Public · Anyone on or off Facebook

Join us at this crucial event, hosted by Fight For The Bight Port Fairy, in partnership with the Australian Marine Conservation Society (AMCS) and special guest from the Environmental Defenders Office (EDO). Our coastline is under threat, and it's time to make our voices heard.

ConocoPhillips and CGG are proposing to drill exploratory oil and gas wells and conduct seismic blasting off our beautiful coastline, posing a serious risk to our marine life and coastal communities. This gathering is an urgent call to action for anyone concerned about preserving our marine environment.

This interactive session will help you to understand the NOPSEMA decision-making process. Our expert lawyer from the EDO will provide detailed insights on how to effectively engage with these projects through the NOPSEMA framework. Your involvement can make a real difference in preventing these potentially harmful activities.

The event will be specifically relevant to both the ConocoPhillips drilling and CGG seismic blasting projects. A dedicated Q&A segment will give you the opportunity to ask questions and gain clarity on how best to participate in and influence the process.

Your voice matters in the fight to protect our coasts. Together, we can make a stand against these environmental threats. Let's unite to ensure our marine environment is not degraded for the generations to come. See less
