

Dear madam/sir

I got the state sponsorship from VICTORIA state at 2008, and I applied the 886 state sponsored visa at December 2008. I have a full time job for nearly 2 years, I am working in melbourne , working for the state, and pay the tax for the government. And I already bought my first home and the car, I have planned my whole life in melbourne.

I knew the immigration department prefer the person who has many working experience to stay in Australia, so I try my best to find the job and work hard as much as I can. I have worked in this industry for nearly 3years(2 years FT and 1 year PT),and I have kept all the documents record about my experience.(tax ,super,pay slip).

If this visa capping bill was approved, it is big unfair to the people who have many experience in their working industry, the government is not a business man who cheating sometimes, the government must obey the rules what they promised before.

I knew too much people are waiting for their permanent visa, and the government don't need too much immigration people at the moment,this is a big problem. Who made this problem,it is immigration department, they did not plan well before, they should take the responsibility, why we(all oversea students) pay this bill for them?

I am so disappointed with this visa capping bill,and I am disagree with it. By the way,my occupation is cook.

Thanks for your concerning.
regards
