

Subject: Waste dump Muckaty
Date: Thursday, 11 March 2010 7:03:29 PM

I am informing the Senate that I object to a radioactive waste being dumped in Muckaty or any where else in Australia. Do you know that radioactive waste will eventually penetrate the food chains and waterways? Furthermore, I am fully aware that radioactive waste will ultimately cause cancer. Do you, the Senators, wish to have or contract such a terrible illness in the future? Would you like residents in Australia to develop such a terrible illness? I am sure you would prefer not to have that on your conscience in the future.
