

Respected Senate Members,

The visa capping bill is unfair with the international students specially those who have been able to meet the 120 points criteria and lodge an 885 visa. Specifically when there have been already so many changes in the immigration laws, those who have already lodged their PR should not be affected. You can raise the points threshold in the future or make any other amendments that you would think would be able to cut down the number of applicants but please don't pass such bills which will affect the people who have already lodged their applications and are genuine. This would ruin all their efforts and dreams. This bill would shatter them. They believed in fairness of Australian laws, they loved Australia that's why they did their level best to be able to meet 120 points criteria and raise and boost the Australian economy. Please don't do this to us, we would be really grateful.
