

Regulator of Medicinal Cannabis Bill.

I am writing to you in regards to the legalization of medicinal cannabis for all the sick and dying Australian children and adults. I personally suffer seizures as a side effect of ADHD & Anxiety medication as I suffer from ADHD/Anxiety and also high functioning autism (aspergers). Now I can tell you the only reason I am able to write and stay focused this morning on tasks such as this aswell as my degree in modern neuroscience.. is because of medicinal cannabis.

I have a gorgeous 6yo daughter whom someday I can barely get myself out of an anxiety attack or depressed state of mind in order to go and play and enjoy the weekends with my daughter. This brings me to tears more and more each day that the government is allowing this to go on..... we are all so, so very tired, scared for breaking the law and losing contact with our loved ones (I have Adam Koessler on Facebook and he is a broken man from what the QLD government done to him, by restricting his access to Rumer Rose... a truly broken, GENUINE Australian Citizen.)

This needs to be legalized in a safe and well thought out manner but please, I'm asking on behalf of the entire country.

Legalize Medical Marijuana.

Warmest Regards,
