

Subject: Anti Nuclear Submission
Date: Friday, 12 March 2010 11:41:04 AM

To Whom It Concerns,
Why oh why is the world hell bent on destroying itself with so many
forces and one sure fire way and source is
pollution from the Nuclear industry..... We all know the harth
life of nuclear waste is thousands of years
yet the industry just plunders on regardless.....Australia can make
a stand and not accept to store nuclear waste

This will take a lot of guts to do because of political pressures and
more, but now is the time to say No to nuclear waste storage.

Regards,
Michael Brereton
