

Harton Hills Management

Hawkesdale Macarthur road, Macarthur Vic 3286

12th December, 2010

Dear Matthew,

I writing to ask that you look into and reassess the circumstances of the Macarthur windfarm that is being built on our door step.

The concerns we have are to the changes to the original contract, these changes mean we now have higher wind towers in front of us with larger Vestas generators which are **untested** for noise, shadow and flicker in Australia.

We have had no contact from AGL ever in relation to these concerns.

The other concern is that these turbines are under 2KM from our home, which was established in 1840 and has now an impaired view, possible shadow, Flicker and noise, I feel there should be further testing done before these new vestas are on our door step.

Regards

Andrew Fraser
