

Dear Sir/Madam

The era of burning fossil fuels must end or there will be little or no future for human beings on this planet and we have nowhere else to go.

Educated people understand this and it is just the short term greed of big business and the necessity to constantly reward shareholders that is hiding the future truth.

Arena was set up to do this - **“To improve competitiveness of renewable energy technology, and increase the supply of renewable energy.”**

Let this happen and encourage it. It is criminal not to do so.

With regards

Peter Foster-Bunch
