) manufacturing SMEs are grappling with rising operating costs, a shortage of skilled labour and limited access to critical resources;
 - (e) the Government's Future Made in Australia plan, introduced in May 2024, does not sufficiently address the challenges facing the manufacturing sector; and
 - (f) manufacturing SMEs deserve a fairer share of Government support to achieve sustainable growth, scale effectively, expand employment opportunities and remain competitive amid growing domestic and international pressures;
- (2) notes that the Government's recent relief measures, such as the one-year extension of the \$20,000 instant asset write-off and a \$325 electricity rebate for small businesses, were positive steps, however fall short of addressing the long-term, systemic challenges faced by small and medium-sized manufacturers; and
- (3) calls on the Government to provide comprehensive and sustained support for small and medium-sized manufacturing businesses by:
 - (a) increasing the instant asset write-off to \$50,000 and extending it indefinitely, to support capital investment in small and medium-sized manufacturers and enable them to remain competitive as plant and material prices continue to rise;
 - (b) promoting manufacturing as a career to young Australians and migrant workers by continuing and expanding government investment in training initiatives, apprenticeships, English language training and foundational skills development to fill critical labour gaps and provide certainty for employers to boost productivity within the sector; and
 - (c) supporting lowering the cost of doing business by addressing the escalating costs for insurance, freight, energy and compliance, which disproportionately impact small and medium-sized manufacturers.

The time allotted for private Members' business having expired, the debate was interrupted, and the resumption of the debate made an order of the day for the next sitting.

22 MATTER OF PRIVILEGE RAISED BY THE MINISTER FOR INFRASTRUCTURE, TRANSPORT, REGIONAL DEVELOPMENT AND LOCAL GOVERNMENT—STATEMENT BY SPEAKER

The Speaker made the following statement:

Last Wednesday, the Minister for Infrastructure, Transport, Regional Development and Local Government and Member for Ballarat raised, as a matter of privilege, whether an action by the Member for Barker constitutes a breach of privilege. The specific action the Minister referred to is the filming by a staff member of the Member for Barker, without permission, of an interaction that day between the Member for Barker and the Minister in her Ministerial Office, and associated filming in a Ministerial Wing corridor. The Minister presented, as supporting information, an email from her to all Members and Senators advertising a drop-in session in her office on Wednesday, which I understand is a regular occurrence and I believe she should be commended for.

I have had the opportunity to review the matter raised by the Minister and, as I noted at that time, I accept the matter was raised at the earliest opportunity. The task for me under the standing orders is to determine whether there is a prima facie case that the action by the Member for Barker amounts to, or was intended or likely to amount to, an improper interference with the free exercise by the Member for Ballarat of her duties as a Member.

I note that the incident complained of occurred during a drop-in session held by the Member in her capacity as Minister for Infrastructure, Transport, Regional Development and Local Government, on subjects within her ministerial responsibilities. I appreciate the Minister's concerns about the discourtesy shown by the Member for Barker through this action, and acknowledge that she may consider it to be a significant interference in her Ministerial work and an affront to her.

However, I do not see evidence that the action by the Member for Barker amounts to, or was intended or likely to amount to, an improper interference with the free exercise by the Member for Ballarat of her duties as a Member, such as would allow me to find a prima facie case of a breach of parliamentary privilege. Therefore, I do not propose to give precedence to a motion to refer the matter to the Standing Committee of Privileges and Members' Interests.

Even though there is not a prima facie case of a breach of privilege, other considerations are relevant in these circumstances. The evidence of the Minister raises serious concerns about breaches of the media rules applying to everyone in Parliament House. I take this opportunity to remind all Members that filming interactions in the private areas of Parliament House, without appropriate approvals and the express permission of those captured in the images, are a breach of the media rules for Parliament House. These rules apply to everyone, visitors and building occupants alike, including Members and their staff. I consider it to be the responsibility of Members to ensure that their staff follow these rules.

Further, I take this opportunity to remind Members of the Parliamentary Behaviour Standards and Code, which were approved by the House and the Senate in October. Every one of us is required to understand and comply with the standards and code. As the Behaviour Code for Parliamentarians states:

All Parliamentarians have a shared responsibility as employers, and leaders in the community, to ensure that our Workplace meets the highest standards of integrity, dignity, safety and mutual respect.

I would hope that any Member who has caused offence to another Member would exercise that respect, and apologise for their actions.

Mr Pasin and Ms C King (Minister for Infrastructure, Transport, Regional Development and Local Government), by indulgence, also made statements on the matter.

Debate resumed.

Ms Tink, by leave, again addressed the House, and moved, as an amendment—That all words after “That” be omitted with a view to substituting the following words:

“the House declines to give the bill a second reading, and notes:

- (1) the concerns raised by the mental health sector that a social media ban for children under 16 could:
 - (a) limit young people’s access to important online mental health services and positive social connections;
 - (b) disincentivise platforms from offering child safety features for younger users that will inevitably circumvent the ban; and
 - (c) push younger users onto less regulated platforms; and
- (2) that a one-day window for submissions to a parliamentary committee inquiry is insufficient given the potential magnitude of these risks, and a robust inquiry process should instead take place”.

Debate ensued.

Dr Scamps moved, as an amendment to the amendment proposed by Ms Tink—That all words after “House” be omitted with a view to substituting the following words:

“does not decline to give the bill a second reading and notes:

- (1) the Joint Select Committee on Social Media and Australian Society tabled its final report on 18 November 2024 and carefully considered, but did not recommend, an age ban on social media;
- (2) the Australian Human Rights Commission has serious reservations about the ban;
- (3) in October 2024, over 140 Australian and international experts wrote an open letter to the Prime Minister and State and Territory leaders explaining their view that an age-based ban on accessing social media is too blunt an instrument to address the risks effectively;
- (4) an age-based social media ban could have unintended consequences including increased isolation and children being pushed to unregulated and dangerous platforms; and
- (5) the imposition of a ‘duty of care’ on digital platforms is more likely to reduce online harm for all users regardless of age and should be implemented as a matter of urgency”.

Debate ensued.

Debate adjourned (Ms Kearney—Assistant Minister for Health and Aged Care), and the resumption of the debate made an order of the day for a later hour this day.

19 SURVEILLANCE LEGISLATION (CONFIRMATION OF APPLICATION) BILL 2024—REPORT FROM FEDERATION CHAMBER

Debate resumed.

Ms Steggall moved, as an amendment to the amendment proposed by Dr Scamps—That all words after “not” be omitted with a view to substituting the following words:

“desire to give the bill a second reading and notes:

- (1) the Age Assurance Technology Trial, conducted by the Department of Infrastructure, Transport, Regional Development, Communications and the Arts, has not yet been finalised and further debate on the bill should only occur when a comprehensive report has been presented to Parliament with the results of the trial;
- (2) that the Government is wasting the Parliament’s time on a bill where the implementation is unclear and the effectiveness remains disputed by experts; and
- (3) that the Government is being selective on the harms they wish to protect young people from by prioritising the valuable resources and time of Parliament to pass a bill that is not coming into effect until 2026, instead of introducing and progressing legislation that would restrict gambling advertising, despite having committed to doing so, and having being unanimously recommended by a multipartisan House of Representatives committee and having overwhelming public support”.

Debate ensuing—

Ms Daniel moved, as an amendment to the amendment proposed by Ms Steggall—That all words after “and” be omitted with a view to substituting the following words:

“(1) notes that:

- (a) Australia was once an international world leader in online safety regulation when the previous Coalition Government enacted the *Online Safety Act 2021*;
 - (b) Australia’s existing content-based model of online safety regulation was inspired by what was once effective during the era of broadcast television, newspapers and radio last century, and that technology has fundamentally changed this information landscape;
 - (c) Australia has lost its status as a world leader in online safety regulation following the enactment of ambitious ‘systems’-based laws in the European Union and United Kingdom respectively; and
 - (d) whilst age assurance as a tool for regulators may have some capability to contribute to safer Australian online spaces, it does not change how algorithms operate in any fundamental way;
- (2) recognises the promising recent public statements of the Prime Minister and the Minister for Communications expressing the Government’s intent to implement a ‘Digital Duty of Care’ if elected to a second term of Government;
- (3) further notes that a duty of care:
- (a) alone is insufficient to meaningfully hold digital platforms and their algorithms to account and make social media safe by design; and
 - (b) is just one of five necessary elements of equal importance if Australia is to meaningfully make digital spaces safe for Australians of all ages; and
- (4) calls on the Government to reclaim the mantle of our nation as a world leader in online safety regulation by enacting a comprehensive ‘systems’-based legislative framework, this being:
- (a) a duty of care;
 - (b) risk assessments;
 - (c) risk mitigation plans;
 - (d) genuine transparency measures for the Australian public and our research community; and
 - (e) enforcement measures proportionate to the risk algorithms pose to Australian society”.

Debate ensued.

8 FUTURE MADE IN AUSTRALIA (GUARANTEE OF ORIGIN) BILL 2024

The order of the day having been read for the resumption of the debate on the question—That the bill be now read a second time—*And on the amendment moved thereto by Mr Ted O'Brien, viz.*—That all words after “That” be omitted with a view to substituting the following words:

“whilst not declining to give the bill a second reading, the House notes that:

- (1) the bill prioritises ideology over outcome by failing to be technology-agnostic;
- (2) the bill shows a clear bias against hydro in favour of wind and solar which will disproportionately impact Tasmania and threatens to increase the cost of certificates for industry;
- (3) in exempting technologies the Government doesn't like, such as blue and pink hydrogen, the bill does not align with overseas schemes;
- (4) the bill risks being a Trojan horse for a broader economy-wide carbon price; and
- (5) the bill bears little resemblance to the policy of the former Government”—

21 SUSPENSION OF STANDING AND SESSIONAL ORDERS MOVED

Mr Katter moved—That so much of the standing and sessional orders be suspended as would prevent the Member for Kennedy from moving the following motion immediately—That:

(1) this House notes that:

- (a) the Coles and Woolworths oligopoly is having an appalling impact on farmers and consumers around Australia;
- (b) the people of Australia are being overcharged punitively by the supermarket giants whilst the nation's farmers are being paid prices which are below cost of production and do not provide them a liveable income;
- (c) urgent action is required to level the playing field between the farmers and consumers on the one hand and the supermarket giants on the other;
- (d) the Member for Kennedy and Member for Clark introduced the Reducing Supermarket Dominance Bill 2024 earlier this year which divests supermarkets of this market power,

specifically by setting market power limits with associated timeframes, providing significant penalties and establishing an oversight body; and

- (e) the Government's legislation merely increasing penalties does nothing to reform the supermarket sector and will only further line the pockets of the legal fraternity, and the current code penalty of \$64,000 has rarely, if ever, been enforced; and
- (2) the Member for Kennedy be permitted to present the Reducing Supermarket Dominance Bill 2024 immediately, and the bill be given priority over all other business in order to stop any further delay in providing affordability to consumers and fairness to farmers.

Debate ensued.

42 MESSAGE FROM THE SENATE—TREASURY LAWS AMENDMENT (RESPONSIBLE BUY NOW PAY LATER AND OTHER MEASURES) BILL 2024

Message No. 385, 28 November 2024, from the Senate was reported returning the Treasury Laws Amendment (Responsible Buy Now Pay Later and Other Measures) Bill 2024 with amendments.

Statement by Speaker

The Speaker made the following statement:

It is my duty to draw to the attention of the House, the fact that the Senate amendments conveyed by this message raise an important point of constitutional principle.

Proposed amendment (13) will have the effect of expanding the definition of ‘build to rent capital works deduction amount’ to include additional amounts. Proposed amendment (14) will have the effect of expanding the definition of ‘build to rent withholding amount’ to include additional amounts. Proposed Senate amendments (9) to (12) and (15) are consequential on proposed amendments (13) and (14).

If enacted, proposed amendments (13) and (14) will increase some entities’ liability to build to rent development misuse tax, and amendments for such changes are covered by section 53 of the Constitution.

In terms of the test that the House has used, as referred to in House of Representatives Practice, what are the probable, expected or intended practical consequences of the proposed amendments? In essence, the advice to me is that Senate amendments (13) and (14) increase a ‘charge or burden on the people’ and are contrary to the requirements of section 53 of the Constitution. Thus, amendments (13) and (14) should have been made to the House as requested amendments.

The matter for consideration is not so much one of the privileges and rights between the two Houses, but observance of the requirements of the Constitution itself concerning the powers of the Houses. However, issues to do with section 53 of the Constitution have been matters of difference between the Houses since the early years of Federation. House of Representatives Practice lists bills in relation to which Senate amendments were questioned on this ground, although an example from 12 February 2019 is too recent to be included. On that occasion, Speaker Smith made a statement to the House which was very similar to my statement today.

I now leave it in the hands of the House as to how it wishes to proceed.

Mr Burke (Leader of the House) moved—That the:

- (1) House endorses the statement of the Speaker in relation to the constitutional questions raised by the Senate message in respect of the Treasury Laws Amendment (Responsible Buy Now Pay Later and Other Measures) Bill 2024;
- (2) House, having regard to the public interest in the early enactment of the bill, refrains from the determination of its constitutional rights in respect of the matter; and
- (3) amendments be considered immediately.

Question—put and passed.

On the motion of Mr Burke, the amendments were agreed to.

43 MESSAGE FROM THE SENATE—CRIMES AMENDMENT (STRENGTHENING THE CRIMINAL JUSTICE RESPONSE TO SEXUAL VIOLENCE) BILL 2024

Message No. 387, 28 November 2024, from the Senate was reported returning the Crimes Amendment (Strengthening the Criminal Justice Response to Sexual Violence) Bill 2024 with amendments.

Ordered—That the amendments be considered immediately.

On the motion of Mr Burke (Leader of the House), the amendments were agreed to.

44 MESSAGE FROM THE SENATE—FAMILY LAW AMENDMENT BILL 2024

Ordered—That the amendments be considered immediately.

On the motion of Mr Burke (Leader of the House), the amendments were agreed to.

Ordered—That the amendments be considered immediately.

10 **MESSAGE FROM THE SENATE—VETERANS’ ENTITLEMENTS, TREATMENT AND SUPPORT (SIMPLIFICATION AND HARMONISATION) BILL 2024**

Message No. 428, 13 February 2025, from the Senate was reported returning the Veterans’ Entitlements, Treatment and Support (Simplification and Harmonisation) Bill 2024 with amendments.

Veterans’ Entitlements, Treatment and Support (Simplification and Harmonisation) Bill 2024—Statement by Speaker on consideration of Senate message

The Deputy Speaker made the following statement, on behalf of the Speaker:

It is my duty to draw to the attention of the House, the fact that one of the Senate amendments conveyed by this message raises an important point of constitutional principle.

Proposed amendment (4) would have the effect of changing the persons to whom additional amounts under section 80 of the *Military Rehabilitation and Compensation Act 2004* are payable.

Senate amendment (4) is covered by section 53 of the Constitution because it changes the destination of money appropriated by section 423 of the *Military Rehabilitation and Compensation Act 2004*. Thus, the amendment should have been made to the House as a requested amendment.

The matter for consideration is not so much one of the privileges and rights between the two Houses, but observance of the requirements of the Constitution concerning the powers of the Houses.

I am advised that, in the application of standing order 180, a change to the destination of money drawn from an existing appropriation is considered to be a proposal requiring a message from the Governor-General under section 56 of the Constitution. I understand that such a message has been obtained in this case.

If the House wishes to entertain the proposal reflected in the Senate’s proposed amendment, the House may choose to proceed by alternative means.

Mr Keogh (Minister for Defence Personnel) moved—That the:

- (1) House endorses the statement of the Speaker in relation to the constitutional questions raised by Message No. 428 transmitted by the Senate in relation to the Veterans’ Entitlements, Treatment and Support (Simplification and Harmonisation) Bill 2024; and
- (2) message be considered immediately.

Question—put and passed.

On the motion of Mr Keogh, the Senate’s purported amendment (4) was disagreed to, after debate.

Message from the Governor-General

Message No. 237, 19 November 2024, from Her Excellency the Governor-General was announced recommending an appropriation for the purpose of amendments to be made on motion moved by a Minister to the bill.

On the motion of Mr Keogh, the Government amendment was made in place of the Senate's purported amendment (4) which had been disagreed to.

On the motion of Mr Keogh, Senate amendments (1) to (3) were agreed to.

11 EARLY CHILDHOOD EDUCATION AND CARE (THREE DAY GUARANTEE) BILL 2025

The order of the day having been read for the resumption of the debate on the question—That the bill be now read a second time—*And on the amendment moved thereto by Ms Daniel (see item No. 9, page 2231)*—

Debate resumed.

Mr R Wilson addressing the House—

Closure

Dr Aly (Minister for Early Childhood Education) moved—That the question be now put.

In accordance with the resolution agreed to earlier this sitting—

The order of the day having been read for the resumption of the debate on the question—That the bill be now read a second time—

Debate resumed by Mr Ted O’Brien who moved, as an amendment—That all words after “That” be omitted with a view to substituting the following words:

“whilst not declining to give the bill a second reading, the House notes that:

- (1) on the eve of a federal election, the Government has been forced to work around their own Environment Minister in an attempt to fix a political mess of their own making;

- (2) the Government remains bitterly divided on the future of salmon farming at Macquarie Harbour and has unleashed 15 months of anxiety and uncertainty on thousands of workers, families and communities who rely on the salmon industry, including voting against a Coalition bill to improve the reconsideration process in the most recent sitting week of Parliament;
- (3) this legislation is not needed to provide lasting certainty to the Tasmanian salmon industry, and instead the Government should simply have ended the Minister for the Environment's disastrous 2023 review of salmon farming's future at Macquarie Harbour;
- (4) the Government, and particularly the Environment Minister, must guarantee to not instigate other forms of legislation or regulations that will impose new controls or reviews on the salmon industry, including through the return of their Nature Positive legislation, Federal EPA or use of other forms of the EPBC Act, such as directed environmental audits; and
- (5) the changes to the reconsiderations regime in the bill should be substantially strengthened to ensure that all assessments of all projects, across all industries, do not remain subject to the open-ended review processes that currently exist".

Debate ensuing—

Mr Bates moved, as an amendment to the amendment proposed by Mr Ted O'Brien—That all words after "whilst" be omitted with a view to substituting the following words:

"the House declines to give the bill a second reading, it notes that the Government is using the cover of the budget to rush through legislation that trashes environment laws instead of passing laws to cut student debt and triple the bulk billing incentive for GPs".

Debate ensued.

It being 5.45 pm—In accordance with the resolution agreed to earlier this sitting—
