5th February, 2011

Dear Senate Committee,

I wish to make a submission into the Federal State Inquiry into wind farms set up by family first leader Senator Steven Fielding.

I am concerned about property values, compensation should be both ways, why are people compensated for having turbines on their property, while those people impacted negatively do not get compensated?

I have serious reservations as to the mechanics of our political process, we can pipe water thousands of kilometers anywhere, why not power?

For people not to be visually and financially impacted by wind farms why not place them in areas of no population, eg. desert areas

I welcome this inquiry, the Lal Lal wind farm noise limits were determined for 2 MW turbines but the planning panel has allowed for 3 MW turbines to be installed, how does this happen?

Yours sincerely
