

To Committee Secretariat,

Re: Terms of Reference

Subsidised access to freestyle libre 2

I have suffered with unstable type 2 diabetes for the last 16 years and upon using the libre 2 for a 2 week period during a trial my diabetes had become manageable because I was checking my sugar regularly and made aware when my sugars were too high and too low which in turn helped my doctor adjust my insulin accordingly. Unfortunately due to the price of the libre I am not able to afford it and my sugars are back to not being controlled again. To have this subsidised would make a huge impact on my health.

Thanks for taking the time to read my submission

Thanks and kind regards

Tori Tiwari
