

Submission to inquiry

Commonwealth Radioactive Waste Management Bill

Senate standing committee on Environment, Communications and the Arts

To whom it may concern,

I believed that it is important to repeal the CRWMA passed by the Howard Government three years ago, is not right to force a nuclear waste dump on all Australians. When Kevin Rudd (Labour party) was in opposition promised to repeal it if they were elected, it is time that Kevin Rudd make his promised come true. It is time that Kevin Rudd's government listen the people who voted for him.

NO to the Commonwealth Radioactive Waste Management Act 2005.

Sincerely,

Marisol Salinas
