

I am writing today in reference to the Migration Amendment (Visa Capping) Bill 2010. I came to know about this bill from the immigration website. I am writing this urgently to you today asking if you could help this situation.

I would support this situation if it applied only to people applying from now. I do think it is very unfair when, for the students who has been here for 3 years -worked and studied at university and has done everything required to remain here while their visas came through. They have done all the hard work more than their limits. Spent all the money on study.

I am given to understand that the Government has made 7 amendments to the Migration rules over the past 12 months!

So, I feel that the new reduction on the skills list should only apply to new applicant, not to people who have already made their applications Australia. Immigration should check applicants records and if they are genuine . if anyone is genuine should get P.R. every student love this country as they spent most of their youth here. if they start their new business in australia. Australia as a country can gain jobs and wealth from these students. As a student ,no one is not able to buy a business , give them a chance to show how they can be helpful for australia. if they will live here they all are australian, who will try to make their country better in all ways.

I will finish this with saying this bill is very unfair for students and for australia as well. I hope no one want to happen this unfair to any human.

Yours sincerely
