

Dodgy Digital TV

Dear whoever it may concern

Having purchased a new digital tv in February 2010, I have since that time had a dreadful reception, so much so that I plugged in my old analogue tv next to it, as it was nigh impossible to watch a programme enough to see it or hear it! Lots of people I talked to had exactly the same trouble with their new tv's, even over in Perth, and down in Sydney they have the same problem. I live in Queens Beach, Bowen, Qld 4805 and have a friend who lives in Bowen who says she won't buy a digital tv and is happy with her set top box and having watched a lot of tv at her place, I can see she has no problems like I do with my new tv. So much for new technology! I've had a full year now of unsatisfactory tv viewing with my new digital tv.

Sincerely

G Atkinson
