Subject: Submission - Fisheries Quota System
Date: Thursday, 11 March 2021 3:53:26 PM

To Whom it May Concern,

With regards to the Federal Government inquiry within their Rural & Regional Affairs & Transport Committee review of the current “managed microeconomic systems” my position is;

I am not completely certain that a Quota System is the best way to manage the fishery. However, until you can provide me with detailed information as to how changes will be made & what system will be implemented I wish for the current quota system to remain in place. I would like to know what other options we have to manage the fishery so that we can compare “apples with apples” so to speak, so that I am able to make an informed decision regarding the best course of action for a sustainable industry.

Should you have any further queries, please do not hesitate to contact me

Regards,
Zeb Johnston
