129175-24WA-RTR	WA	City of Swan	Leslie Road, Middle Swan	The condition survey undertaken in 2020 rated the structural condition as 4.2 (with 5 being the worst). Tree roots from the large trees have grown into the road pavement causing significant uplift. Treatment is required to address the tree root issue and remove the uneven surface. Straight Line Kilometre (SLK) 0.04-0.17 measured from Leslie Road: Profile off 70 mm asphalt wearing, apply two coat emulsion primer seal, lay two layers (40 mm+30 mm) new Asphalt wearing to address tree root issue. Straight Line Kilometre (SLK) 0.17-0.35 measured from Leslie Road: Profile off 30 mm asphalt wearing, apply two coat emulsion primer seal, lay 40 mm new Asphalt wearing.	\$295,445	\$295,445	Feb-25	Mar-25
129176-24WA-RTR	WA	City of Swan	Kent Way, Malaga	The 2020 road condition survey rated the surface condition as a 3.79 (with 5 being the worst) and is demonstrating evidence of severe structural and non structural cracking. Renewal is required to rectify. Profile off 20 mm asphalt wearing, apply 10 mm strain alleviating membrane interlayer seal and lay 40 mm new asphalt concrete wearing.	\$123,504	\$123,504	Mar-25	May-25
129177-24WA-RTR	WA	City of Swan	Alexander Drive, Dianella	The 2020 road condition survey rated the surface condition of this section as a 3.79 (with 5 being the worst). Recent inspections have identified there is evidence of pavement failure in the intersection which will require a rehabilitation treatment to rectify. Profile off 40 mm asphalt wearing, in situ foamed bitumen stabilisation of basecourse to a depth of 240 mm, apply two coat emulsion primer seal and lay 40 mm new asphalt concrete wearing.	\$745,593	\$1,127,404	Mar-25	Apr-25

129178-24WA-RTR	WA	City of Swan	Truganina Road, Malaga	The recent condition survey rated the structural condition as 5 out of 5 (with 5 being the worst). Truganina Road is showing evidence of structural and non-structural cracking and signs of failure. Renewal is required to rectify. In situ foamed bitumen stabilisation to a depth of 270 mm, profile off top 40 mm material, apply 7 mm granite primer seal, and lay 40 mm new asphalt concrete wearing.	\$530,668	\$530,668	Mar-25	Apr-25
133596-25WA-RTR	WA	City of Swan	Truganina Road, Malaga	This section of Truganina Road scored a surface condition rating of 2.68 out of 5 (with 5 being very poor) in the 2020 condition survey. Recent visual inspections note that road has deteriorated since the condition survey noting extensive patching and cracking along the extents due to heavy vehicle traffic in industrial area and multiple maintenance work requests. Rehabilitation is required to rectify. In situ foamed bitumen stabilisation to a depth of 270 mm, profile off top 40 mm material, apply 7 mm granite primer seal, and lay 40 mm new asphalt concrete wearing.	\$626,054	\$626,054	Feb-26	Mar-26
133601-25WA-RTR	WA	City of Swan	Westchester Road, Malaga	This section of Westchester Road scored an average surface condition rating of 3.82 out of 5 (with 5 being very poor) in the 2020 condition survey. Visual inspections confirm that the road requires a resurface before costly rehabilitation works are needed. Profile off 40 mm asphalt wearing, apply 7 mm granite primer seal and lay 40 mm new Asphalt Concrete wearing.	\$255,669	\$422,037	Nov-25	Jan-26
133618-25WA-RTR	WA	City of Swan	Margaret Street, Midland	This section between Great Northern Highway and Sayer Street is in need of renewal. It has a surface condition rating between 5 out of 5 based on the 2020 road condition survey. There is also evidence of subsidence following the drainage works completed along this street. Profile off 30 mm asphalt wearing within 1 m width from the face of kerb, followed by an overlay of the entire section and apply 7 mm emulsion primer seal and lay 10 mm new Stone Mastic Asphalt wearing.	\$240,773	\$240,773	Nov-25	Jan-26

133626-25WA-RTR	WA	City of Swan	Thorburn Avenue, Beechboro	This section of Thorburn Avenue scored an average surface condition rating of 2.94 out of 5 (with 5 being very poor) in the 2020 condition survey. Recent visual inspections note that there cracking and tree root uplift along this section of road. Resurfacing is required to rectify. Straight Line Kilometre (SLK) 0.31-0.33 measured from Thorburn Avenue: Profile off 70 mm asphalt wearing, apply two coat emulsion primer seal, lay two layers (40 mm+30 mm) new Asphalt wearing to address tree root issue. The entire section apart from the above: Profile off 40 mm asphalt wearing, apply two coat emulsion primer seal, lay 40 mm new Asphalt wearing.	\$251,746	\$251,746	Oct-25	Nov-25
133647-25WA-RTR	WA	City of Swan	Great Northern Highway, Middle Swan	The intersection of Great Northern Highway with Toodyay Road and Eveline Road has an average surface condition rating of 3.40 out of 5 (with 5 being very poor) in the 2020 condition survey. Visual inspections confirm that the road requires a resurface before costly rehabilitation works are needed. Profile off 40 mm asphalt wearing, apply 7 mm granite primer seal and lay 40 mm new Asphalt Concrete wearing.	\$294,588	\$294,588	Feb-26	Mar-26
133650-25WA-RTR	WA	City of Swan	Queens Road, South Guildford	The intersection of Queens Road and West Parade scored an average structural and surface condition of 5 out of 5 (5 being very poor). Recent visual inspections confirmed severe pavement deformation on Queens Road. This has been treated temporarily and a rehabilitation treatment is required to rectify in the long term. Main Roads WA has flagged the westbound lane of Queens Road/West Parade intersection is not sufficient to cater for truck turning movement. The westbound lane of Queens Road/West Parade intersection needs to be widened to rectify this. Box out 350 mm soil and infill 350 mm gravel in widening area, in situ foamed bitumen stabilisation to a depth of 330 mm, profile off top 40 mm material, apply 7 mm granite primer seal, and lay 40 mm new asphalt concrete wearing.	\$331,150	\$331,150	Mar-26	Apr-26

133652-25WA-RTR	WA	City of Swan	West Swan Road, Caversham	The roundabout at the intersection of West Swan Road and Benara Road scored an average surface condition of 5 out of 5 (with 5 being very poor). The roundabout has been patched and visual inspections confirm the presence of structural cracking in the roundabout. Pavement testing and modelling indicate road pavement rehabilitation is required to rectify the following issues. In situ foamed bitumen stabilisation to a depth of 370 mm, profile off top 40 mm material, apply 7 mm granite primer seal, and lay 40 mm new asphalt concrete wearing.	\$381,923	\$381,923	Mar-26	Apr-26
133653-25WA-RTR	WA	City of Swan	Youle-Dean Road, Brabham	The roundabout at the intersection of Everglades Avenue, Youle-Dean Road was constructed during the development of the Brabham District in 2017. An increase in traffic volumes is observed with the development of the completion of the Brabham District Stage 3 residential development south of the roundabout and the Whiteman Park Station West of the roundabout along Drumpellier Drive. In addition, it is expected that the road hierarchy of Youle-Dean Road would be upgraded to service the increased traffic. Extensive cracking has already been observed on the southern half of the roundabout and a rehabilitation treatment is required to rectify the pavement issues. Cores extracted have revealed the current pavement was constructed as a single layer limestone pavement lacking a high-quality base material to withstand current and future traffic volumes. Remove brick pavers and flush beams to match current road level, in situ foamed bitumen stabilisation to a depth of 290 mm, profile off top 40 mm material, apply 7 mm granite primer seal, and lay 40 mm new asphalt concrete wearing.	\$313,343	\$313,343	Jan-26	Feb-26

130356-24WA-RTR	WA	Shire of Boddington	Bannister Marradong Road, Boddington	The existing pavement surface is showing signs of wear and routing. The road is under the care of Main Roads WA only for the width of the two trafficable lanes. Main Roads WA has already repaired the damaged pavement areas and is going to reseal the entire section of road going through town. Main Roads has invited the Shire of Boddington to take advantage of the mobilisation of all the equipment to extend the work area to the parallel parking areas that are situated on both side of the road. These on-road parking areas are under the care of the Shire of Boddington. For this project it is proposed to do a micro surfacing (reseal) on the parking areas under the care of Shire of Boddington at the same time as the work executed by Main Roads WA. This will enhance the longevity of the already ageing seal and preserve the road pavement. Line marking will follow the work to ensure a clear delineation of traffic and parking lanes.	\$38,533	\$38,533	Feb-25	Mar-25

129600-24WA-RTR	WA	Shire of Broome	Frederick Street, Broome	Frederick Street is classified as a Local Distributor. The road carries a significant amount of traffic associated with both local and tourist travel. It also serves as part of a bus route servicing surrounding schools, businesses, the Boulevard Shopping Centre, and the Broome Airport. Frederick Street links the Cable Beach tourist precinct, Cable Beach subdivision, the Broome Recreation & Aquatic Centre (BRAC), and the Port to China Town. Category 6 vehicles (RAV 6 - 36.5 m long truck) and below are allowed to operate on Port Drive and Frederick Street to the airport. The Shire's first priority for this roadway is to ensure all intersections are functioning smoothly and safely with consideration of forthcoming developments. In 2024, the Shire engaged consultant KCTT to complete a traffic study of the BRAC entry & exits as part of the masterplan considerations for this public facility with consideration of other development that area also happening along Frederick Street. The assessment recommends the construction of a roundabout with new pedestrian links on Frederick Street should be undertake to upgrade the existing exit-only arrangement. 131743-24WA-RTR	WA	Shire of Broome	Old Broome Road, Broome	Old Broome Road is a Local Distributor which forms the primary route into the town centre from the north. The road carries a significant volumes of local and tourist traffic. The Shire plans to undertake pavement rehabilitation and upgrades to ensure more continuous flow of vehicles and pedestrian traffic at peak times, while improving amenity, drainage, lighting and safety. The three key project goals are: 1. Rehabilitate existing deteriorating pavement and wearing course and replace old safety barriers and bridge rails. 2. Upgrade Sandpiper intersection to include additional southbound lane to improve flow of traffic at peak times. 3. Install new shared path.	\$899,706	\$4,103,475	Jan-25	Jun-26

131744-24WA-RTR	WA	Shire of Broome	Cable Beach Road East, Djugun	This section of roadway presents road safety and congestion issues during conflicting vehicle movements through this area at peak times. There are also several conflict points between pedestrians and vehicles that should be improved. It is proposed to install modified intersection arrangements that will reduce the conflicting vehicle movements. New infrastructure shall also be installed to improve flow of pedestrian movements and address safety concerns. Existing pavement issues shall be addressed where appropriate during the works. 134915-25WA-RTR	WA	Shire of Carnarvon	Minilya Lyndon Road (Rural Road)	There are nine narrow, one-lane cattle grids. Some have faded advanced warning signs - Grid and some have missing advanced signage. Some have corrugated sheeting sticking out into the lane or have star pickets sticking out with no cap. In addition, the cattle grids at SLK0021 and SLK0055 are near to or directly on steep crests with limited forward visibility. Cattle Grid at SLK0065 has exiting vegetation in front of the fencing leading to the gate in front of reflectors on top of the fence. There is a risk that vehicles could fail to give way whilst passing through cattle grids resulting in head-on crashes at speeds causing severe injury. In addition, sheeting metal and star pickets are hazards, which could result in spearing impact to the vehicle. Upgrade all nine cattle grids to allow for safe two way passage design according to Main Roads WA standards. 129314-24WA-RTR	WA	Shire of Dowerin	Old Koorda Road (rural road)	Gravel is worn down to clay base which breaks up into bulldust and potholes in the dry and becomes slippery when wet. The gravel re-sheet process begins with clearing vegetation to the maintenance zone then building up the road formation using material sourced from existing drains and backslopes, which is then water binded, balanced and compacted to ensure stability. Conduct gravel sheeting and define drainage, 175 mm loose compacted to 150 mm ensuring new layer is water binded and compacted. A crossfall of 3-4% is established to facilitate proper drainage. Drainage is carefully defined to ensure proper water management and prevent erosion. 129315-24WA-RTR	WA	Shire of Dowerin	Dowerin Koorda Road (rural road)	Rebuilding the shoulders of Dowerin Koorda Road as it is becoming unsafe to pass heavy vehicles. The scope of works for shoulder rehabilitation involves using a grader to box out the shoulder of the sealed road to a 100 mm depth with a crossfall of 3%, ensuring a consistent 1.5 m width. Loose material and debris will be removed from the boxed area. The excavated shoulder will then be conditioned and compacted to create a stable base. Gravel will be preconditioned in the pit by evenly moistening it for optimal compaction, then loaded and transported to the site. The preconditioned gravel will be tipped into the prepared boxed area and spread evenly to maintain the 1.5 m width. The spread gravel will be thoroughly compacted to achieve the desired density and stability, then trimmed. Finally, the edges will be swept to ensure a clean, finished appearance.	\$113,692	\$125,140	Feb-25	Jun-25

134939-25WA-RTR	WA	Shire of Dundas	Hyden Norseman Road (rural road)	This section of road (8.40 kilometres to 13.97 kilometres) forms part of a key mining haul and tourism route within the Shire of Dundas. The road provides access to four local destinations frequently visited by both heavy vehicles and tourists, including mine sites, pastoral properties, and natural attractions. Due to sustained heavy haulage from mining operations combined with tourist traffic, the gravel pavement and drainage infrastructure have deteriorated. The existing formation exhibits: Significant surface corrugation and rutting, creating unsafe conditions for both heavy and light vehicles. Poor drainage and inadequate table drain causing water to pond and flow across the formation during rain events. Shoulder erosion and scouring, leading to edge drop-offs and reduced road width. Dust generation, especially near the truck stopping areas, affecting visibility and road safety. The proposed works aim to stabilise and reshape the formation, improve drainage, and provide a designated dust-down area to ensure safe, reliable, and all-weather access for both industrial and tourist traffic. The proposed works involve the rehabilitation and improvement of 5.57 kilometres of gravel road between chainages 8.40 kilometres and 13.97 kilometres, addressing drainage, safety, and surface	\$401,687	\$401,687	Nov-25	May-26

131379-24WA-RTR	WA	Shire of Kent	Range Road (Rural Road)	Range Road is a busy gravel road that carries a lot of daily traffic, including heavy vehicles. Because it is not sealed (paved), the surface quickly wears down, creating potholes, loose gravel, dust, and uneven sections. This leads to frequent maintenance needs and makes the road rough and unsafe to drive on, especially after rain. Sealing (paving) the road is needed to improve safety, reduce ongoing damage, lower maintenance costs, and provide a smoother, longer-lasting surface for all road users. It is proposed that the entire length of this road will end up sealed. This has been an ongoing project for several years. Form and reshape gravel on the next 4kms of road; cement stabilise prior to a 2-coat 7 m bitumen seal being applied.	\$760,133	\$760,133	Aug-24	Mar-25

This project continues on from the previous year's work by extending the seal network down this road. This road section will be re-sheeted then new bitumen seal laid with 7 mm and 14 mm aggregate.	\$343,262	\$343,262	Dec-24	May-25
131343-24WA-RTR	WA	Shire of Lake Grace	Jarring South Road (Rural Road)	Heavy vehicle usage has removed the top layer of the gravel surface revealing clay underneath which is slippery when wet for both normal vehicle and heavy vehicles. entire section from SLK 6.00 to SLK 11.50 with gravel to 200 mm depth compacted and replace a culvert at SLK 7.03.	\$257,004	\$257,004	May-25	Jun-25

133931-25WA-RTR	WA	Shire of Lake Grace	Biddy Camm Road (Rural Road)	Biddy Camm Road is one of the most used roads for grain haulage to the Lake Grace CBH Grain Receival bin, and traverses almost the entire length of the Shire. This section is closer to Lake Grace town which makes it a converging point for outlying farms northeast of the Lake Grace Town, and as a result, the gravel road receives high volumes of heavy traffic around harvest time. This causes constant deep corrugation and material lost every year. Additionally there is a floodway that washes away with moderate rain and due to the surrounding lake system, water tends to bank up on the north side of the road. For the entire works section from SLK 4.25 to SLK 12.07, the gravel pavement will be with new gravel in preparation for a primer seal. 5 culverts will be replaced within this section to assist in stormwater movement and the floodway located around SLK 11.12 will be cement stabilised to a length of 1 kilometre. After gravel , the entire works section will be sealed with primer seal, and then new guideposts installed to both sides of the road. The road section directly to the west is sealed, so this is an extension of our sealed road network.	\$964,020	\$964,020	Oct-25	Nov-25
134514-25WA-RTR	WA	Shire of Lake Grace	Biddy Camm Road (Rural Road)	This section of Biddy Camm Road is well trafficked by heavy vehicles attempting to get on to Newdegate North Road (which is a sealed road) to reach the Newdegate townsite where the CBH grain receival site is. As a result this road suffered from constant corrugations/rutting from traffic during harvest time, causing loss of control and vibrational damage to vehicles. It had a primer seal laid in the previous financial year to improve the road's durability and surface smoothness. This project is to apply the secondary seal treatment (reseal) to the primer seal laid last year to finalize the bitumen surface.	\$242,661	\$242,661	Jan-26	Jan-26

134516-25WA-RTR	WA	Shire of Lake Grace	West Kuender Road (Rural Road)	Gravel pavement is thinning along this section of road, causing the road surface to be slippery when wet for trucks. Road section has minimal crossfall not allowing water to shed to drains. To mitigate surface hazards the pavement will be with proper crossfall and a new primer seal will be applied to give lasting surface traction for trucks. The road section directly to the east of this one had been sealed in previous years, and this project works to extend the sealed network. Gravel of this section of road to 10 m width, then apply a 14 mm primer seal over the top. Will need to be resealed the following financial year. This project is partially funded by Roads to Recovery, with the remaining cost funded by Council.	\$16,567	\$508,205	Sep-25	Nov-25

128389-24WA-RTR	WA	Shire of Morawa	Koolanooka South Road (Rural Road)	Koolanooka South Road provides a connection to the south of the shire and continues into the Shire of Perenjori, currently this section of road is constructed in natural materials and becomes extremely slippery when wet. Widening and improving surface rideability will provide a suitable and safe linkage for road users. Reform sub-grade and gravel re-sheet the road to a thickness of 100 mm with imported materials to provide an 8 metre running surface and an overall width of 10 metres.	\$60,311	\$60,311	Sep-24	May-25

128390-24WA-RTR	WA	Shire of Morawa	Norton Road (Rural Road)	The road is a school bus route, has a higher volume of traffic during harvest, is used by tourists to access Koolanooka Springs when travelling from the south and is currently corrugated and potholed with vegetation growing on the verges. Widening and improving surface rideability and drainage will provide a suitable and safe linkage for road users. Carry out vegetation management to improve sightlines in selected areas, reform sub-grade and then gravel re-sheet to a thickness of 100 mm with imported material to provide a running surface of 8 metres and an overall width of 10 metres.	\$82,419	\$82,419	Nov-24	May-25
128392-24WA-RTR	WA	Shire of Morawa	White Road (Rural Road)	White Road provides an east west connection for farmers moving machinery and is a route used for transporting grain at harvest, currently at SLK 7.41 there is a narrow cutting with poor visibility that is dangerous to oncoming traffic. Widening and improving surface rideability and drainage will provide a suitable and safe linkage for all road users. Excavate the current narrow cutting out to a width of 10 metres, this will require the use of an excavator and rock breaker due to the natural material being large ironstone formation. We will then reform the subgrade and then gravel re-sheet to a thickness of 100 mm with imported material to give a running surface of 8 metres and an overall width of 10 metres.	\$67,315	\$67,315	Mar-25	Apr-25
128398-24WA-RTR	WA	Shire of Morawa	Collins Road (Rural Road)	The road is a school bus route and it's surface is corrugated and potholed with vegetation on verges obscuring vision. Widening and improving surface rideability and drainage will provide a suitable and safe linkage for road users. Complete vegetation management in selected areas to improve sightlines, reform the subgrade and gravel re-sheet to a thickness of 100 mm with imported material to give a running width of 8 metres and an overall width of 10 metres.	\$120,278	\$120,278	Mar-25	Jun-25
128399-24WA-RTR	WA	Shire of Morawa	Stokes Road, Morawa	Currently stormwater flows along Winfield Street under Wubin Mullewa Road onto Stokes Road. The size of the drainage pipes are not large enough to ensure all water is moving through the drain and is accumulating along the road in the commercial precinct. Upgrade the stormwater drainage system, create a under road bypass to direct water to larger channels that will improve the movement of water under Wubin-Mullewa Road and down Stokes Road and to stop water backing up and flooding the commercial precinct areas on Winfield Street.	\$175,740	\$175,740	Jul-24	Jun-25

135018-25WA-RTR	WA	Shire of Toodyay	Picnic Hill Road (Rural Road)	Gravel re-sheet widen existing road from 5.3 m / 6 m to 8 m and address drainage issues. Install an additional 2 culverts and widen existing culverts. Gravel re-sheeting of the existing gravel road to restore pavement strength, improve ride quality, and extend the service life of the asset. As part of the re-sheeting, the road formation will be reshaped to achieve a consistent crossfall, improve surface drainage, and reduce potholing and rutting. The vertical alignment over the existing steep crest will be modified where practicable to lessen the grade and improve driver comfort and vehicle control. To enhance drainage and road safety, existing culverts will be extended to suit the widened formation and an additional two sets of culverts will be installed at identified low points to improve runoff capacity and reduce water ponding on and adjacent to the road. Minor realignments and earthworks will be undertaken to improve line of sight on approach to the crest and any substandard curves, thereby increasing forward visibility for road users. Collectively, these works will improve drainage performance, road geometry, and overall safety for all vehicles using the route.	\$579,000	\$579,000	May-26	Jun-26

4	ACT	Transport Canberra and City Services Directorate	Road resurfacing – Urban – Tuggeranong Parkway	Works include resealing and preparatory work as relevant (e.g., patching). Asphalt overlay and asphalt mill and fill treatments are both in scope for different segments (~50,000m2). These treatments are not considered to be rehabilitation in the ACT. Asphalt resurfacing treatments don't return a road asset to its original standard (i.e., treatment don't reinstate strength of the road, which is likely due to structural issues with the base and/or sub-base layer/s). Asphalt will be mostly Denser Grade Asphalt, 14mm aggregate with a Polymer Modified Binder (DGA14 PMB). Shoulder treatments, through lanes and treatment over bridge structures may be different. E.g. AC14PMB for through lane, AC10PMB for shoulder and AC14PMB over bridge structures. The majority of the works will be focused on the south-bound carriageway. Approximate location is between Cotter Road and Canberra Centenary Trail. See Magenta section in the figure below. Sites with extensive crocodile cracking rutting or roughness due to structural strength issues that may be candidates for rehabilitation are thoroughly investigated and then designed through a separate initiative and are not included in this work schedule. 1	IOT	Cocos (Keeling) Islands Shire Council	Upgrades to parks and community centre - Multiple Locations.	The islands playgrounds currently have limited suitability for use due to the exposure to the heat and sun. Shade sails will enable children and families to utilise the playgrounds not just in the early mornings and late afternoons, but also during the peak of the day. It will protect from harm from sun but also safety of users as equipment tends to get to hot for use. The Shelter at the spot will provide a community gathering opportunity for picnics, observing of wildlife and water sports. The location is also popular with tourists enabling them to maximise the use of this location.	Complete	\$136,739	Nov-21	Jun-22	Community

1	IOT	Shire of Christmas Island	One km sealing of North-South Baseline Road	This unsealed road is utilised daily by heavy vehicles for the mining company as well as provides access from the settled north-east corner of the island to the national parks, immigration centre and mining sites spread out across the island. It is heavily trafficked and unsealed, being a chalk road at present. Combined with the average 2.3m of rain a year, with the heaviest years nearing 6, degradation is quick and severe. The sealing of the road way will save on recurring maintenance grading immediately in the next wet season and beyond.	Complete	\$63,993	Dec-20	Mar-21	Road

1	IOT	Shire of Christmas Island	Phosphate Hill Footpath Completing a dual use walkway between the Drumsite and Poon Saan precincts alongside the ridge Murray Road on Phosphate Hill, Christmas Island. Phosphate Hill is the tallest peak on the settled area of Christmas Island.	There is no pedestrian connectivity between the two precincts. Walkers and cyclists have to walk on the road to move between the precincts currently. There is a dangerous S-bend and other blind corners on Murray Road, which is essentially curves around Phosphate Hill at the ridge.	Complete	\$253,000	Jan-21	Aug-21	Community

3	NAT	Shire of Christmas Island	Foreshore Precinct, Christmas Island, -Lingiari Electorate NT	Project Name: Foreshore Artwork - Category: Painting/Improvement to Community Facilities - Brightening up the 40m blank wall looking over the Foreshore Padang Park area with colour, creativity and community stories. The Shire has just completed a successful public art program 'Our Streets Are Our Museums' which featured 7 walls around the township depicting images from local history. We were looking to continue this public art theme with the LRCI grant by beautifying the Foreshore Padang, which is a leisure and recreation precinct of some size on the Foreshore. The site used to be an outdoor cinema in the past, so we were looking at some creative documentation of that in the artworks to interpret that history onsite. It is also the precinct where the historical Chinese Literary Association resides. Thus the artist will be given a brief to not only make the art fit a rec/leisure precinct, but to also add the dimension of local history and culture to the place.	Complete	\$40,000	Nov-22	Dec-22	Community

1	NSW	Bogan Shire Council	Frank Smith Oval - Upgrades	Frank Smith Oval is used for senior and junior cricket and touch football in summer and soccer in winter. The main pitch does not have a boundary fence which means for cricket a boundary has to be made from rope or poly pipe before the games. There is currently no all-weather shelter at the oval which means players and spectators must sit in their cars or gather under trees in the typically hot summer. There are no existing cricket sight screens on the oval. There is currently no designated pathway through the scrub between the oval and the nearby Dandaloo Street. An all-weather designated path will be used as a regular walking track as well as an access route.	Complete	\$110,000	Mar-21	Nov-21	Community
1	NSW	Bogan Shire Council	Hermidale Park - Upgrade	The village of Hermidale is located between Nyngan and Cobar on the Barrier Highway. It is 50km from Nyngan. The playground and park are very old and the equipment is broken and unsafe. The existing wire fencing is not in good order. This is the only play equipment available for the village children.	Complete	\$30,000	Jun-21	Nov-21	Community

1	NSW	Bogan Shire Council	Local Roads - Re-sheeting 3km	Poor quality deformed pavement allows infiltration of moisture creating wheel ruts and potholes.	Complete	\$76,524	Dec-20	Jan-21	Road
1	NSW	Bogan Shire Council	Lower Bogan River Development	Although the Bogan River flows through Nyngan it has not been recognised by previous town planners as a feature for tourists and residents. In recent years Bogan Shire Council has been gradually developing this area, building a pontoon and a pathway. It has been well received and is a popular exercise and meeting area. Council would like to further develop this area to provide more alternatives for recreation and leisure and to capitalise on the Bogan River. It would also add a new tourism opportunity to the Shire.	Complete	\$130,000	Nov-20	Mar-22	Community
1	NSW	Bogan Shire Council	Netball Oval - Sealing	Nyngan has no all-weather netball courts which rules it out of hosting competitive games. The five grass courts in town were recently improved with lighting to enable weeknight competition, but the grass surface is slippery in winter, and requires constant maintenance and line marking. Netball is a popular sport in Nyngan, but with no suitable facilities for local competition, the teams must travel 160km to Dubbo to compete.	Complete	\$100,000	Nov-20	May-21	Community
1	NSW	Bogan Shire Council	Nyngan Cemetery - Re-fencing	Nyngan cemetery includes a modern irrigated lawn plot which during dry time is invaded by hungry wildlife, particularly kangaroos, which cause damage to gravesites. This is distressing for those who visit, and also makes it difficult for the Bogan Shire to maintain	Complete	\$51,000	May-21	May-21	Community
1	NSW	Bogan Shire Council	Swimming Pool - Water Slide	Nyngan in western NSW has long hot summers, and like many rural and regional towns there is a lack of recreational options for children and youth. Bogan Shire Council would like to install a slide at the pool to enhance the experience for children and youth and to encourage them outside during the summer. Council installed the stage 1 of a water splash play at the pool in 2019 to cater for very small children to make the pool attractive to young families. This project will comprise stage 2 of that with the purchase and installation of four aquatic water play features which can be attached to existing fittings.	Complete	\$200,000	Jan-21	Jul-21	Community
1	NSW	Bogan Shire Council	Upper Bogan River Development	The upper weir area is a popular location for fishing, birdwatching, walking and camping. The site is undeveloped with no amenities. It requires tidying up the existing overgrown vegetation and repairs to the gravel access road. The installation of a toilet block, picnic table, seats, garbage bins and a bird watching platform will make the destination a more attractive and hygienic place for residents and visitors. It will also provide a free of charge option for recreation close to the township.	Complete	\$100,000	Nov-20	Nov-21	Community

3	NSW	Carrathool Shire Council	Refurbishment of Hillston Water Tower Project location: 197 High Street, Hillston NSW 2675 Work category: Other	Hillston Water Tower provides water to the regional community of Hillston. The water tower has exhibited vertical and horizontal cracking which has led to a leak, approximately three quarters of the way up the tower. To alleviate the leak, the tower has been set to not fill past the leak which has resulted in a noticeable loss of pressure in the water distribution network. To rectify the issue and to prolong the effective life of the water tower, the Scope of Works consists of high-pressure water blasting of the interior surfaces, sandblasting of the cracks, the application of relining material and sealing of the interior of the water tower. These rehabilitation works are essential in ensuring the continued operation of this critical water infrastructure component in the Hillston community. Council would like to request a following variation. In addition to the abovementioned works, the contractor has determined that additional essential repairs are needed in order to preserve the water tower and ensure its usability in the future. 1	NSW	Central Coast Council (NSW)	Upgrade of Narara District Skate Park	The Narara District Skate Park will service the Gosford Central and Narara Valley and Ourimbah social planning precincts which are inclusive of 8,263 young people. Consultation undertaken throughout the development of the Central Coast Youth Strategy identified that young people are concerned about their own and other young people's mental health along with their physical health and are worried about the increasing numbers of young people who are overweight and obese. The provision of no cost recreation opportunities such as the proposed upgraded Narara District Skate Park will provide equitable access for all ages to develop physical, emotional, social and cognitive skills. Providing free active facilities helps combat obesity and allows socialisation opportunities for young people from all demographics and socio-economic backgrounds to engage in an unprejudiced environment resulting in improved behavioural development and social integration. The ability to stage low cost or no cost skate events and programs at the upgraded facility will also create an avenue to increase social connectedness and inclusion leading to enhanced positive relationships between community members and a decrease in anti-social behaviours. 1	NSW	Dubbo Regional Council	Dubbo Aquatic Leisure Centre - Upgrades	The Dubbo Aquatic Leisure Centre (DALC) is a well-loved community recreation facility, however it is aging facility and is in need of an upgrade. Recent audits of the Centre's security, lighting and pump room facilities, as well as a number of security breaches that have occurred have highlighted major deficiencies in the safety and security of the site. As previous upgrades have been completed in an ad-hoc manner, parts of the existing lighting and security infrastructure are obsolete and do not meet current environmental standards. Lighting: A December 2020 audit of lighting at the DALC highlighted a safety concern for after-hours use of the Centre. At least half of the current floodlights are inoperative and there is no lighting directed at the public car park, staff car park, splash park or waterslide. No lighting exists outside the entrance to the DALC's new foyer and the current floodlights directed at the 50m pool are insufficient for evening events and carnivals. Replacing the existing Metal Halide Flood Lights with LED Flood Lights will reduce the existing energy use by up to 70% and reduce operational costs - every \$100 it costs to run the existing metal halide lights will be reduced to \$30 if replaced by an LED equivalent. Maintenance costs will be significantly reduced as the proposed LED fittings have a three-year replacement warranty excluding labour and have a life span of approximately 35,000 hours. 2. Security: A November 2020 audit of security at the DALC, as well as two concurrent break-ins, theft and damage to the centre, highlighted major gaps in the current security measures. The audit found that the facility has insufficient, incompatible and outdated security systems, with major sections of the facility (such as the club room and outdoor spaces) lacking even the most rudimentary alarms or	Complete	\$150,000	May-21	Aug-21	Community

1	NSW	Gilgandra Shire Council	Rehabilitation and sealing a section of the existing unsealed Leeches Creek Road at the intersection of Berida-Innisfail and Leeches Creek Road. This section of road is regularly impacted by local floodwaters during periods of heavy and persistent rainfall. This project supports improved road safety outcomes through improved access for road users during times of wet weather, as the section of road becomes inundated and is unsafe for vehicles to drive through the water. The proposed works are in addition to Council's 2020/21 work plan. Expenditure items under the LRCI funding include labour costs and material to deliver the works which are all eligible expenditure items.	Targeted area is regularly inundated by local floodwaters, restricting access for road users and impacting on road conditions.	Complete	\$262,811	May-21	Jul-24	Road
1	NSW	Gilgandra Shire Council	The project involves construction of a concrete causeway over the existing culvert on Doorroombah Road which will support improved road safety outcomes. The proposed works are in addition to Council's existing work plan for 2020/21. This project supports improved road safety outcomes through improved access for road users on an existing unsealed road. Expenditure items under the LRCI funding include labour costs and material to deliver the works which are all eligible expenditure items.	Doorroombah Road is currently unsealed and is impacted during periods of heavy rainfall and prolonged wet weather. The existing culvert is continually being washed away, preventing access for road users. Construction of concrete causeway over the culvert will improve stability of the area, along with improving accessibility, conditions and overall safety for road users.	Complete	\$113,184	Apr-21	Jun-22	Road
1	NSW	Gilgandra Shire Council	The project involves construction of a retaining wall at the existing culvert located on the overflow channel at Paddys Creek. This project supports improved road safety outcomes through enhanced stability of the area and road edges. The proposed works are in addition to Council's 2020/21 work plan. Expenditure items under the LRCI funding include labour costs and material to deliver the works which are all eligible expenditure items.	The existing culvert area is regularly washed out during periods of heavy rainfall, impacting the stability of the area, and the ability for landholders to move farm machinery across it. Construction of the retaining wall will improve drainage and stability of the area, along with improving usability and safety for road users.	Complete	\$21,261	Feb-21	Feb-21	Road
1	NSW	Gilgandra Shire Council	The project involves construction of an approach slab to Milpulling Creek to improve stability of the area. The project supports improved road safety outcomes through enhanced access and improved conditions for road users. The proposed works are in addition to Council's 2020/21 work plan. Expenditure items under the LRCI funding include labour costs and material to deliver the works which are all eligible expenditure items.	The existing causeway over the culvert is being eroded, impacting on the stability of the area and creating a traffic hazard. Construction of the approach slab will improve stability of the area, along with improving accessibility, conditions and overall safety for road users.	Complete	\$21,701	Mar-21	Aug-21	Road
1	NSW	Gilgandra Shire Council	The project involves extending the sealed section to the floodway over Gundy's Creek crossing. The proposed works are in addition to Council's existing work plan for 2020/21. This project supports improved road safety outcomes through improved access for road users during times of wet weather. Expenditure items under the LRCI funding include labour costs and material to deliver the works which are all eligible expenditure items.	Tooraweenah-Mendooran Road is currently unsealed and is impacted during periods of heavy rainfall and prolonged wet weather. Extension of the sealed section to the floodway will prevent longitudinal erosion of the road which is currently occurring in the location and improve stability of the area. Accessibility and overall road condition in the area will also be improved for road users, contributing to overall safety outcomes.	Complete	\$71,567	Apr-21	Jun-21	Road

1	NSW	Gilgandra Shire Council	The project involves the following elements: * redevelopment of the CHC car park area * relocation of the old visitor information building and existing BBQ shelter to the recreation area out the back of the CHC and fronting the Castlereagh River * establish driveable access linking the CHC to the nearby Rural Museum * installation of irrigation system and soft landscaping. The proposed works will improve connectivity and accessibility between the CHC and Rural Museum, linking these two culturally significant spaces and encouraging community interaction and enjoyment of the facilities. The upgraded car parking spaces will be located on the northern side of the CHC, where visitors will be able to clearly observe and experience some of the main upgrade features such as the outdoor deck and Aboriginal garden. The proposed LRCI activities are in addition to Council's 2020/21 work plan and will enhance the overall CHC upgrades. The CHC upgrade project will result in improved functionality of the building and exhibition opportunities, incorporation of our Aboriginal Heritage, and improved accessibility and appreciation of the natural surroundings and view of the Castlereagh River. The proposed expenditure items are all eligible under the LRCI funding including: * labour costs * material to construct the car parking spaces, establish driveable access, landscaping and irrigation systems.	The proposed project will address the inadequate available parking at the CHC and establish linkages between the CHC and Rural Museum as key elements of Gilgandra's Cultural precinct. The existing carpark space will be enhanced considerably, creating designated caravan parking spaces on the western side of the CHC along with car parking spaces on the northern side of the carpark. The CHC and Rural Museum are currently not directly linked, meaning visitors and locals alike are not invited or encouraged to explore past their immediate stopping point. Establishing driveable access and landscaping connecting the two spaces will enhance the general aesthetics and linkages between these two culturally significant facilities. Freedom camping opportunities are currently being explored for Cooee Oval, located between the CHC and Rural Museum, which will enhance the overall opportunities for the Precinct.	Complete	\$92,270	May-21	Feb-24	Community
1	NSW	Gilgandra Shire Council	The project will deliver Stage 2 upgrades to the Armatree War Memorial Precinct within the Armatree Village. The proposed upgrades include soft landscaping, signage board and lighting at the Big Armatree sculpture, along with pathways linking the key elements within the Precinct. The proposed works are in addition to 2020/21 work plans. Expenditure items under the LRCI funding include labour costs, materials to construct the walkway, establish landscaping, installation of lighting and interpretive signage board which are all eligible expenditure items.	Armatree is a small village located approximately 5km off the Castlereagh Highway, north of Gilgandra. Stage 1 of the upgrades to the War Memorial precinct are nearing completion, which includes development of History Boards and the Big Armatree Sculpture in close proximity to the existing War Memorial. LRCI funding will be used to deliver Stage 2 which addresses the lack of wayfinding signage and connectivity between the precinct elements, ultimately creating a circuit for visitors to engage with and learn about the village and district's history. Community safety and sense of place will also be enhanced through improved lighting and soft landscaping features.	Complete	\$78,615	May-21	Aug-22	Community
1	NSW	Gilgandra Shire Council	Undertaking erosion restoration works, including batter and bed scour protection which will improve stability of the area. This project supports stabilisation of Biddon Creek banks, contributing to natural resource management outcomes. Public safety outcomes will also be achieved through stabilisation of the eroded area, which is encroaching on the power lines located in close proximity to Biddon Creek. The project is in addition to Council's existing work schedule for 2020/21. The proposed expenditure items under the LRCI funding include labour costs and material to complete the works, which are all eligible expenditure items.	Biddon Creek at Biddon is a location where heavy rainfall and flood events cause significant damage to the creek channel. Stabilisation of the area will reduce the potential for recurrent erosion issues to occur. A number of power lines in close proximity to the creek are also at risk of falling over, creating a safety concern.	Complete	\$217,035	Jan-21	Jul-24	Road

3	NSW	Lord Howe Island Board	Depot pavement renewal	Lord Howe Island is a remote island in the south Pacific with the local Authority being the Lord Howe Island Board (LHIB) and a community population of around 400 people. LHIB manages numerous Civil Infrastructure Services streams from its operational depot and well as providing community mechanics services from the same space. LHIB depot pavement area is in immediate need of renewal and requires hard stand and resealing to make safe for depot operations – enabling various service delivery streams to operate from this facility such as civil infrastructure reconstructions, maintenance works and vehicle maintenance services. Large failures in the pavement area have expanded over time causing the area to become difficult to manoeuvre machinery such as forklifts in a safe and efficient manner as well as other mobile plant such as cranes, excavators and general light vehicles – all used to delivery works for the local community. The depot is used to house numerous materials and equipment to enable delivery and construction of community assets such as facilities, roads and walkways across the island. It is also used to store both public and private and community building materials that would otherwise be exposed to harsh marine conditions. Other works undertaken at the depot include providing community services such as car registration checks and community vehicle maintenance works - LHIB is the only vehicle registration mechanic operating on the island servicing the populations' vehicle and machinery maintenance needs. If the depots pavement area is not treated soon it may pose safety risks to the local community users. The depot is a multi-purpose facility that without it operating effectively a reduction in infrastructure delivery and maintenance service delivery across the island could occur rapidly. The "Fish Trap" provides us with a perfect structural form to deliver the Murrumbidgee story. With controlled lighting, projected imagery, and interesting sound effects, the visitor becomes part of the river itself. In traditional theatre the audience, the "fourth wall", merely observe the show. A visitor walking through the fish trap has the Murrumbidgee story delivered in three dimensions, creating a memorable immersive experience. • (It was decided that the fish tank posed significant potential operational risk long-term, with the management of live fish, cleaning and maintenance requirements of the tank. It was also felt that this would dissuade people from visiting the John Lakes Learning Centre as they will have already experienced a native fish tank, rather than encourage them to visit. In its place we anticipate a 4D immersive experience that engages the public, and reflects our culture and how it naturally entwines with our waterways and with a feature on the surrounding wildlife including fish. 1	NSW	Orange City Council	Extension of Southern Feeder Road in Orange NSW from Anson Street to Pinnacle Road. The construction of the Civil Works component of a 2km section of the Orange Southern Feeder road between Anson Street and Pinnacle Road. The completion of this section will compliment works already completed on stages 1 and 2 of the overall Southern Feeder road route. Some grant funding has been allocated from Restart NSW however civil construction works have been on-hold pending the sourcing of additional co contributions.	The Southern Feeder Road Stage 4 (Anson St to Pinnacle Rd) serves as a southern city bypass route that links the Northern Distributor Road and forms a ring road around the City of Orange. The road serves a newly created suburb called Shiralee but its main benefit is in reducing the time travelled going through Orange.	Complete	\$720,809	Apr-23	Feb-25	Road
2	NSW	Orange City Council	Southern Feeder Road Stage 4 - Roundabout	Construction of the SFR4/Shiralee Rd Roundabout to trafficable chip sealed surface as component of the SFR4a between Anson St and Shiralee Rd. 3	NSW	Orange City Council	Community cycleway / Footpath extension at Glenroi Oval	Community cycleway / Footpath extension north to connect to existing infrastructure at Glenroi Oval. Council is installing a new footpath to connect up to the existing path network in Glenroi oval to provide access through the precinct to the nearby shopping precinct. The RFQ for works is attached and works are illustrated below. Solar lighting will also be installed along the path to complement existing lighting in the park.	Complete	\$44,603	Mar-22	Apr-22	Community
3	NSW	Orange City Council	Glenroi Oval playground -	Council is creating a district level playground within Glenroi Oval. In line with a district level playground, the equipment has been selected to provide a variety of play options across a wide range of age groups. This places the Glenroi Oval playground at the same level as the popular facilities at Elephant Park and Gosling Creek Reserve. The materials used in the design are generally more robust than standard play equipment so we certainly hope that the playground will be able to withstand a lot of the vandalism that occurs in our parks from time to time. We have included rubber softfall in higher wear areas (e.g. under swings and slide exits) to reduce maintenance requirements. Total investment for supply and install is \$170K. Council is contributing \$120k to the project.	Complete	\$50,000	Jul-22	Dec-22	Community
3	NSW	Orange City Council	Southern Feeder Road (Stage 4 – Anson St to Pinnacle Rd)	The Southern Feeder Road (Stage 4 - Anson St to Pinnacle Rd) is the next stage in a six stage process to develop Orange's Southern Economic Development Corridor, a strategic east-west link to, from and around the city. The Corridor is vital to Orange City's future economic growth and regional strength. The Southern Feeder Road (Stage 4), will increase freight and traffic efficiencies. Safety, connectivity and productivity for the city and region more broadly will be improved. The road will take traffic off indirect and inefficient routes through residential streets or the heavily congested Mitchell Highway/main street. It will improve access and connection to key employment precincts and the city's newest 1800-lot residential suburb.	Complete	\$1,241,618	Apr-23	Feb-25	Road

3	NSW	Orange City Council	Youth multipurpose sporting area	10 sports in 1 to be constructed in Moulder Park using an old netball surface. A Rage Cage is an all ages, all-in-one permanent outdoor sport and recreational complex that is designed to incorporate over ten of the most popular Australian and International sports. 4	NSW	Orange City Council	CLERGATE ROAD STAGE 3	REHABILITATION - Upgrade of existing section of Clergate Road from Industry Drive to the north. The length of Clergate Road Stage 3 road being constructed is 600 metres	Complete	\$415,778	Nov-23	Jan-25	Road
1	NSW	Parkes Shire Council	Alectown Cemetery - fencing, memorial wall and seating	There is no current 'fit for purpose' space in which cremated remains can be interned. Meaning that people who choose cremation over burial are unable to be interned within their own community but rather at either the Peak Hill cemetery (to the north) or the Parkes cemetery to the south. The erection of a fence and Memorial Wall will alleviate both issues	Complete	\$30,000	Sep-20	Mar-21	Community
1	NSW	Parkes Shire Council	Cooke Park - Improvements	Cooke Park is Parkes' premium event park. One of the challenges that we face during events is if there has been rain the Park can be very wet and we have had to bring in bark chip in the past to allow events to go ahead. Improving the storm water drainage across the park will help alleviate the problem. Additionally, the irrigation system in the park is nearly 20 years old, the aging infrastructure is prone to leaks and breakages and is not as water efficient as it could be. Additionally, Council is constructing a new multipurpose stage facility in the Park which will create the opportunity for water to be captured off the roof and reused in the Park. It is timely that Council upgrades the irrigation system to minimise water usage in the park and allow for the preparation of events in the Park (including the Parkes Elvis Festival) but also help with the recovery of the park after events.	Complete	\$80,000	Sep-20	Feb-21	Community
1	NSW	Parkes Shire Council	Henry Parkes Centre repairs	There are a number of areas within the Motor Museum where a gap exists between the wall and the roof. As a result, unwanted debris (e.g. dust and leaf litter) blows into the facility, settling on the vehicles on display and onto the floor. Additionally, there is no a/c in the Motor Museum which, given the extremes of temperature experienced at its location, does nothing to enhance the visitor experience.	Complete	\$50,000	Apr-21	Nov-21	Community
1	NSW	Parkes Shire Council	Newell Highway and Rawson Street Parkes - road and footpath repairs	To address flooding concerns with new drainage pit, extend footpath network for accessibility for all community members and pram ramps to assist with crossing the road safely.	Complete	\$66,000	Jan-21	Dec-21	Community
1	NSW	Parkes Shire Council	Parkes CBD smart pole banners	The traditional banner systems which Council has installed on existing lighting poles in other sections of the street, requires the procurement of a suitably qualified contractor to undertake the changing of the banners each time a new event or campaign is in market. This includes time and cost in the development of traffic management plans, safe work method statements, machinery hire and staff time in terms of procurement and supervision. Because of these time and cost factors (up to \$10,000 annually), along with disruption to commerce on the main street during changeover, Council can only change these promotional banners twice a year.	Complete	\$30,000	Nov-20	Jun-21	Community
1	NSW	Parkes Shire Council	Parkes East School - pedestrian safety upgrades	Currently parents are either stopping in the middle of a busy regional road link to drop off and pick up students or causing near misses to park their cars at the edge of the school which is without a proper parking area.	Complete	\$200,000	Jan-21	Apr-21	Road
1	NSW	Parkes Shire Council	Parkes Shire Council - Coventry Room - cultural space refurbishment	Ongoing need for a dedicated community art space for workshops and the exhibiting of local and travelling exhibitions. At present there is no suitable purpose-built facility in the Parkes Shire that can adequately provide for exhibitions of local artists' work, professional or touring exhibitions, cultural performances, Aboriginal arts and cultural practice or exhibitions, cinema or venue for screenings, programs of community workshops, cultural hub for young people.	Complete	\$100,000	Oct-21	Feb-22	Community

1	NSW	Parkes Shire Council	Parkes Shire Library and Cultural Centre - Wiradjuri Keeping Place	The Parkes Library and Cultural Centre will provide a welcoming and inclusive cultural hub where Indigenous and non-Indigenous groups and individuals can meet and where Wiradjuri cultural expression is visible and celebrated. This project involves curation of a public display of local Aboriginal artefacts, development of digital and print educational materials to detail local Wiradjuri history.	Complete	\$85,000	May-21	Feb-22	Community
1	NSW	Parkes Shire Council	Peak Hill main street (Caswell Street) - CCTV installation	The CCTV cameras are being installed to address issues of vandalism and anti-social behaviour which has become an increased concern in the CBD of Peak Hill. The cameras will provide increased security for community members and businesses alike.	Complete	\$20,000	Jan-21	Jun-21	Community
1	NSW	Parkes Shire Council	Rose Street and Coleman Street Parkes - footpath	The new shared pathway will mitigate stormwater damage caused to current walking area which makes it uneven and dangerous. The new pathway will also connect this area to existing pathways to the CBD.	Complete	\$35,000	Apr-21	Jun-21	Community
1	NSW	Parkes Shire Council	Spicer Oval Parkes - new lighting	Spicer Oval is currently without any lighting and is unable to host any training at site for rugby in winter or cricket in summer. These sports are now sharing North Parkes Oval with Little Athletics and AFL.	Complete	\$400,000	Oct-20	Nov-21	Community
1	NSW	Parkes Shire Council	Woodward Oval Parkes - tennis courts upgrade	All courts now require resurfacing, 6 of them urgently (according to advice from Tennis NSW). Project will provide a safe and fit-for-purpose facility for the local community and visiting players during regional tournaments, sporting and school events, social tennis and local competitions - supporting more than 1000 players. The courts are now too dangerous to use and some have needed to be closed.	Complete	\$175,000	Feb-21	Jun-21	Community

2	NSW	Strathfield Municipal Council	Fragrant Garden Strathfield District Park Mitchell Street, Strathfield	Community – Landscaping Improvements Community Infrastructure – other The Strathfield District Park is an area that was formerly a golf course and is being converted to meet the active and passive recreational needs of residents and visitors from surrounding areas. The Park is surrounded by medium and high density housing. To date, the community needs for active recreation are being met through walking and bicycle routes through the park, extensive parkland areas that allow for personal exercise and “workouts” and it is planned that in the future, there will be a number of hard courts constructed for mainly ball sports. The park also adjoins Council’s Golf Driving range that is constantly patronised. In terms of areas for passive recreation such as family gatherings there are extensive lawn and BBQ areas, a feature lake and currently under construction with Federal funding support is an amenities facility that will allow for extended stays. For children with disability and their carers Council is constructing a Maze and play area that will be available to all children, regardless of their abilities. The missing component of this park is an area for singular, quiet passive recreation that would appeal to older residents or those needing to access a peaceful and stimulating area. The Fragrant Garden will provide this space and allow Strathfield District Park to respond to the health and wellbeing needs of all residents	Complete	\$801,335	Sep-21	Apr-22	Community

1	NSW	Wingecarribee Shire Council	Church Road Oval Amenities Building, The Church Road Oval is Council's most utilized soccer field in the district and is used by the 1,600 registered participants to the Highlands Soccer Association. The Church Road Oval Amenities Building Refurbishment project is designed in 2 stages. Stage 1 is currently funded and programmed for delivery in 2020/21 in Council's capital works program. The works commenced in August 2020. Stage 2 is fully designed and shovel ready, but remains unfunded. Stage 2 works include construction of the second story clubhouse, access ramp, provision of awning and conversion of existing public toilets to storage. Should this funding application be successful, it would enable Council to construct the second stage of the amenities building immediately.	Currently there is no indoor training facility on site to facilitate rainy-day training and strategy sessions. The construction of the second story clubhouse will provide an indoor venue for rainy day training. Further, the planned improvements include an access ramp to the first floor, kitchenette and awning. This will provide access to people with disabilities and carers pushing prams. 1	NSW	Wingecarribee Shire Council	Eridge Park Netball Courts	The courts are at the end of useful life and are in poor condition with significant cracking present. One court has been closed due to safety concerns, which has reduced Netball's playing courts and is impacting their members. Netball is the leading women's sport in the Southern Highlands comprising of over 420 females in the reduced 2020 competition. To continue another season on minimal court availability could see a downturn in membership and reduces the ability of Southern Highlands Netball Association (SHNA) to hold mini-carnivals that can bring players and monies to the local district. SHNA have part funding to complete the required court renewal through a mixture of grant funding and fundraising by the Association. They have appealed to Council to help fund the shortfall to successfully complete the court renewal immediately.	Complete	\$80,000	Dec-20	Feb-21	Community
1	NSW	Wingecarribee Shire Council	The Mittagong SES Volunteer Centre building repair and refurbishment project is to replace roofing, address structural issues, improve storm water drainage and construct a retaining wall to restore the centre. NSW SES members work closely with residents to build stronger, more resilient communities to reduce the impact from natural disasters. The volunteers in the Wingecarribee SES have for several years regularly conducted community resilience programs. These public programs have included local initiatives such as the award winning "Get Ready Girls" program that builds confidence in local women and their resilience skills along with the "SES Youth Forum" a program informing youth on safety measures in times of emergencies. The local SES have in the past have made their training room available to Council, Police and other emergency services for bookings as well as local community organisations. It is also an alternate Emergency Operations Centre available for use by the by the Local Emergency Management Committee. The community service provided by the Mittagong SES Volunteers cannot be understated. They have responded to an average of 473 requests for assistance per year over the past 4 years related to floods and storms. The Wingecarribee Shire residents rely on the SES volunteers for emergency response. Due to water intrusion and mould issues as well as structural defects, the volunteer centre cannot be safely occupied and the community programs and volunteer training cannot be held. By restoring the centre for safe use, these programs will be able to continue.	Due to stormwater and drainage issues for the building and site, water ingress has resulted in mould contamination to several rooms within the centre. At present, the offices cannot be safely occupied. Further, a structural issue with the converted garage walls has been identified by a structural engineer and requires rectification before the area can be safely reoccupied. 1	NT	Tiwi Islands Regional Council	Painting/Improvements to community facilities	Refurbishment of pool chlorination and filtration system to correct leaking piping from pool to filtration system. System is not functional, settling tank leaking and community pool not open. This project will cease due to the issues surrounding the upgrades to the pool (Phase 3 project – also ceased). The pool after investigations needs to be removed and replaced with a new pool and TIRC doesn't have the funds to undertake this. Meetings have been held with funding bodies to collaborate on a joint project for a precinct redevelopment in which a decision will be made if a pool is the most viable option for the area. Hence, we want to repurpose the remaining funding.	Complete	\$33,929	Feb-23	Jun-23	Community

2	QLD	Brisbane City Council	Scooter Track, Coorparoo Common, Cambridge Street, Coorparoo: Playgrounds and Skate Parks	Coorparoo Common is a district general recreation park that is not currently serving the community to the standard expected of a district park. Council has received petitions from the community to develop a scooter or BMX facility at this park. The potential for this development was first identified in the Norman Creek 2012-2031 Master Plan and is yet to be realised for the community benefit. The scope of works includes the design and construction of a new BMX/scooter track of approximately 200 metres to increase recreational opportunities for residents and visitors. This track will complement the adjoining skate facility and will include a range of challenging features to improve skill and fitness of riders.	Complete	\$407,238	Sep-21	Apr-22	Community
2	QLD	Brisbane City Council	Seven Hills Hub, Tallowood Street, Seven Hills: Painting/ improvements to community facilities	This community enhancement project will significantly improve the quality of adjacent landscaping, providing complimentary use to an existing community facility. The gabion retaining walls that surround the Seven Hills Hub Outdoor Amphitheatre have deteriorated and require replacement. Presently, the area is currently unable to be used due to safety risks. The scope of works includes replacement of the gabion walls.	Complete	\$110,710	Sep-21	May-22	Community
2	QLD	Brisbane City Council	Sports field Lighting – Package 2, Multiple Locations: Sporting and recreation facilities	Phase 2 proposal is a continuation for additional community facility sites to the Phase 1 LRCI approved works. The aim of this additional package is a continuation of the need to identify and rectify high risk electrical faults/issues at additional sporting clubs across Brisbane, ensuring the safety of community as a whole and assisting grass roots clubs with ongoing electrical maintenance costs. This scope of works includes the auditing of electrical infrastructure for up to 60 sporting clubs across Brisbane and the rectification of high-risk items identified as part of those audits.	Complete	\$1,685,000	Sep-21	Feb-22	Community
2	QLD	Brisbane City Council	St Vincents Road, Banyo: Reconstruction	Existing road surface is showing signs of aging with localised failures. The scope of works includes resurfacing of approximately 7560m2 of existing road surface on St Vincents Road.	Complete	\$928,000	Oct-21	Nov-21	Road

2	QLD	Brisbane City Council	Toorak Road, Hamilton: Rehabilitation	This rehabilitation project is improving the asset life and ensuring preventative safety improvements of the community. The upper section of rock slope is unstable and water barriers are currently in place to prevent material from falling onto the road, which is also restricting footpath access and movement. Vegetation clearing and scaling of loose material is required, followed by the installation of rockfall protection mesh and dowels to reinstate the footpath area in the road reserve. The scope of works includes embankment repairs along a section of approximately 60 metres.	Complete	\$386,093	Oct-21	Jun-22	Road
2	QLD	Brisbane City Council	Tooth Avenue, Paddington: Reconstruction	Existing pavement along Tooth Avenue is exhibiting signs of wear and aging. 2	QLD	City of Gold Coast	New Proposed Project Ron Penhaligon Way, Robina (Cheltenham Dr to Manly Dr)	The Road Rehabilitation and Reseal Program is the primary renewal program to address surface renewal demand. This program identifies roads in accordance with the Traffic Assets Management Plan and the Sustainable Road Pavement Management Plan. Preventive maintenance is the single most influential component in the network strategy that allows the Council to manage pavement condition. It creates the ability to postpone costly reconstruction or rehabilitation activities, by extending the remaining service life of the original pavement. The effectiveness of long-term preventive maintenance and rehabilitation is based on asset life cycle performance, asset rehabilitation program and life cycle costing. A significant benefit of a comprehensive pavement preservation and proactive maintenance program is that it manages future network condition and funding requirements, thus reducing whole of life pavement construction and management costs. Condition assessment undertaken in March 2019 on a 375-metre section of Ron Penhaligon Way, Robina identified heavy ravelling, wheel path cracking and rutting with an average PCI of <5. Given this result and applying the prioritisation criteria detailed above, this road is priority for immediate intervention. The proposed section for rehabilitation is between Cheltenham Drive and Manly Drive, is 10m in width with two active traffic lanes and a small width shoulder. Ron Penhaligon Way is a residential collector road and facilitates a bus route. The proposed rehabilitation scope is 4,250m2 of asphalt consisting of a 50mm structural layer and a 50mm wearing course (total depth 100mm).	Complete	\$331,247	Oct-21	Oct-21	Road
2	QLD	City of Gold Coast	Path Improvements Galleon Way Currumbin Waters	Construction of a missing section of path on the eastern side of Galleon way from the existing path at Merv Craig Recreational Park to the existing path adjacent to Beaumont Court. Length 690m, width 2.5m. There is no existing facility. Council is proposing to swap the 'Shared Path Gilghai Road' project with this Galleon way project, as there is a current development approval adjoining the location of the proposed footpath along Gilghai Road. Commencement of construction of the proposed development is unknown. Should the Gilghai Road footpath be constructed, it is likely that it will be demolished as part of the proposed development infrastructure works. The Galleon Way works will be in-situ for many years to come once constructed and is not as vulnerable to new development. The Galleon Way project can be constructed before the end of December 2021. 3	QLD	City of Gold Coast	42 Marine Parade, Southport Footpath Renewal	Renewal of Footpath (including equitable access for all users) Renewal of the footpath directly outside the eastern frontage of Australia Fair shopping centre to address the asset's end of life renewal and accessibility standards. The project is 240 metres long along the full eastern frontage of Australia Fair Shopping centre and includes replacement of the hardstand that fills the full width of the verge, width varies from 2.5 metres to 5 metres. The path will comply with AS1428.1 for Access and Mobility to provide equitable access for all users. The existing brick pavement is in poor condition, presenting loose and cracked bricks which over time have become difficult for City Maintenance to replace when damaged. This asset does not meet current pathway standards and is not DDA Compliant, limiting access and use for those with a disability.	Complete	\$1,200,000	Apr-23	Jun-24	Road
3	QLD	City of Gold Coast	Alexander Drive, Highland Park Footpath	Replacement of Footpath (including equitable access for all users) This project is to replace an existing non-compliant existing footpath. The current footpath is 1.5 metres wide and has a steep crossfall that makes use by people with mobility challenges or in wheelchairs challenging and potentially unsafe. The driver of this project is to correct the footpath crossfall to improve outcomes for equitable access along the southern side of Alexander Drive between Quigan Terrace and Cozens Way. The correction of the footpath crossfall requires modifications to the verge, parking lane and private driveways. The footpath carries significant pedestrian traffic towards William Duncan School and nearby Medical Facilities. The path will comply with AS1428.1 for Access and Mobility to provide equitable access for all users.	Complete	\$1,600,000	Dec-22	Dec-23	Road
3	QLD	City of Gold Coast	Burleigh Waters Community Centre Improvements	Improvements to Community Facilities The Burleigh Water Community Centre is City-operated to provide a range of hireable spaces for local community benefit. The facilities and finishes are reaching end of life resulting in high maintenance and cleaning costs as well as reduced visitor experience. The scope of work is to refurbish the kitchen and amenities, replace the flooring and repainting to extend the asset life and improve the customer experience. This project was identified to replace the Varsity Lakes Improvement project after the previously proposed project was found to have enhanced delivery risks due to the changed planning conditions (since the building was built) and the integrity of the building footings which could jeopardise completion within the program guidelines. 3	QLD	City of Gold Coast	Tallebudgera Creek Boardwalk Renewal and Upgrade	Renewal and upgrade of boardwalk The project will renew and upgrade the boardwalk on the southern bank of Tallebudgera Creek which forms a connection between the Oceanway and the shared path that runs through the Tallebudgera Creek Park. Previous remediation works, involving replacement of the substructure, were undertaken 12 years ago to extend the life of the timber structure. In early 2021, temporary protection works were undertaken to protect part of the structure from scouring of the creek bank. Recent condition assessments have shown the structure is approaching the end of its useful life. The project will upgrade the boardwalk to a more suitable standard to improve its capacity and align with future works in the area, including the GC Light Rail off-corridor active transport projects. The replacement boardwalk will be widened from 2 to 4 metres and will include a viewing platform along part of the boardwalk to allow users to step to the side of the pathway to experience views of the creek, Burleigh Headland and the ocean. Permanent scour protection works will be installed at the location of the recent temporary works.	Complete	\$2,473,650	Feb-24	Jun-24	Combination

1	QLD	Croydon Shire Council	Croydon Heritage Precinct - upgraded fencing	Croydon's renowned Heritage Precinct is a hot spot tourist attraction comprising of an original Court House, Town Hall, Police Residence and Police Station with Gaol House. The buildings are maintained to preserve their historical accuracy and are complemented, at the eastern end, by a traditional white picket fence with working replica lamp posts and original sandstone kerbing. The rear area of the buildings, at the eastern end, are secured with high colorbond fencing which provides privacy for neighbouring residential buildings. Whilst the working replica lamp posts and original sandstone kerbing continues to the western end of the precinct the fence does not. The current western end fencing is dilapidated and does not complement the existing eastern end fencing which supports the heritage look and feel of these beautiful old buildings, whilst ensuring privacy to the adjoining residences. The western end fence upgrade will promote tourism to the entire precinct whilst completing and preserving the history and heritage of the town of Croydon.	Complete	\$145,000	Oct-20	Jun-22	Community

3	QLD	Goondiwindi Regional Council	Inglewood Reservoir Mixer Installation Inglewood town reservoirs	Installation of a WEARS reservoir mixing system and chlorine dosing system to the Inglewood town water reservoirs. The combined storage capacity of Inglewood's two reservoirs is 2.45 ML and serves a population of approximately 850, with an average daily water demand of approximately 420 kL/day. During low demand periods, the treated water reservoirs can experience very low turnover, leading to a degradation of the stored treated water quality and causing difficulty in maintaining the residual chlorine concentration required to ensure effective disinfection and safe drinking water. Disinfection is currently achieved by dosing chlorine at the WTP, immediately downstream of the point where filtered surface water and bore water are blended. Because of the need to maintain chlorine residual in the potable water rising main and ensure adequate chlorine residual in water leaving the reservoir during low demand periods, chlorine is dosed at a higher rate than would otherwise be required. This leads to potential consumer complaints during high demand periods, when the chlorine rapid reservoir turnover means that water with higher than usual chlorine concentration can enter the reticulation system, as well as the increased potential for the formation of disinfection by-products during low turnover periods, and increased cost due to excessive chlorine consumption.	Complete	\$255,000	Mar-22	May-24	Community
3	QLD	Goondiwindi Regional Council	Inglewood Rising Water Main Replacement Corner of Chilcott and Callandoon Streets, Inglewood	The project is to replace a non-serviceable existing potable water rising main which is one of a pair connecting the Inglewood WTP with the storage reservoirs, and the storage reservoirs with the reticulation system. The replacement potable water rising main will be 680 m in length, constructed from 250 mm HDPE and will be bored under Macintyre Brook. The project will significantly reduce the major risk of water supply interruption due to failure of the single remaining main; as well as allowing GRC to pump to the reservoirs and release to reticulation simultaneously, addressing GRC's current limited ability to maintain supply under high demand conditions or to meet firefighting demand if required.	Complete	\$600,000	Mar-22	Mar-23	Community
3	QLD	Goondiwindi Regional Council	Recreation St Drainage Improvements Recreation St, Talwood	The Recreation Street Drainage Improvements Project in the regrade of open storm water drains to improve urban storm water drainage as a solution to street flooding issues in Recreation Street, Talwood. This will include the installation of culverts, kerbing, guttering and other relative activities with purpose of improving drainage for the area. In its current state, Recreation Street is prone to extensive impact from flooding during significant rain events, with water covering large portions of the road (including at the main access to the town's only school), resulting in silt deposits and infrastructure damage, The Recreation Street precinct is a local hub for tourism, providing the only access to the Talwood Recreation Grounds, which is utilised by tourism visitors as well as travelling workers during peak farming activity times.	Complete	\$12,000	Mar-22	Nov-22	Road

3	QLD	Goondiwindi Regional Council	Talwood Recreation Grounds Improvements Recreation St, Talwood	The Talwood Recreation Grounds is a hub for community activity for that area. It serves as a sporting oval, camping grounds for travellers and a playing space for children. The last major works on the facility occurred in July 2018, with an installation of new playground equipment. Through community consultation, it has been identified that improvements to the facility are required for the community moving forward. Specific improvements include the installation of bollards at the playground, design and installation of signage and landscaping improvements in the recreational grounds area. The key benefits of this project to the town incorporate town beautification and improved local aesthetics and subsequent enhanced tourism support.	Complete	\$25,000	Mar-22	Oct-22	Community
3	QLD	Goondiwindi Regional Council	Texas Reservoir Mixer Installation Texas town reservoir, Stanthorpe-Texas Road, Texas	Installation of a WEARS reservoir mixing system and chlorine dosing system to the Texas town reservoir. During low demand periods, the treated water reservoir experiences very low turnover which leads to the degradation of treated water quality and causes difficulty in maintaining the residual chlorine concentration required to ensure effective disinfection and safe drinking water. Disinfection is currently achieved by dosing chlorine immediately downstream of the WTP filtration stage and prior to treated water entering the town reservoir. Because of the need to ensure adequate chlorine residual in water leaving the reservoir during low demand periods, chlorine is dosed at a higher rate than would otherwise be required. This leads to potential consumer complaints during high demand periods, when the chlorine rapid reservoir turnover means that water with higher than usual chlorine concentration can enter the reticulation system, as well as the increased potential for the formation of disinfection by products during low turnover periods, and increased cost due to excessive chlorine consumption.	Complete	\$175,000	Mar-22	May-24	Community
3	QLD	Goondiwindi Regional Council	Veronica Ave Pavement Rehabilitation 1-29 Veronica Ave, Goondiwindi	The Veronica Avenue Pavement Rehabilitation project is the reconstruction of failed urban pavement in Veronica Avenue, Goondiwindi. This will restore trafficability of the residential street. In its current state, the Veronica Avenue road is in state of deterioration, and has ongoing significant maintenance costs. The project will alleviate the ongoing costs associated with repair and reduce the amount of complaints from residents pertaining to the ongoing issues. [Decrease due to savings. Reallocating funds to new Project 13]	Complete	\$300,000	Mar-22	Sep-23	Road
3	QLD	Goondiwindi Regional Council	Wild Dog Check Fence Replacement As per coordinates	This project is to replace sections of the wild dog check fence in key strategic locations within the Goondiwindi Region. Our local economy benefits from a diverse agricultural sector, and invasive animal pests have a wide variety of impacts on the economy, the environment and society. The Goondiwindi area has witnessed increasing agricultural losses because of vertebrate pests such as wild dogs. The Wild Dog Check Fence is strategic infrastructure which is pivotal in protecting our Landholders from the potential impacts of Wild Dogs. It gives them the confidence to still run small stock in our region, adding to the diversified nature of our agricultural sector. The ongoing maintenance costs associated with the check fence's deteriorating condition is increasing, along with the risk of wild dogs breaching the fence line. This will result in significant impact to local livestock producers.	Complete	\$381,106	Mar-22	May-23	Community

1	QLD	Gympie Regional Council	Amamoor Creek Road	The section of road experiences a high volume of traffic that travels between the townships of Amamoor and Dagon (471 vpd in 2019). The road is a narrow bitumen sealed road that experiences continual shoulder wear. The existing road seal width is insufficient for two cars to pass forcing vehicles to use the unsealed portion of the carriageway. These factors are amplified when road conditions are adverse erg. rain or heavy fog. Additionally, once a year the road experiences high tourist traffic attending the Gympie Country Music Muster at Amamoor State Forest (2,000-5,000 vpd).	Complete	\$153,162	Feb-21	Apr-21	Road
1	QLD	Gympie Regional Council	Brooloo Township road works	The township has experienced recent growth. Sections of the road network are currently unsealed and adjacent houses are experiencing increased dust issues due to the additional traffic. A steep section of Henry Street (unsealed) also experiences table drain scouring due to the road grade and limited controls.	Complete	\$335,000	Jan-21	Feb-21	Road
1	QLD	Gympie Regional Council	Eel Creek Road	A combination of high speeds, high volume, heavy vehicles, narrow road seal width with unsealed shoulders contribute to the factors that cause issues along this section of Eel Creek Road. The existing road seal width is insufficient for two heavy vehicles to pass forcing vehicles to use the unsealed portion of the carriageway. These factors are amplified when road conditions are adverse e.g. rain or heavy fog.	Complete	\$350,000	Apr-21	May-21	Road
1	QLD	Gympie Regional Council	Excelsior Road Footpath	The section of grassed verge experiences a high volume of foot traffic that goes between bus stop and local shopping centre, to the local Community Centre. A number of users are within motorized wheel chairs and experience issues with the current grassed verge (wet slippery grass, uneven ground). The path will complete a missing link and provide accessible connection along the eastern side of Excelsior Road. The route provides access to the Gympie Community Hub via Dent Lane. A local access advisory committee has previously raised the issue with Council.	Complete	\$17,491	Nov-20	Apr-21	Community
1	QLD	Gympie Regional Council	Mellor Street Footpath	The section of footpath experiences a high volume of foot traffic that goes between the adjacent attractors such as the Town Library, Town Hall, A Childcare Centre and the Gympie Civic Centre. 1	QLD	Gympie Regional Council	Rocks Road (Pie Creek)	A combination of high speeds, substandard horizontal and vertical curves, inadequate sight distance, narrow road seal width with unsealed shoulders contribute to the factors that cause run off road crashes along this section of Rocks Road. The existing road seal width is insufficient for two cars to pass forcing vehicles to use the unsealed portion of the carriageway. These factors are amplified when road conditions are adverse e.g. rain or heavy fog. Additionally, there are sections where heavily vegetated areas are within the clear zone and also reduce visibility.	Complete	\$455,000	Mar-21	Jun-21	Road
2	QLD	Gympie Regional Council	Albert Park Touch Carpark Upgrade	Off Road Carpark. Albert Park is home to the Gympie Touch Association among other community sports groups, and provides direct access to the River to Rail Trail. The existing car park allows for informal car parking, which leads to inefficient use of the available area. This project aims to upgrade the sealed carpark to formalise car parking and provide a more efficient use of the available area.	Complete	\$120,000	Jan-22	Feb-22	Combination
2	QLD	Gympie Regional Council	Laminex Road - Rehabilitation	Laminex Road is a sealed rural local road primarily servicing the Toolara State Forest and Laminex Manufacturing Plant. Sections of the road pavement and surfacing is failing under the heavy vehicle loads experienced by this road, resulting in higher ongoing maintenance costs for Council. This project aims to improve heavy vehicle movements through curve widening, rehabilitation of the failing pavement and surfacing, and reduce ongoing maintenance costs on Laminex Road.	Complete	\$246,000	Feb-22	Mar-22	Road
2	QLD	Gympie Regional Council	Mellor Street Pathway – rehabilitation	Mellor Street is a key pedestrian link within the Gympie CBD, linking Mary Street with the Gympie Library and Civic Centre and other significant attractions. 3	QLD	Gympie Regional Council	Excelsior Road Rehabilitation & Pathways	Excelsior Road beyond Hyne Street is a sealed urban local street servicing several local businesses and provides access to the River to Rail Trail. Insufficient stormwater drainage provisions and poor road construction has resulted in this section of road becoming hazardous to road users, pedestrians, and users of the River to Rail Trail. To resolve the above issues, this project aims to: - construct a new sealed cul-de-sac; and - construct new concrete pathways to improve pedestrian connectivity to the River to Rail Trail and the Gympie Community Place. This project aligns with eligible LRCI work categories: - Road Reconstruction; and - Bicycle and Walking Paths. Note that this project was initially funded as a Phase 2 LRCI Project. Relocation of a power pole has delayed commencement of construction (refer Council minute M07/12/21) and therefore it is requested this project as approved for funding as a Phase 3 LRCI Project.	Complete	\$505,000	Jul-23	Jun-24	Road
3	QLD	Gympie Regional Council	Gympie river to rail trail and canoe launch point post-flood restoration	The River to Rail Trail in the centre of Gympie is great for walking and cycling. 2	QLD	Logan City Council	18-22 Wharf Street and 17-23 Logan Street., Logan Village Qld 4207: Landscaping Improvements, Sport and recreation facilities, Drainage	Landscape improvements and upgrade of the Village Green. Key focus is to improve overall drainage and lighting for the Logan Village Green to facilitate activation of the space. There are significant drainage issues with the Logan Village Green that need to be resolved to enable access for events and allow for delivery of improved amenity and functionality. Provision for lighting, mature tree planting, the circular walkway and avenue of honour are key elements to be delivered incrementally as part of the Logan Village Green works. Funding contribution by Council increased due to increased costs relating to some of the deliverables such as lighting and drainage infrastructure. The drainage and landscape work also required the relocation of the existing basketball court and formalising the existing car park to provide access to the upgraded Logan Village Green as part of the contract to deliver on the Logan Village Green Master Plan outcomes.
