Dear Mr Fitt

RE: Senate Economics References Committee into the Selection process for a national radioactive waste management facility in South Australia

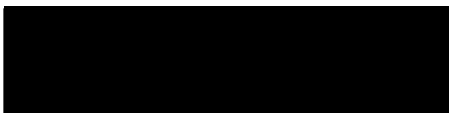

Thank you for your email of 3 April 2018 requesting information on what community consultation and/or selection process activities or milestones will take place for both the Hawker and Kimba sites, over the next 12 months.

The department has compiled the attached table of planned activities with indicative dates. As explained in the department's submission, provided on 3 April 2018, the process is being undertaken closely with the communities. Accordingly, the milestones and precise dates of activities will depend on community feedback and will be determined with community representatives. The timing of certain decisions within government are also the prerogative of the Executive and could be subject to change. For this reason, we have included a high-level timeline of activities, with broad date ranges, to allow flexibility to respond to the needs of communities and executive government processes.

In addition to planned activities, the department undertakes continuous community consultation through community liaison officers engaged at the local offices established in both Kimba and Hawker.

Please do not hesitate to contact me if you would like further information on the process.

Yours sincerely,

Bruce Wilson
Principal Advisor

Radioactive Waste Management Taskforce

9 April 18

Table: Planned community consultation and activities and indicative dates to April 2019

Activity	Topic	Indicative timing
