

Friday 23 October 2020

Dear Senate Select Committee on Covid-19,

In my evidence to you I wish to advise that I inadvertently listed North Korea as a country using electronic tracking devices. This was incorrect. I meant to say South Korea. (I have no idea what North Korea is up to!)

The three countries I am aware of successfully using electronic tracking bracelets for their returning citizens to monitor quarantine, are Hong Kong, Singapore and South Korea. I do apologise for this mistake,

Kind Regards

Margaret
