

**Submission regarding Covid19 Vaccination (Prevention of Discrimination) Bill 2022**

My name is Deborah Hamilton and my healthy 21 year old daughter Natalie Boyce died from the Moderna vaccine on the 27/03/22. She is recognised as the 14<sup>th</sup> death in Australia by the Therapeutic Goods Association from the vaccine.

My daughter's workplace was mandated to have all employees have the vaccine as per Daniel Andrews and the Victorian Government rules. Deakin University where she was studying also mandated vaccines to attend. Natalie only had this vaccine to follow these rules so she could continue to work and study.

Natalie was diagnosed with antiphospholipid syndrome and we did not know that there were any risks in having the vaccine as the APS Facebook page posted advice from the Australian Technical Advisory Group (ATAGI) about Covid-19 vaccinations. I remember reading that ATAGI advised that although there are further investigations required, they said to go ahead and get vaccinated. Had we known that there were risks there would have been no way that I would have allowed Natalie to receive another vaccine and I know that she would not of had it either.

I believe people have the right to make their own decisions on their medical rights and should not be discriminated against and forced to have any further Covid-19 vaccines if they do not wish to. There is no way any of my family members or friends will be having any further vaccines with what happened to Natalie. Why should we be mandated to have more vaccines and have to lose our jobs if we don't?

Does the government and Fair work Australia have the right to force vaccines on people especially now knowing that the vaccine has caused deaths and also many injuries? No government should have the power to make decisions on an individual's health especially on a vaccine that is only provisionally approved.

My daughter would be alive today if she was not forced to have this vaccine and I hold accountable the government, ATAGI, the TGA and medical professionals for her death.

My family and I now have to live with this tragedy for the rest of our lives. Our lives will never ever be the same and my daughter's life did matter! No other person in Australia should ever have to go through what we are now going through, so I agree that there should be no discrimination against any employee wishing not to have the vaccine.

Regards

Deborah Hamilton
