Dear Sir / Madam

Re: Johnson & Johnson Mesh Class Action.

I refer to your inquiry into the Mesh Implants, and as I had this surgery in 2008, I would like to respond to the problems I have suffered since this surgery.

1. After surgery, suffered a very severe vaginal infection.
2. Straight after surgery, had pain in right groin which never went away
3. Constipation made worse.
4. Loss of feeling and pain during sex, lost total sensation of an orgasm.
5. Constant bladder irritation, feeling like I had an infection, and wanting to urinate all the time.
6. Urine leakage which I never had before surgery
7. I prolapsed again 4 yrs (2012).
8. Mesh not able to be removed
9. Had prolapse surgery again (2016) with just stitches.
10. Generally tired all the time, lost energy.

that I used to have.

11. Lot of bladder infections.

I apologise for this handwritten letter, but I do not have access to a printer at the moment.

I thank you for taking the time to investigate this matter, and had I known the problems associated with the mesh, I would never have had it done!

Yours Sincerely,
