

Submission on PFOS.

My situation at Williamtown is simple.

Continual stress and worry about PFOS contamination on my property in the Blue Zone.

Unable to use produce from my farm, EPA says there is no problem, just don't eat anything.

Property devaluation is heartbreaking, you are unable to get a loan to buy a property in the Zone.

The value of the property gone for when I get older and have to sell, as the stigma and contamination will remain, who would buy it.

No faith in Government Departments doing as their told and having endless inquiries and committees, achieving nothing and justifying their jobs.

Politics has overruled facts at Williamtown, the lies, deception and inaction by the Government after the RAAF have admitted they are responsible.

Very hard to live with, no wonder Australians have lost faith in all forms of Government, why would the Politicians care, they don't live at Williamtown.

Thank you,

Kim Forward.
