Subject: Nuclear waste dump at Muckaty station
Date: Saturday, 6 March 2010 12:26:56 PM

Dear friend,

Please please PLEASE reconsider the direction you (and others in positions of power) are taking.

What you propose in dumping nuclear waste is dangerous. It poisons the land, as well you know, and all the creatures on it.

The Australian government needs to be a lot more creative in its thinking if we are to evolve and survive.

Ours scientists should be picking up where Nikola Tesla left off in the search for good clean energy, that does not leave nasty waste behind.

Time is running out for we humans. Change is inevitable. That will become increasingly clear over the next few decades.

How will you vote? For our beautiful planet and our children's children's children, or for political expediency? Let your conscience speak, and listen to it!

In great faith,

Nicola Apps
