

To: The House of Representatives Standing Committee on Communications and the Arts
Inquiry into Fifth Generation (5G) mobile network technology

The committee will:

1. Investigate the capability, capacity and deployment of 5G;
2. Understand the application of 5G, including use cases for enterprise and government.

Dear Committee members,

I make this submission to The House of Representatives Standing Committee on Communications and the Arts as an extremely concerned human being as I DO NOT CONSENT to the deployment, adoption and application of 5G wireless technology in Australia.

Given the fact the government's role is supposed to work for the people NOT FOR INDUSTRY/CORPORATIONS. I ask that this matter be taken seriously and tremendous scrutiny be exercised as my research over many years clearly shows GREAT CONCERN FOR **ALL LIFE** not just in Australia but for every living thing on this biosphere.

I find it astounding that our government has already shaped our future around 5G and associated technologies without doing any due diligence or acknowledging the thousands of peer reviewed studies that already exist showing this type of radiation is dangerous, not only humans but to flora and fauna too.

Industry and government are promising the public 5G and wireless technologies are the next best thing, promising a better quality of life, making our lives so much better by faster download, new technologies to make our lives so much easier, business to achieve new growth and governments new jobs.

These are false promises, a better quality of life, when the evidence in this submission is crystal clear its causing HARM to millions of people worldwide, including the animals that can't speak out. The future you are building is only in the best interest of INDUSTRY and GOVERNMENT.

<https://www.industry.gov.au/data-and-publications/australias-tech-future>

I have been researching for many years the coming 5G network, Artificial Intelligence (AI), quantum computing, robotics the Internet of things (**IoT**) **tracking and tracing EVERYTHING**, and its associated wireless technologies and devices that will eventually all link in with each other and use microchips to operate e.g. smart meters, all smart home appliances - fridges, dryers, kitchen appliances, washing machines & air conditioners, down to autonomous vehicles etc.

These technologies dovetail with the governments/United Nations 'smart city program' and the United Nations driven 'Agenda 2030'. I hope your all familiar with these topics – if you're not I would highly suggest you start doing some research of your own.

These future agendas are reliant on these technologies and already incorporated into future government/United Nations plans. Information about australia's tech future sourced from government websites below.

<https://www.communications.gov.au/documents/5g-enabling-future-economy>

<https://www.industry.gov.au/data-and-publications/australias-tech-future>

This next extract is from page 45 on the link below - Vision 2025 we will deliver world leading digital services for the benefit of all Australians. **AT WHAT COST to the health and safety of the public?**

<https://dta-www-drupal-20180130215411153400000001.s3.ap-southeast-2.amazonaws.com/s3fs-public/files/digital-transformation-strategy/digital-transformation-strategy.pdf>

**Providing
accountability**

We know that over the coming years to 2025, new opportunities and risks will emerge. Your needs will evolve and new technologies will make better services not only possible, but also expected.

This means that we need to continually engage with you to ensure digital transformation fits what you need and expect from us.

We will be open, transparent and accountable as we deliver on our 2025 vision and this strategy. We will review the Digital Transformation Strategy periodically to respond to these changes.

We will publish yearly action plans that identify your evolving needs and expectations and identify priority projects and opportunities to achieve our 2025 vision. We will

If I may, pose a question here? If the government is so open, transparent and accountable then why are we seeing TV commercials like Your right to know. What the government doesn't want you to know????

<https://yourrighttoknow.com.au/media-freedom/>

Australia has a statute book littered with laws that enable sources to be identified, Industry whistle blowers to be shut down and journalists to be jailed for speaking out against INDUSTRY OR GOVERNMENT.

<https://www.theaustralian.com.au/commentary/australia-is-a-worldbeater-in-the-secrecy-olympics/news-story/e4709f4456f4fe4f87c25a6ce34ebf41>

Australia's Tech Future

Page 9: <https://www.industry.gov.au/sites/default/files/2018-12/australias-tech-future.pdf>

I have copied below the wording from the above link Australias tech future it gives a very brief description on the Internet of things (IoT), Artificial intelligence (AI) and quantum computing. I have referenced the IOT, AI and quantum computing here however I will expand further in this submission about these technologies.

"Internet of Things (IoT) refers to the increasing use of sensors that record things such as sounds, touch, movement, temperature and even chemical composition that are being used to automatically collect data about people, the environment and objects and transmit this information over the Internet"

(IoT) What you're not told here is how or where all these sensors will be, Tom wheeler the former chairman of the Federal Communications Commission (FCC) who I have mentioned in detail further in this submission explains clearly that absolutely **EVERYTHING will be micro – chipped, if it can be connected, it will be connected. I ask that you take note of the information towards the end of this submission Internet of things – hive mind** - New Brain Computer interface technology talk by Steve Hoffman.

"Quantum computing is an emerging technology that would exponentially increase available computing power to help us solve problems that we cannot tackle with existing computers. Quantum computers, will be able to crack codes easily and they have the potential to disrupt existing security methods that use encrypted data, such as in banking and other industries. Quantum computers also have applications in scientific fields and could help answer questions that have baffled scientists for generations".

- I ask that you please take note of the information on quantum computing from Georgie Rose the founder of D-wave the first quantum computers and his new company kindred, what he has to say about quantum computing at the end of this submission.

"Artificial Intelligence (AI) has the potential to automate repetitive or dangerous tasks, increase productivity and allow the development of innovative consumer products. It is forecast to add trillions of dollars to the global economy in the coming decades. Examples include:

- Using advanced data analytics techniques to diagnose diseases at earlier and more treatable stages
- Using automated machines for hauling and drilling on mine sites, increasing productivity and reducing risks to workers
- Enabling greater use of smart forms that can tailor legal information to assist individuals to draft a will or settle financial arrangements following a break-up
- Tailoring content on entertainment platforms to meet user preferences There is **considerable effort**, both in Australia and internationally, **focused on ensuring that AI is applied ethically** and delivers broad societal benefits".

Considerable effort to ensure AI is applied ethically well that's not rock solid or real reassuring to me. I am already a victim of Industry LIES and Corruption.

My reason for the above comment - the Medical Industry, where a number of breast implants are now linked to anaplastic large cell lymphoma BIA-ALCL. The therapeutic goods administration makes the statement it is very rare, and the risk of undergoing surgery could be higher than the risk of developing BIA-ALCL. <https://www.tga.gov.au/alert/breast-implants-and-anaplastic-large-cell-lymphoma>

Im a member of a couple of international breast implant illness groups and there are over 98,000 members in one group alone and I can assure you that there are more side effects than just anaplastic large cell lymphoma. There is a whole host of other symptoms that are making women very sick and it's not limited to the the implants that have been recalled or suspended. When you start digging into how is this even possible you find **corruption, coverup, deceit and lies from industry** and the alphabet agencies put in place to protect us eg TGA,FDA, CDC, WHO, FCC have allowed Industry through loopholes and monetary donations to campaigns to have no accountability and we are the ones suffering due to industry corruption, all to make their billions of dollars.

I feel this is a very slippery slope we are heading toward because as with any new Technology/devices, unless they have been extensively & thoroughly tested for a substantial period of time, declared totally safe for all living things on this biosphere, its only common sense that one would investigate with extreme caution.

In my opinion from all the studies/documents and documentaries I've read & watched including whistle blower testimonies. Taking into account thousands of past and present studies which all **POSITIVELY INDICATE** serious harm and serious health effect to people of all ages, particularly younger children and babies. The **WI-FRY** damage is far reaching, it goes well beyond harm to people, it is upsetting all inhabitants of earth including the plant and animal kingdoms. It is interfering with people and animals electromagnetic fields & disrupting the natural balance of the planet causing harm to all life, animal extinction and serious illness. I have included only a very small portion of my research in this submission.

- Page 4 – 5G – Enabling the future economy: Below is a paragraph from a Government documents which can be viewed on the link below.

The Government wants to create an environment that **allows Australia's telecommunications industry** to be at the forefront of **seizing the benefits of 5G** across the economy. The communications sector will lead the rollout of 5G networks in Australia. However, the **Government can create the policy and regulatory environment to support a more efficient rollout, given its potential benefits to the economy.**

<https://www.communications.gov.au/documents/5g-enabling-future-economy>

- Reading between the lines It seems like it's already decided that there's no stopping 5G considering the comment in this document that the government can create policy and regulatory environment to SUPPORT A MORE EFFICIENT ROLLOUT.

My question is, AT WHAT COST TO HUMAN HEALTH AND THE ENVIRONMENT? We need healthy people to work to run/drive the economy, unless there is other plans for robots to take over, you may think that is a weird thing to say however after you read my information presented in my submission about the IOT, AI and quantum computers this may not seem so far off.

- **5G GOOD FOR INDUSTRY and GOVERNMENT – NOT FOR PEOPLE OR PLANET**

- I'm sure there are many benefits of 5G to make billions of dollars for INDUSTRY and Government. It is my opinion that it is being sold to us as being so great our lives will be so much more convenient and once it's all up and running, out will come the totalitarian government. 5G has the ability to allow government capabilities to exercise absolute and centralized control over all aspects of life and the people subordinated to the state any opposing political expression either suppressed or punished.

➤ The link below from the Environmental Health Trust - has an arsenal of evidence on wireless radiation with links to various agencies like World health organisation (WHO), the lancet medical journal and numerous other medical & scientific studies and interviews.

<https://ehtrust.org/science/whoiarc-position-on-wireless-and-health/>

➤ The World Health Organisation (WHO) has classified radiofrequency electromagnetic fields as a Group 2B carcinogen.

https://www.iarc.fr/wp-content/uploads/2018/07/pr208_E.pdf

➤ **A)** I'd like draw special attention to The federal Communications Commission (FCC) former chairman Tom Wheeler and his speech at the National Press Club Washington, D.C. June 20, 2016

Prior to working at the FCC, Wheeler worked as a venture capitalist and lobbyist for the cable and wireless industry, whom the FCC is now responsible for regulating, and holding positions including President of the National Cable & Telecommunications Association (NCTA) and CEO of the Cellular Telecommunications & Internet Association (CTIA).

A hardcopy of the whole speech can be viewed here:

https://transition.fcc.gov/Daily_Releases/Daily_Business/2016/db0620/DOC-339920A1.pdf

Or can be seen here from the 2m: 40sec mark – on the **Truth about 5G** video from the Impower Movement: <https://www.youtube.com/watch?v=OMxfffqyDtc>

However I highly recommend watching the whole interview it has some mind blowing revelations in it.

I have highlighted some of Mr Wheeler's remarks which raise some serious questions and concerns.

- "if anyone tells you they know the details of what 5G will deliver, walk the other way".
- This is an odd statement to make, is this because there may be other purposes for this technology?
- "Yes, 5G will connect the Internet of Everything. **If something can be connected, it will be connected** in a 5G world. But with predictions of **hundreds of billions of microchip-enable products from pill bottles to plant waterers**"
- If it can be connected, it will be connected – is that including us to?
- Every item, every product, every plant, every animal and every HUMAN? That's the plan
- "I'm confident these actions **will lead to a cornucopia of unanticipated** innovative uses, and **generate tens of billions of dollars** in economic activity".
- Will lead to a cornucopia of unanticipated uses or **just untold uses**
- Only cares about how much money can be made

- “Let’s revisit that **spectrum strategy** for a moment. **Rule number one** is that **the technology should drive the policy rather than the policy drive the technology**. And technology for **5G is not one thing, it is many things**. The marriage of Moore’s Law and wireless connectivity involves smart antenna systems, new more-efficient transmission formats, low-energy systems, network virtualization, **and much more**”.
- **Rule number one: the technology should drive the policy rather than the policy drive the technology**. This statement is SO CONCERNING of the mindset of these people in positions of power that are imposing these technologies upon us that become MANDATORY for us to survive. It clearly shows its all about “BIG BUSINESS and MONEY” not HEALTH, SAFETY or the ENVIRONMENT.
“5G is not one thing, it is many things and much more”. So what are those many things and MUCH MORE. One has the right to ask. **I will elaborate on this further in my submission from weapons expert Mark Steele, Dr Barrie Trower an ex government operative and susan clarke expert in neurotoxicology and radiofrequency radiation bioeffects.**

His next remark should leave you GOBSMACKED it validates all my concerns for the HEALTH & SAFETY of the entire BIOSPHERE. It shows the total disregard for any living thing on this planet and raises many CONCERNS whilst proving all they care about is MONEY.

- “Unlike some countries, **we do not believe we should spend the next couple of years studying what 5G should be, how it should operate**, and how to allocate spectrum, based on those assumptions. Like the examples I gave earlier, **the future has a way of inventing itself. Turning innovators loose is far preferable to expecting committees and regulators to define the future. We won’t wait for the standards to be first developed in the sometimes arduous standards**-setting process or in a government-led activity. Instead, we will make ample spectrum available and then rely on a private sector-led process for producing technical standards best suited for those frequencies and use cases.

B) Four weeks later Tom wheeler in a public meeting press conference at FCC headquarters on July 14th 2016 an escalating series of remarkable events unravelled.

First, they prevented wireless science advocate Kevin Mottus the president of the US brain tumor association from displaying a simple sign, violating their First Amendment rights in a public venue. Then, a security guard forcefully prevented a t-shirt from being taken out of a bag and a Bloomberg reporter had his credentials confiscated for merely talking with the Kevin Mottus.

The incident can be watched here: (FCC) Tom Wheeler intimidates press and kills free speech at 5G rollout (video)

<https://takebackyourpower.net/gestapo-in-usa-5g-fcc-intimidates-press-kills-free-speech/>

another article about this incident was published in the nexus magazine and can be viewed on their website. This article also has links to numerous peer reviewed studies on wireless radiation. <https://nexusnewsfeed.com/article/human-rights/fcc-intimidates-press-and-kills-free-speech-at-5g-rollout/>

- Kevin Mottus - the president of the US brain tumor association (mentioned above) has numerous videos and information about wireless radiation.

<https://usbraintumorassociation.org/our-team/>

<http://kevinmottus.com/>

Kevin collaborates with 10 other groups one of which is EMFSCIENTIST.ORG in this video he discusses the findings that wireless radiation does cause Cancer, Neurological Disorders, Immune System Dysfunction and reproductive disorders.

<https://youtu.be/Me1YfVZgHIA?list=PLL6OFaipDyF-yRzSMUv4uduEfSWNw-gnx>

- The BioInitiative 2012 - <https://bioinitiative.org/>

The BioInitiative report has been prepared by 29 authors from ten countries, ten holding medical degrees (MDs), 21 PhDs, and three MSc, MA or MPHs. Among the authors are three former presidents of the Bioelectromagnetics Society, and five full members of BEMS. One distinguished author is the Chair of the Russian National Committee on Non-Ionizing Radiation. Another is a Senior Advisor to the European Environmental Agency.

What it covers

The science, public health, public policy and global response to the growing health issue of chronic exposure to electromagnetic fields and radiofrequency radiation in the daily life of billions of people around the world. Covers brain tumour, risks from cell phones, damage to DNA and genes, effects on memory, learning, behaviour, attention; sleep disruption and cancer and neurological diseases like Alzheimer's disease. Effects on sperm and miscarriage (fertility and reproduction), effects of wireless on the brain development of the foetus and infant, and effects of wireless classrooms on children and adolescents is addressed.

Mechanisms for biological action and public health responses in other countries are discussed. Therapeutic use of very low intensity EMF and RFR are addressed.

What is New - (report has been updated since 2012)

It covers about 1800 new studies reporting bio effects and adverse health effects of electromagnetic fields (power lines, electrical wiring, appliances and hand-held devices) – and wireless technologies (cell and cordless phones, cell towers, WI-FI, wireless laptops, wireless routers, baby monitors, surveillance systems, wireless utility meters ('smart meters'))

https://bioinitiative.org/wp-content/uploads/pdfs/BioInitiativeReport_PressResources.pdf

- EMF Scientist.org - comprising of 248 scientists from 42 nations

The International EMF Scientist Appeal serves as a credible and influential voice from EMF (electromagnetic field) scientists who are urgently calling upon the United Nations and its sub-organizations, the WHO and UNEP, and all U.N. Member States, for greater health protection on EMF exposure

The first appeal in May 2015 fell on deaf ears they have since had more scientists join and collaborate so they have reappealed again on the 25th June 2019.

The Appeal urgently calls for greater health protection in the midst of what has become an historic, global phenomenon, the rapid expansion and proliferation of wireless communications and electrical technologies. The possible impact of deployment of these technologies on human health has not yet been thoroughly studied.

These scientists have published over 2,000 research papers on electromagnetic fields (EMF) on biology or health. Their concern is based on the vast number of studies that reported biological and adverse health effects of non-ionizing EMF far below the current exposure guidelines set by the FCC and other international EMF-exposure guideline setting organizations.

Based upon peer-reviewed, published research, they have serious concerns regarding the ubiquitous and increasing exposure to EMF generated by electric and wireless devices. These include—but are not limited to—radiofrequency radiation (RFR) emitting devices, such as cellular and cordless phones and their base stations, Wi-Fi, broadcast antennas, smart meters, and baby monitors as well as electric devices and infra-structures used in the delivery of electricity that generate extremely-low frequency electromagnetic field (ELF EMF).

The scientific basis for their collective concern is “numerous recent scientific publications have shown that EMF affects living organisms at levels well below most international and national guidelines. Effects include increased cancer risk, cellular stress, increase in harmful free radicals, genetic damage, structural and functional changes of the reproductive system, learning and memory deficits, neurological disorders, and negative impacts on general well-being in humans.”

Damage goes well beyond the human race, as there is growing evidence of harmful effects to both plant and animal life.

[HOME](#) [EMF SCIENTIST APPEAL](#) [SCIENCE & POLICY](#) [MEDIA](#) [ABOUT US](#)

U.N. Environment Programme Urged to Protect Nature and Humankind from Electromagnetic Fields (EMF)

4G/5G antenna densification is escalating health risks - a global crisis

New York, NY, July 22, 2019. The Advisors to the International EMF Scientist Appeal, representing 248 scientists from 42 nations, have resubmitted **The Appeal** to the United Nations Environment Programme (UNEP) Executive Director, Inger Andersen, requesting the UNEP reassess the potential biological impacts of next generation 4G and 5G telecommunication technologies to plants, animals and humans.

There is particular urgency at this time as new antennas will be densely located throughout residential neighborhoods using much higher frequencies, with greater biologically disruptive pulsations, more dangerous signaling characteristics, plus transmitting equipment on, and inside, homes and buildings. The Advisors to **The Appeal** recommend UNEP seriously weigh heavily the findings of the independent, non-industry associated EMF science

The Advisors to the International EMF Scientist Appeal - Annie Sasco, MD, Dr.PH., Henry Lai, Ph.D., Joel Moskowitz, PhD., Ronald Melnick, Ph.D. and Magda Havas, Ph.D., call upon the UNEP to be a strong voice for the total environment of the planet, and an effective catalyst within the United Nations with regards to the biological and health effects of electromagnetic pollution.

- Video evidence of Cell Tower & Smart Meter Radiation (under 2 minutes)

The man in this video is recording levels of radiation with sophisticated equipment, he
shows the cell tower hidden in the Saguaro Cactus as seen in the photo with the red arrow.
He shows how these Oleander bushes are being damaged by the radiation emitting from
this tower. You can see from the middle photo the Oleander bushes all the way down this
path are supposed to be flowering, however half way along the flowers are basically non-
existent, the leaves closer to the tower are **dwarfed, thinned out and dying**.

Cell towers in America can be disguised as palm trees, cactus or hidden in church steeples
as shown in the last picture. <https://youtu.be/-LkOqoRkAwo>

- More independent video evidence of the damage to plants and trees that are close to Smart meters and cell towers – (short video) Fake Smart Meter Grid Saguaro cactus Kills Surrounding Plant Life

The trees in this video around the smart meter/cell tower cactus are partly dead with the rest looking very unhealthy.

https://youtu.be/Dm5L_RFUY34

- SMART METERS KILL - Smart Meter Killing Shrub - Stratford Ontario

Three shrubs have been growing against the brick wall of this home for several years. They had such healthy and thick growth, the old but perfectly serviceable electric meter was removed and replaced with a 'smart meter' which sends information to the electrical utility company by microwave radiation signals. This meter sends signals almost continuously, as can be seen and heard by the radio frequency meter readings. The damage caused by the radiation can be seen very clearly in this video. The harm to the shrub is much worse close to the meter, the damage decreases with the distance. The leaves closest to the meter are dead, dried up and dying and appear to be deformed riddled with spots like some sort of disease.

According to Health Canada, microwave radiation at this level, which is below their safety standards, does not cause biological harm.

The resident of this home has suffered sleep problems since the meter was installed.

<https://youtu.be/pCR6mVApoXA>

- Fake Smart Meter Grid Kills Surrounding Plant Life

<https://youtu.be/axQh-52KxPA>

- The man in this short 1 ½ min video shows how the smart meter attached to his home is pulsing high levels of radiation. He shows the damage to his fruit tree that is beside the smart meter on his house. As seen in the picture to the left, the tree no longer bears any fruit on the right hand side. The picture on the left shows the leaves changing colours and dying.

Smart Meter vs. Fruit Tree

- Mark Steele - Weapons Expert About 5G And It's Disastrous Effects On The Population - March 10, 2019
"5G is a weapons system, nothing more nothing less," Mark Steele declares. "It's got nothing to do with telecommunications for humans. 5G is a machine to machine connection for autonomous vehicles."
"Pulsed High-Frequency 5G Radiation Will Cause Immense Harm to Health."

What these telecom companies and mainstream media outlets do not cover however are the human and organic bio-effects likely from 5G. What will be the cost of 5G in human health? Mark Steele points out that the science is clear, that high-frequency radiation will cause immense harm to human health.

Pulsed at high frequencies, the amount of radiation emanating from the point to point transfer of energy required for autonomous vehicles is too high to be safe for humans, he says. "What it is is just sophisticated radar—with enough emissions from a single autonomous vehicle to pose a problem for humans."

Human Brains will Be Deleteriously Impacted by 5G.

One of the most disturbing aspect of 5G, it appears, is that it will cause harm especially to human brains, children's brains, and babies' brains. "This is the same type of technology that was used in the Cuba attacks," he says, "that was beamed in Moscow, that was used in the China attacks on US diplomats. The first signs are those of neurological disorder, which have been reported in these cases."

Children especially would become vulnerable, as studies of wireless radiation impacts on brains already show, with higher absorbency and spread of radiation visible in brain MRIs of young children.

<https://youtu.be/dIP5oUbN4Fk>

We only ever see or hear how convenient and great digital wireless technology has made our lives. The remaining references in my submission show the capabilities & capacity in which these wireless technologies are currently being used today, in a nefarious capacity. They show how companies in the Industry are making technologies for nefarious purposes selling them to other organisations, the highest bidder or using them for their own agendas. The dark side of digital wireless technology is real and innocent people are victims of electronic harassment, gang stalking, psychotronic warfare and touchless torture. These have capabilities far beyond what we are told.

The Nuremberg Code opposes all forms of human experiments, yet we still have them going on around the world.

- Nervous system manipulation by electromagnetic fields from devices
Physiological effects have been observed in a human subject in response to stimulation of the skin with weak electromagnetic fields that are pulsed with certain frequencies near ½ Hz or 2.4 Hz, such as to excite a sensory resonance. Many computer monitors, TV tubes, smart phones and i-pads, when displaying pulsed images, emit pulsed electromagnetic fields of sufficient amplitudes to cause such excitation. It is therefore possible to manipulate the nervous system of a subject by pulsing images displayed on a nearby computer monitor or TV set

Patented July 16, 1968

1

3,393,279
NERVOUS SYSTEM EXCITATION DEVICE
Gillis Patrick Flanagan, Bellaire, Tex., assignor to Listen-
ing Incorporated, Arlington, Mass., a corporation of
Massachusetts
Filed Mar. 13, 1962, Ser. No. 179,337
3 Claims. (Cl. 179—107)

This invention relates to electromagnetic excitation of the nervous system of a mammal and pertains more particularly to a method and apparatus for exciting the nervous system of a person with electromagnetic waves that are capable of causing that person to become conscious of information conveyed by the electromagnetic waves.

It is an object of the present invention to provide a means of initiating controllable responses of the neuro senses without applying pressure waves or stress waves to the ears or bones. Another object of this invention is to provide a means of causing a person to receive an aural perception of the sound corresponding to the audio modulation of radio frequency electromagnetic waves that are coupled with the nervous system of the person. These and other objects of this invention will be understood from the following drawings and description of the invention, wherein:

2

in which the noise level is high, as a device by which a person can listen to an audio signal that cannot be heard by others, etc.

As shown in FIGURE 1 of the drawing, in a preferred form of the invention, a field of electromagnetic waves is generated by a field generating means, such as a pair of electrodes 1. The electrodes 1 are preferably electrically insulated, for example by surrounding them with a suitable electrical insulating material 2, and are arranged to generate a field coupled with at least a portion of the nervous system of a person, for example by being placed near or along opposite sides of a person's head. The electrodes 1 can be placed in direct contact with the skin and the electrodes can be placed on or near various portions of the body, such portions preferably being near the spinal cord.

The electrodes 1 are electrically connected to a source of modulated electromagnetic waves inclusive of a radio frequency power amplifier and variable frequency oscillator, indicated in box 3, an audio modulator, indicated in box 4, a source of audio signal, indicated in box 5, and a power supply for the signal source, modulator and amplifier, indicated in box 6. The variable frequency oscillator 3 is preferably provided with a manual radio frequency control means, indicated by box 3a. Numerous

This invention relates to electromagnetic excitation of the nervous system and pertains more peculiarly to a **method and apparatus for exciting the nervous System of a person with electromagnetic waves** that are **capable of causing that person to become conscious of information conveyed by the electromagnetic waves**. It is an object of the present invention to provide a means of initiating controllable responses of the neuro Senses without applying pressure waves or stress waves to the ears or bones. **Another object of this invention is to provide a means of causing a person to receive an aural perception of the sound corresponding to the audio modulation of radio frequency electromagnetic waves** that are coupled with the nervous system of the person.

Perhaps you are unfamiliar with this information or shocked by this information and I hope you are because it is disturbing to think that this technology even exists & what could be achieved by this if it were to be in the hands of the wrong people or people with agendas.

Imagine if this was used on you or your child unwittingly, without your consent?

Hypothetically speaking let's say perhaps there was a group of politicians that wanted to disarm the population. How easy would gun reform be if they used this technology on some innocent victim by putting thoughts into their head telling and making them go on a shooting rampage killing dozens of innocent victims at a school or public place?

- Former Facebook Exec: Social Media Ripping Apart Society, "You are programmed."

Chamath Palihapitiya, Founder, CEO Social Capital and former facebook exec, warned about the unintended consequences of social media at Stanford Graduate School of Business: "**I think we have created tools that are ripping apart the social fabric of how society works.** The short-term, dopamine-driven feedback loops we've created are destroying how society works. No civil discourse, no cooperation; misinformation, mistruth. You are being programmed" - <https://youtu.be/d6e1riShmak>

- Melanie Vritschan's successful removal of torture device

Melanie Vritschan – The founder of International Coalition Against Electronic Torture and Robotization of Living Beings (ICATOR) is an international human rights organisation headquartered in Brussels which is supporting victims of non-consensual human experimentation with military neuro- and biotechnology. The charity campaigns against the electromagnetic torture of European citizens and helps victims to gather evidence for their court cases.

Melanie Vritschan, has been implanted multiple times non-consensually and has been tortured remotely with these implants for a decade.

In this video with Alfred Lambremont Webre - DR Katherine Horton talks about the device that was taken from melanie's throat.

➤ **Internet of things IOT – Hive mind**

New Brain Computer interface technology – TEDx talks - Steve Hoffman – TEDxCEIBS

From **7:44 sec** Steve talks about the internet of things (IOT) **where we will have a chip in our brain that are connected to the internet** and we can communicate from anywhere around the world without talking and all the information that is accessible on the internet will be available to our mind. **We can even transfer memories;** we can share experiences of each other, even if we haven't done it ourselves. He says it gets even weirder we will be living our lives as our lives but you will all of a sudden have anyone's lives if they make it available to you, people will put open source their lives so people can download pieces of their lives and experience those things. That will be really strange **we won't know the difference between our own memory and a memory we acquired from someone else.** We will no longer have universities as we have them today, information will be on demand, knowledge will be commoditised **all of us will be smarter have infinite amounts of storage & infinite access to information, we will be connected to everything.** He then goes on to say **we will no longer need virtual reality goggles we will be able to do it in our mind and the difference between real life and us dreaming will be blurred.**

<https://youtu.be/CgFzmE2fGXA>

➤ **Quantum computing**

Geordie Rose is the founder of D-WAVE who made the first quantum computers has this to say about quantum computers. You can watch his speech on this link

https://youtu.be/PqN_2jDVbOU - Quantum Computing: Artificial Intelligence Is Here

I will highlight some of his words:

He talks about quantum mechanics proves there are parallel realities.

6min:14sec mark he says "science has reached a point now where we can build machines where we can exploit those other worlds"

12.15 – "They have a pulse tube which emits a sound roughly once per second which sounds entirely like a heartbeat. So if you have the opportunity to stand next to one of these machines, it is an awe inspiring thing. At least for me it **feels like an ALTER TO AN ALIEN GOD**"

14:49 - "The shadows of these parallel worlds overlap with ours and if we are smart enough, we can dive into them and grab their resources and pull them back into ours."

Geordie Rose founder of D-wave quantum computing has since moved to Kindred and has some very strange things to say in his lecture – **Super Intelligent Aliens are coming to earth**
Video by TechVancouver.org https://youtu.be/cD8zGnT2n_A

Some of his words are:

3:32 – "Kindred is far more ambitious than D-wave, what Kindred is trying to do is build real AI. So what you heard about real AI is not what we mean by AI. What we mean by AI is a software system that can do anything literally a human can do, literally anything. Obviously computers are better at things than people in lots of different ways, so now imagine not only can they do everything that a human can do but they can do everything that the best human can do at any task, better than them".

4:29 – How do you build machines that are better than people at everything. When you think of that, what are the applications of this?

Well imagine for \$10 I could build a robot that has fingers and all that and it could do your job & I can sell that to your employer for \$15 & make a profit, instead of having to pay you \$100,000 a year. Imagine it was true for every single job. Complete and utter transformative change”.

6:17 – “What does this have to do with aliens? Say I receive this message from the heavens, my microwave dish catches something, what it says is in 50 years or 13 years we are coming to your planet, you got to be ready.

Now just imagine, what would happen if that happened? A super intelligent alien race beamed down a message to all of us earthlings. The amount of resources that would be marshalled to try to figure out what to do would encompass the whole world. AI is just like that. So when this thing that im talking about happens its going to be exactly the thing you are thinking about those super intelligent AI’s.

So alien means you know different. These things we are building are not going to be people, they **might be** really smart, they **might be** really good at all sorts of things but theyre not going to be like us. **They are going to be aliens** and theyre going to be, im sorry to say, way smarter than every single person in this room, in ways we cant comprehend. **So this of course triggers a lot of alarm. One of the guys who talks about this is Elon Musk.**

Elon musk says **“WHEN YOU DO THIS BEWARE”**

9:10 – he talks about cosmic indifference then says “yes there are these massively intelligent entities out there but they’re not good, they’re not evil, they just don’t give a shit about you even in the slightest”. The same way you don’t care about an ant, is the same way they’re not going to care about you & these things we are summoning into the world now are not demons they’re not evil but they’re more like the lecraftian great old ones. **There are entities that are not necessarily going to be aligned with what we want.”**

9:42 – This transition is really massively important for our entire species to navigate & going back to what Sam Harris is saying, no- body is paying attention. **This thing is happening in the background** while people bicker about politics & what’s going to be in the health care plan in the US and **underneath it all is this rising tsunami, that if were not careful is going to wipe us all out. Technology is a double edge sword.....**

Im not sure about you but I don't like any of this technology because i am not a cyborg or a mechanical robot and nor do I want to be one. I would like my own thoughts kept private in my own head. I like being a real flesh & blood human. I do not want to be hooked up to anything especially the internet.

There are so many questions that need to be addressed if this is the direction you the government choose to take us in.

- With that being said my last reference is Major Insurance Company Lloyds of London has excluded from their policies any negative health effects caused by wi-fi technologies. Lloyds of London, one of the largest insurers in the world, finally made its position absolutely clear with regards to exposure to non-ionizing radiation.
<https://scientists4wiredtech.com/what-are-4g-5g/insurance-underwriters-refuse-to-cover-wireless-industry/>

If you are going to allow wireless 5G with all the evidence presented in peoples submissions then the GOVERNMENT MUST BE HELD ACCOUNTABLE.

I believe WIRED technology should be implemented even if it is at greater expense. If you choose to proceed with wireless technology then I think WIRELESS FREE ZONE land should be allocated for people who have done their homework and know how deadly wireless technology is and for the people who suffer with Electromagnetic hypersensitivity. There needs to be a choice for those who want to live away from this toxic environment.

I ask that 5G be placed under extreme scrutiny, you exercise extreme caution and due diligence be carried out with regard to wireless networks and 5G.

REMEMBER: HUMAN HEALTH, THE HEALTH OF OUR PLANET AND ITS OTHER INHABITANTS ARE FAR MORE IMPORTANT THAN ANY INDUSTRY MAKING BILLIONS OF DOLLARS.

THIS WILL AFFECT YOU, YOUR CHILDREN, GRANDCHILDREN AND OTHER LOVED ONES.
