

Submission to Digital ID Bill

Hello Team

Please find my Submission below and a list of reasons why this Bill should be stopped and scrapped.

1) The Australian Governments are constantly being under Cyber attack from hackers who are always staying ahead of the game. The ATO admits to being attacked at least 60 times a month.

Therefore eAustralian Governments are not capable of keeping Australian public privacy.

What financial compensation do we get from any breaches of privacy?

Who will be held accountable for Breaches and can they be sued by the public?

2) The Government have not made all Australians aware of this Bill. Such an important issue should go to a referendum. The Australian people have not asked for this and have not been thoroughly informed of the negative consequences, including its future transformation into a Social Credit System.

3) This is part of a world wide push from unelected Globalists such as the UN, WEF, IMF, World Bank, and the Digital ID will be part of a Global Digital ID and will be controlled not by Australian Governments. Therefore we will be controlled by foreign powers, who have stated they are fusing with large Global companies, who will benefit financially.

4) As all Australian Governments are Private Corporations engaged in Commerce, a Digital ID will be a Commodity used for financial gain, which we will not profit from, but be limited by.

5) The Australian governments proved that they can't be trusted, as shown in the recent Covid era, where health officials lied stating the Covid Jab prevented people getting the virus, would Prevent the spread, reduce hospital admissions, and prevent people from dying. All were untrue.

6) Even though Katy Gallagher promises the Digital ID is voluntary, that doesn't stop the Government making amendments in the future to make it compulsory.

7) I see Woolworths have made a submission, but it is just their Company Policy which favours their profitability and not the Will of their employees.

As a competent and productive Australian, it is my Will that this this Digital ID Bill be struck down and scrapped, as the negative effects will outweigh any benefits. It is not in my interest or the interest of my fellow Australians.

Thank you, [REDACTED]
