

## **ECONOMICS 101: MAKE THINGS THE GLOBAL MARKET BUYS!**

It's a no brainer!. The Countries with the strongest economies have a manufacturing base. (eg: China, Japan, Sth.Korea, Germany etc.) They also have control of their finances. (A National Infrastructure Bank)

By contrast under our 'Neo Liberal' Political System, (Small Government, Privatised everything) nothing gets done, built or approved unless a profit is made!. If Covid taught us anything, it's that, we were unprepared for everything that we needed to do, (Quarantine Centre's, PPP Equipment, Hospital Beds, Vaccines etc, etc.) to deal with the Pandemic!.

Instead of paying people to stay home, we should be 'Building & Manufacturing' our way, out of the Recession/Depression to come, by embarking on the numerous shovel-ready projects awaiting funding & approval (The Bradfield Scheme, Project Iron Boomerang, etc.) with a National Infrastructure Bank!. We have ALL the resources we need, to do this, but lack the will, due to the short term (Election Cycle) thinking, of our Leaders!.

Just as FDR (Roosevelt) took his Nation from 'The Great Depression' to Superpower in just over 10 years, we could do the same!. Let's put our People back to work, in real jobs!. Take back control of our finances, resources & essential services!.(energy, water etc) To 'Build, Build, Build & Make, Make, Make' things, the World's Markets, want to buy, & we need, to live in this beautiful part of the World!.
