
To whom it may concern

I am extremely disappointed to hear that discussions are being held to see if Medicare should fund the abortion of an unborn child on the basis of gender!

Our government should be looking at finding ways to reduce the number of abortions in this country of ours. It is an abhorrent act and the human rights of the unborn child must be taken into consideration.

Tax funded money should be used in our Medicare system only for legitimate health procedures not because someone may not be comfortable with the gender of their unborn child. How ridiculous!

I am against any consideration of Medicare funding for sex selection abortions.

Kind regards
Arthur Rabavilas
