

Our family have just watched farmers in the Riverina who are going broke and having to plough in beautiful orange trees because the giant supermarkets are offering them 12 cents a kilo while selling oranges for \$2.68 a kilo!!!!The people of Australia who want to support our farmers are furious about what free trade agreements and the dictates of the WTO are doing to our country and its clean,green agricultural economy.We demand to have proper labeling of food produce from overseas but are well aware that the WTO sees this as a “trade barrier”?!When are governments of both persuasions going to stand up to this globalisation agenda which is “killing”our farmers and undermining our food choices?!Other countries which value their national sovereignty do,so why don’t we?! We,and the majority of Australians, are fully in support of Senator Milne’s bill. We are sick of public consultations where we voice our opinion but are just ignored! Alex Hodges and Ray Linkevics
