

Dear Senators

I expect the ABC to be a producer of innovative quality programming in all areas. I want:

- ▶ the ABC to be less dependent on outsourced programming
- ▶ the ABC to be funded and rebuilt so that it has strong specialist units to produce high levels of high quality and genuinely local in-house programming in all program genres on radio, TV and online
- ▶ a public broadcaster that is focused on diversity and quality, not ratings

Please help to save programmes such as The Collectors, New Inventors and Q and A by increasing funding to the ABC for the production of Australian content tv.

I do not want to be reduced to watching the type of stuff as served up on commercial stations only minus a few advertisements.

Elizabeth Lawrence
