

When is Chris Bowen and Albo going to wake up! If renewables haven't worked in any other Country why are they going to work here? Yes the ban on Nuclear power should be lifted, I believe! I hope they are not going to destroy all the Coal Power Plants before they have a solution! They are replacing Coal with Wind Turbines, surely they know that the Bisphenol A is a highly toxic synthetic organic compound used in the epoxy resins of turbine blades. It is highly cancerous, has been linked to 80 diseases!

Cheers

Robyn Sullivan
