

Are women with CFS ovary-reacting? Ovarian hormones and symptom severity in chronic fatigue syndrome

We are seeking female volunteers for a study exploring the impact of hormones on chronic fatigue syndrome.

Who can take part in this study?

- ✓ Women between 18 and 40 years of age;
- ✓ Experiencing significant and chronic fatigue;
- ✓ Have regular menstrual cycles (25-35 days in length);
- ✓ Not pregnant or breastfeeding;
- ✓ Not taking hormonal contraceptives (e.g., oral contraceptive pill).

What's involved?

If you decide to take part you would:

- Complete online questionnaires on four occasions across a menstrual cycle
- Provide a saliva sample on four occasions across one menstrual cycle
- Conduct at home hormone testing to identify ovulation

Will I be paid to take part in the study?

You will receive \$50 for participating.
