House of Representatives  
Joint Committee Inquiry  
Parliament of Australia

Dear Parliamentary Committee,

It's obvious to anyone that has been paying attention in the last 30 years that we have assisted in the rise of a communist authoritarian dictatorship to become a world superpower. Of course, I'm speaking about China.

We previously assumed that by enriching this country with trade that they would become more free, more transparent, and more democratic. However, as demonstrated clearly by events with the coronavirus pandemic they have revealed not only is this not the case, but to be an enemy of democracy, freedom, truth and Australian values.

They have proven themselves to be an enemy of the country, and the Australian people. Their citizens are buying up all our real estate so our young people cannot afford housing.

I am calling on the Australian parliament to:

- Dramatically reduce our dependency on foreign trade with China
- Prevent foreign investors from purchasing Australian real-estate as New Zealand has done.
- Form a trade alliance with democratic bodies such as the EU and the United States to impose punitive trade measures (tariffs) against China until they agree to become good trading partners and reform their government transparency and accountability.

Sincerely yours,
