

TO THE HONOURABLE THE SPEAKER AND MEMBERS OF THE HOUSE OF REPRESENTATIVES

This petition of the caring people in Australia.

Draws to the attention of the House: The Hematopoetic Stem Cell Transplant (HSCT) is being offered in other major countries to their sufferers of Multiple Sclerosis with great success. We would like the same opportunity to regain control of our bodies and our lives so we can contribute to society. This procedure uses the patient's own cells that are converted to stem cells.

"The petitioners therefore request that your Honourable House will urge the Government to make HSCT (Hematopoetic Stem Cell Transplant) available to Australian MS sufferers under the Medicare system."
