

Hi and Hello to Every one

My Name is ..... I came Australia December 2007 I did my pastry course in Melbourne and now I working as a pastry cook.  
I dedicated my life to pastry flour improvement.  
I did 2 baking courses in India.

While studying in Australia, I learn lot off things about wheat flour and flour improvers and wheat flour additives. Due to my Australian pastry education I did Export, flat bread (Mediterranean type bread) improver to India from Melbourne. And now I am consultant for all kind of breads and pastry flour manufacturers in India.

Now I developed a formula for “chemical free bread” it means right now 90% breads coming with artificial food chemicals, additives and improvers (Including Australia). But my formula is having natural grains enzymes only. I am care about society beyond from selfish profit motive. Shortly I think to start my own chemical free bread company in Australia.

I am an active member in Communist Party of Australia (Melbourne Branch) past two years; it is shows my community care.

I applied for TR 485 visa and PR 886 South Australia sponsored visa, I am having wife and 2 kids we missing each other two and half years, towards my chemical free wheat flour dedication for the developed world countries (Including Australia).

But unfortunately immigration policy is killing me in the name of [Migration Amendment \(Visa Capping\) Bill 2010](#).

But one thing all the cooks (we) are not for gaining Visa dramas.

This commission has to know about my kind of peoples dedications towards this society.

Thanks lot for giving this great opportunity to me.
