To whom it may concern :  
Migration Amendment{ Visa capping } bill 2010

I have no words to explain the misery its going to bring for overseas student who has been working hard like dish washing for years to become a chef. Studying with their part time job to survive in this expensive city and getting emotionally involved. All we wanted is become a chef and maybe open my own restarent one day. Because when i first came to sydney 4 years ago, there was not much job for student as i was restricted to 20 hours work permit and obviously i m not a parmanent resident of australia. So i started with toilet wash then car wash then dish wash. I couldnt sleep for years. I was neglected and verbally abused almost every single day of my work life. Because they knew i cant quit. I became a man with very few option. I came to this country with bigger hope and spent lot of time of my life, my energy and money as it is very expensive to study in the college if you are an overseas student. There was no support for me whatsoever. I have no idea why such a wellfare country doing this to me but i know it sure will destroy my life and thousands of others.

Thank you for reading.

God bless Australia.
