

To,

Respected Senate committee Secretary,

Senate Legal and Constitutional Committee,

This is regarding “The Migration Amendment (Visa Capping) Bill 2010 (the Bill) seeks to amend the Migration Act 1958 to enable the Minister for Immigration and Citizenship (the Minister) to cap visa grants and terminate visa applications based on the class or classes of applicant applying for the visa.”

My name is Chandniben A. Patel. I have done my Masters in Professional Accounting last year successfully (higher education) and applied for temporary and permanent residency visa fulfilling the Immigration conditions and now if you just cancel our application without thinking how much we suffer to study masters and working very hard day and night, just to gather the money for everything. We paid the University fees on time. We paid the rent on time and other expenditures. We paid the tax according to Australian government conditions. We obeyed all the rules and regulations of Australian government. We respect all the people and the culture. We came here in a hope of getting something. You can understand our feeling, why students are coming from overseas spending such a huge amount, such a hard work, away from their family, just in a hope of getting something, not just discarded in such a crucial condition. Please understand our feelings and don't ruin our future, give some fair decision for the poor students.

Thanking you, with regards,

Chandniben Arpitbhai Patel
