

My husband and I just got back from a holiday, while away all our symptoms had gone it took just 2 days back home and the symptoms were back.

Originally we were all for the wind farm, but no one told us about the noise and the effect they would have on our daily life.

We are not against wind farms, as long as they are built minimum of 10km from towns and or people.

No one from the wind farm has ever come to our house or has spoken to us.

I also wrote to our local Senate about 6 months ago, I have not had a reply, I also spoke to our local council, they told me not their problem and I am still waiting to hear from the EPA also about 6 months ago.

I have spoken to my GP about my symptoms but he has not as yet researched effect turbines.

I should mention that our house is a transi so the noise goes through the walls easily
