**Subject:** Tax on Gas Exports  
**Date:** Wednesday, 8 April 2026 6:31:39 PM

---

To the Select Committee on the Taxation of Gas Resources,

As a retired medical practitioner and mother of/ grandmother of many, I am passionate about environmental issues and believe fossil fuel companies should pay via an adequate tax for the damage fossil fuels cause.

The multinational gas corporations have made enormous amounts of money without paying tax or royalties. Instead, the fossil fuel industries has been heavily subsidized whilst Australians pay high prices for Australian gas.

I support a tax on all exported gas of at least 25%.

I agree to have name and submission be published on the inquiry webpage.

Yours sincerely,  
Hanne [REDACTED]

---

To the Select Committee on the Taxation of Gas Resources,

I firmly believe that a 25% tax on gas exports from Australia is an essential policy that will lessen the deficit and provide energy security for Australians. These companies destroy our environment in the name of essential services that are sold to us for profit.

I agree to have name and submission be published on the inquiry webpage.

Yours sincerely,  
Adam [REDACTED]

**Subject:** Tax the Gas [Uploaded to SCID on 9 Apr 2026 at 8:33 AM]  
**Date:** Wednesday, 8 April 2026 5:32:11 PM

---

To the Select Committee on the Taxation of Gas Resources,

I agree to have name and submission be published on the inquiry webpage.

I find it nothing short of insulting to learn the gas the gas we export is not taxed and of more significance the gas is not primarily for Australian consumption.

Conclusion : tax that which is exported and use the tax for the benefit of Australians and NOT corporate entities.

Yours sincerely,  
Brian [REDACTED]

**Subject:** Resources for Australia  
**Date:** Thursday, 9 April 2026 8:32:17 AM

---

To the Select Committee on the Taxation of Gas Resources,

I agree to have name and submission be published on the inquiry webpage.

Dear Minister,

I'm writing to ask you to support practical reform for all Australian resources. They belong to Australia.

We need domestic price and supply for all Australian resources.

A flat 25 percent tax on all multinational business.

Oil should be refined in Australia. I understand this would be expensive but it would be subsidised by the 25 percent tax.

Improve the Australian Future fund to reflect the Norway Sovereign Wealth fund.

These changes will make real change for average Australians.

#CostOfLivingCrisis #timeforchange #thanks4listening

**To:** [Committee, Gas Taxation \(SEN\)](#)  
**Subject:** Standing up to Big Gas greed  
**Date:** Thursday, 9 April 2026 8:37:24 AM

---

To the Select Committee on the Taxation of Gas Resources,

I agree to have name and submission be published on the inquiry webpage.

I support a 25% tax on all gas exports. The gas industry in Australia pays little in royalties, has a long history of tax evasion and soaks up billions of public dollars in subsidies. It is well past time that they paid back to the community instead of walking offshore with over 90% of their profits in their pockets.

Wars in Ukraine and Iran have caused energy prices to spike and delivered huge windfall profits for the gas industry.

Other countries like Saudi Arabia, Qatar and Norway make a fortune from their exports. But Australians pay more for our own gas instead, while our government gives away most exported gas for free.

Federal government subsidies for fossil fuel industries in the 2024/25 financial year reached nearly \$12.5 billion. Instead of paying us for our natural resources, we're paying fossil fuel businesses to pocket untaxed profits with limited economic benefit to the country.

Between 2021-2025, multinational corporations made \$170 billion exporting gas from Australia without paying royalties or taxes. The federal government forecasts that another \$170 billion of Australian gas will be exported to 2030, royalty and tax free, according to analysis from the Australia Institute.

A gas export tax is likely to push the price of gas sold in Australia down, as gas exporters compete to avoid paying the export tax by diverting supply to the untaxed Australian market.

80% of Australian gas production is exported. In fact, more gas is used by the gas industry to process gas into liquified natural gas (LNG) for export, than all of the gas used by Aussie manufacturers. We don't have a gas supply problem, we have a gas export problem.

If there was ever an opportunity to stop Big Gas greed, it is right now, because no corporation should profit from war and misery.

Yours sincerely,  
Geoffrey [REDACTED]

**Date:** Wednesday, 8 April 2026 6:56:47 PM

---

To the Select Committee on the Taxation of Gas Resources,  
if there was ever an opportunity to stop Big Gas greed, it is right now, because no corporation should profit from war and misery, and our leaders are starting to take this seriously. We just need to be louder than Big Gas.

It's also time for our elected representatives to step up to the plate. Aussies from all walks of life and from every political persuasion support this sensible tax reform – our government needs to realise this is a voting matter.

Our elected representatives can't ignore a phone call. It's time to let your local Labor MP or Senator know that they need to support a 25% tax on gas exports in the upcoming federal budget.  
I agree to have name and submission be published on the inquiry webpage.

**Subject:** It's beyond time to tax export gas!  
**Date:** Thursday, 9 April 2026 10:25:00 AM

---

To the Select Committee on the Taxation of Gas Resources,

I agree to have name and submission be published on the inquiry webpage.

I fully support the proposed 25% tax on export gas. It's well overdue that we get far more benefit from providing industry with our gas, now raising even greater windfall profits due to the horrific senseless wars occurring.

There should be no extreme profit for industry from the appalling circumstances created for so many innocent people by ruthless foreign leaders.

We already heavily subsidise our export gas to the detriment of our own needs. Not only are Australians struggling to keep up with living costs but we also neglect so many worthy causes and community requirements due to our Federal government's funding choices, including our precious natural areas and wildlife, heading to extinction.

Please use this opportunity and public support to finally agree to increase the royalty payments and place at least 25% tax on the gas we provide almost for free to the world. Thank you for your attention to this critical situation.

Yours sincerely,  
Brigid [REDACTED]

To the Select Committee on the Taxation of Gas Resources,

I agree to have name and submission be published on the inquiry webpage.

I support a 25% tax on all gas exports. The gas industry in Australia pays little in royalties, has a long history of tax evasion and soaks up billions of public dollars in subsidies. It is well past time that they paid back to the community instead of walking offshore with over 90% of their profits in their pockets.

We cannot let Big Gas keep getting away with polluting our planet whilst profiting off war and misery in the Middle East. Meanwhile, Australians like me are struggling to pay our grocery and fuel bills. It's not fair.

A 25% tax on gas exports would generate up to \$17 billion per year – that's \$17 billion that could be injected back into the economy and spent on measures to make the lives of Australians better. It's a no-brainer.

Thank you for your time and consideration, and I hope you heed the recommendations of many Australians like me who believe it's time to end Big Gas greed.

Yours sincerely,  
Isabella [REDACTED]

**Date:** Wednesday, 8 April 2026 5:25:25 PM

---

To the Select Committee on the Taxation of Gas,

I support a 25% tax on all gas exports. I totally agree with all of the points shown below. Existing arrangements can and should be amended in the name of National Security and the duty of Government to act in the best interest of current and future Australians.

The gas industry in Australia pays little in royalties, has a long history of tax evasion and soaks up billions of public dollars in subsidies. It is well past time that they paid back to the community instead of walking offshore with over 90% of their profits in their pockets.

Wars in Ukraine and Iran have caused energy prices to spike and delivered huge windfall profits for the gas industry.

Other countries like Saudi Arabia, Qatar and Norway make a fortune from their exports. But Australians pay more for our own gas instead, while our government gives away most exported gas for free.

Federal government subsidies for fossil fuel industries in the 2024/25 financial year reached nearly \$12.5 billion. Instead of paying us for our natural resources, we're paying fossil fuel businesses to pocket untaxed profits with limited economic benefit to the country.

Between 2021-2025, multinational corporations made \$170 billion exporting gas from Australia without paying royalties or taxes. The federal government forecasts that another \$170 billion of Australian gas will be exported to 2030, royalty and tax free, according to analysis from the Australia Institute.

A gas export tax is likely to push the price of gas sold in Australia down, as gas exporters compete to avoid paying the export tax by diverting supply to the untaxed Australian market.

80% of Australian gas production is exported. In fact, more gas is used by the gas industry to process gas into liquified natural gas (LNG) for export, than all of the gas used by Aussie manufacturers. We don't have a gas supply problem, we have a gas export problem.
