

05/03/2015

Imagine coming home from your morning run, to start peeing blood, and then told you have 12 months to live.

This happened to me.

I am a 48 year old mother, who had everything going for her in March 2013- became a nurse, and only problem was whether or not I could beat my Personal Best!

I am now dying. There is no cure. I have a rare kidney cancer called Collecting Duct Carcinoma, the cancer is so rare, and the doctors have given up on me.

I don't drink or smoke and were extremely fit- until I got this awful cancer in August 2013.

I have researched Medicinal Cannabis Oil and feel this may be my only hope.

I have been taking the oil, which is costly and hard to get, for 9 months now. And I have had NO PROGRESSION. I should be dead by now. But the doctors are amazed about how well I look and I am not suffering in pain.

I don't have a future like you.

Medicinal Cannabis Oil needs to be legalised and available for people like myself.
