

To whom it may concern

I have heard with dismay that there are plans to impose the intervention towards aboriginal people in the Northern Territory is planned to be extended for another ten years. WHY????? There is much evidence that the intervention has caused high levels of disruption to communities as people move to escape the restrictions. No other race has their government money scrutinised in this way. The responsible are punished with the irresponsible because of their race. I beg of this committee to treat aboriginal people as equals with us.. the white and multicultural population

Sincerely

Wendy Webster
