

Sex Discrimination Amendment (Sexual Orientation, Gender Identity and Intersex Status) Bill 2013

Dear Senators,

No civilization that has encouraged sexual aberrations has flourished, on the contrary they have come to ruin.

The argument that the conditions and practices identified in the terms of the enquiry are to be accommodated as if they were normal human behaviours is not only spurious but mischievous. Further, the imposition of the acceptance of them on all sorts of organizations is worthy of a totalitarian regime, not a free society.

The next demand of the homosexual lobby, not far off, will be the lowering of the age of consent. Today's crime of child abuse, tomorrow's sanctioned relationship.

A species of insanity is possessing the western world, when what were rightly regarded as perversions or unfortunate genetic malformations are trumpeted as some sort of virtues and promoted in schools, government and the media.

The horrifying flood of homosexual propaganda bluffs everyone into being scared of criticizing it. It would be wise of you to recognise this.

Yours faithfully,
