

Date:15.02.10

Robert A. Lennon,

EXECUTIVE SUMMARY OF THE "COW" SCHEME

AN AID TO SYSTEMATIC POWER OF CONCENTRATION TO SHUT OUT EVERYTHING FOR THE MOMENT THAT IS NOT RELEVANT, TO STICK TO THE IMMEDIATE TASK.

OUR ABILITY TO EMBRACE ESSENTIALS, RATHER THAN PERIPHERALS TO TURN AROUND CLIMATE VARIATION DROUGHT (CVD), BY SOLAR/NUCLEAR DESALINATION (D), TO FEED A 9.5 BILLION POPULATION IN A 2050 WORLD, MUST NOT BE PREVENTED BY SUPPRESSION OF TRUTH, FRAUDULANT MISREPRESENTATION, SECRET UNAUTHORIZED CLANDESTINE FORGERY, OR SPURIOUS "SHOW PONY" ACTS. TO EXECUTE THE GREATEST ENGINEERING SCHEME IN AUSTRALIA'S HISTORY.

My appeal is for a mental health turnaround as Jesus said; "I have come that they may have life, and have it to the full." Our "Family Law Act" and CVD disease, prevent it; those who want a full life, can beat Criminal deniers before it's too late to limit pollution and population humanely, alter ocean water by D, to create low cost H₂O. See "RIVERS & LIFE," ABC, DVD; the Yangtze, Ganges, Nile, Rhine, Amazon & Mississippi Rivers.

We know from CSIRO's Climate Report going back 1,000 years, that Australia's experienced many droughts, one of 30 years; try to imagine that.

"Sorry I don't have time to polish the presentation – consider it a battlefield dispatch. This nation is being overrun by financial vandals disguised as regulators and bankers – as destructive as any invasion in history. We are finished unless millions are made to see what is happening and what is at stake." Dick Eastman, "Expose The Criminals Before They Kill You."

Performance Measurement in the Australian Water Supply Industry

Tim Coelli (t.coelli@economics.uq.edu.au) Shannon Walding (CEPA - School of Economics, The University of Queensland)

available from the following registered author(s): Timothy James Coelli

"Various government-owned businesses provide water supply services to Australian residents.

With the advent of recent competition and regulatory reforms in infrastructure industries in Australia, more of these businesses are now
