

Committee Secretary

I wish to lodge my objection to the government intention to break up Telstra.

As an Australian citizen for over 60 years my taxes help build this company. I brought share in this company and share a are also held by my MLC superannuation fund. I brought shares in a company that I has already paid for by my taxes over many years.

This is supposed to be a democracy and now we have a government telling a public company that they must break up. This has only happens in a communist company.

This company was built by Australians and we as share holders do not want this company destroyed by a government proposal to split up.

It is a disgrace that the government wants to change the law especially after selling its shares to the public and force the assets back to the government or force Telstra to sell its assets to a third party.

The government has little regard for the shareholders.

The information provided by the government about Telstra have a monopoly is misleading and incorrect.

This is a proposal by Senator Conroy is a disgrace and draconian.

Michael Rosenthal
