Country overview

This report provides an overview of Queensland's trade relationship with Solomon Islands. A summary of this trade relationship is below.

- Solomon Islands was the world's 174th largest economy, with an estimated Gross Domestic Product (GDP) of US\$1.4 billion (US\$2,270.8 per capita) in 2018
- Solomon Islands's GDP increased by an estimated 3.4% over 2018
- Solomon Islands's population was estimated at 0.6 million in 2018
- Solomon Islands was Queensland's 59th largest merchandise trading partner (exports plus imports) in 2018–19p
- Queensland's merchandise exports to Solomon Islands totalled A\$42.2 million in 2018–19p
- Queensland's merchandise imports from Solomon Islands totalled A\$4.8 million in 2018–19p
- There were 7,566 international visitors to Queensland from Solomon Islands in 2018–19
- There were 114 international student enrolments to Queensland from Solomon Islands in 2018

All trade data are reported to the nearest hundred thousand dollars. Percentages are based on unrounded figures.

This profile should be read in conjunction with the abbreviations and explanatory notes provided at the rear of the profile.

Trade profile

Merchandise exports – top destinations

These data are based on goods originating from Queensland that are exported overseas by country of final destination. The country of final destination is the country to which the goods are consigned and not necessarily the country where the goods are discharged. Values are reported in nominal terms (based on Australian dollars). Data in this profile topic are updated every six months with an approximate delay of 8 months after the reporting period. The next planned update is in February 2020.

Solomon Islands

In 2018–19p:

- Queensland's total merchandise export value of \$42.2 million
- 0.0% of Queensland's total merchandise exports and 32.9% of Australia's total merchandise exports with Solomon Islands
- 44th largest export destination for Queensland

In 2018–19p, Queensland's total merchandise exports trade with Solomon Islands was

\$42.2 million

Table 1 Queensland's top merchandise export destinations, 2013–14 and 2018–19p

Merchandise exports – top commodities

These data are based on goods originating from Queensland that are exported overseas by commodity. The commodity classification used is the Standard International Trade Classification (SITC) revision 4 at the 2-digit level. Values are reported in nominal terms (based on Australian dollars). Data in this profile topic are updated every six months with an approximate delay of 8 months after the reporting period. The next planned update is in February 2020.

Solomon Islands

- Other major export commodities in 2018–19p included Meat and meat preparations (\$4.3 million), Power generating machinery and equipment (\$3.6 million), Office machines and automatic data processing machines (\$2.6 million) and Electrical machinery, apparatus, appliances, parts (\$2.5 million)

In 2018–19p, Queensland's top merchandise export commodity to Solomon Islands was

Special transactions & commodities not classified (\$8.8 million)

Table 3 Queensland's top merchandise exports^(a) to Solomon Islands

Commodity	Financial year

Merchandise imports – top origins

These data are based on goods lodged in Queensland that are imported from overseas by country of origin. Values are reported in nominal terms (based on Australian dollars). Data in this profile topic are updated every six months with an approximate delay of 8 months after the reporting period. The next planned update is in February 2020.

Solomon Islands

In 2018–19p:

- Queensland's total merchandise import value of \$4.8 million
- 0.0% of Queensland's total merchandise imports and 52.4% of Australia's total merchandise imports with Solomon Islands
- 77th largest origin of imports for Queensland

In 2018–19p, Queensland's total merchandise imports trade with Solomon Islands was

\$4.8 million

Service trade - Australia

Service trade statistics are collected by the Australian Bureau of Statistics in their Survey of International Trade in Services and covers services rendered by Australian residents to non-residents (credits) and by non-residents to residents (debits). For the purposes of this report, service credits are referred to as exports and service debits are referred to as imports to aid users with continuity of terms across topics. The next planned update is in January 2020.

Service trade statistics were not available for Solomon Islands

Service trade - Queensland

Services trade by state is based on state of service provision or consumption. Refer to explanatory notes for details on how state allocations of service trade are estimated. A breakdown of service trade by state and country are not available. The next planned update is in January 2020.

In 2018, Queensland's total services exports to all countries was

\$13,935 million

All countries

- Service trade exports to all countries increased by 39.7% or \$3,961 million, from \$9,974 million in 2013 to \$13,935 million in 2018
- Service trade imports from all countries increased by 17.4% or \$2,140 million, from \$12,309 million in 2013 to \$14,449 million in 2018

Table 7 Queensland's total service trade with all countries, 2013 and 2018

International visitors

This data is based on Tourism Research Australia's International Visitor Survey (IVS) which samples 40,000 departing, short-term international travellers aged 15 years and over who have been visiting Australia. The results given in the IVS are based on a sample, rather than a census, of international visitors to Australia. As with all sample surveys, the results are subject to sampling variability, and therefore may differ from figures that would be obtained if all international visitors to Australia had been included in the survey.

In 2018–19, Queensland's international visitors from Solomon Islands was

7,566 visitors

Solomon Islands

- International visitors to Queensland increased by 66.8% or 3,029, from 4,537 international visitors in 2017–18

Table 8 International visitors^(a) from Solomon Islands, by reason for journey^(b), 2013–14 to 2018–19

(b) Respondent's primary reason for visiting Australia.

(c) Persons who visited Queensland and spent at least one night.

Source: Tourism Research Australia, *International Visitors in Australia*, unpublished data

International student enrolments

This data is derived from the Commonwealth Provider Registration and International Student Management System (PRISMS) database. Data is initially uploaded into PRISMS by educational providers when an enrolment is offered to a prospective student before a visa is granted, and again when a student obtains and uses their visa to enter Australia and starts studying. The Department of Immigration and Border Protection (DIBP) updates PRISMS as students enter or leave Australia or change their visa or residence status. International student enrolment data generally does not represent the number of overseas students in Australia or the number of student visas issued in different countries but instead counts actual course enrolments. The next planned update is in March 2020.

Solomon Islands

- International student enrolments increased by 2.7% or 3, from 111 student enrolments in 2017

In 2018, Queensland's international student enrolments from Solomon Islands was

114 enrolments

Explanatory notes

Profile explanatory notes

Data confidentialisation

The release of statistics for certain merchandise trade commodities are restricted in order to prevent the identification of the activities of an individual business. These restrictions do not affect the total value of exports and imports, but they can affect statistics at the country, state and commodity levels. Further details on confidentialised trade commodities can be found in the ABS' [Confidential Commodities List](#).

Scope of international merchandise trade statistics

This profile provides details on international merchandise trade statistics. It does not include interstate trade.

Rounding

Figures are rounded to nearest whole number. Calculations (such as percentages and rates) are based on pre-rounded figures.

Value

Values reported are nominal meaning these figures represent the monetary value at the time of trade. Exports value are based on Free On Board (F.O.B.) and imports value are based on Australian Customs Value.

Topic explanatory notes

Merchandise exports and imports

Time series

Values are not adjusted to consistent dollar basis.

Service trade

Services credits are classified by the state of provision, while services debits are classified by the state of consumption. The state allocations for transportation, travel, freight insurance and telecommunication services are based on a number of indicators including merchandise trade statistics by state, overseas passenger arrivals and departures by state of clearance and data provided by the Department of Immigration and Border Protection. The allocation for other services (about 25% of all trade in services) is primarily based on the location of the business reporting the information, which serves as a proxy for the state of provision/consumption of that service. The data should be used with care but are considered suitable for analysis over time.
