

From: [REDACTED]
To: [Committee, Treaties \(REPS\)](#)
Subject: submission: Minamata Convention on Mercury
Date: Sunday, 11 July 2021 5:44:16 PM

to the Treaties Committee,

There is potential for technology related to or revealing certain properties of irradiated mercury to advance nuclear research. Reservations to this effect should be submitted. Technology transfer of mercury handling technology must still comply with Non-Proliferation agreements. Where the treaty conflicts with the goal of the maintenance of international peace and security, security agreements shall prevail.
